

FINGER NAILS DROPPED OFF

Skin Beneath Lifeless. Fingers Painful. Sleepless Nights. Used Cuticura Soap and Cuticura Ointment. Complaint Gone.

70 Agricola St., Halifax, N. S.—"Some time ago my finger nails began to drop off, the result it was believed of lead poisoning. The nails themselves were brittle and dry, the skin beneath being lifeless looking. My fingers were excessively painful causing sleepless nights. I was treated for about three months and the nails grew again but away from the flesh of the fingers and then fell off again.

"Having heard a great deal of Cuticura Soap and Ointment I sent for a sample of both in the hope of their healing my fingers which were very painful. At night after washing my hands well with the Cuticura Soap I rubbed the Cuticura Ointment all around the finger ends and wore gloves to prevent the Ointment from being rubbed off, then again in the morning washed my hands with the Cuticura Soap. The Cuticura Soap and Ointment had a cooling effect and after using them for a short while I was surprised to feel fingers much less sore and beginning to assume a more healthy appearance; the fungus which had grown under the old nails disappeared and then new strong nails formed. This trouble had lasted about eighteen months before using Cuticura Soap and Ointment yet after using same for three months my finger nails had grown strong and complaint had entirely gone." (Signed) Ernest Beckford, Oct. 12, 1912.

Cuticura Soap and Cuticura Ointment are sold by druggists and dealers everywhere. A single set is often sufficient. For a liberal free sample of each, with 32-p. book, send post-card to Potter Drug & Chem. Corp., Dept. D, Boston, U. S. A.

HOW TO SHAVE.

Some Valuable Hints on How to Use a Razor.

Safety razors have been but a mixed blessing; they have made men forget how to shave. Apart from that, even a safety razor can only be used in one way if the best results are to be obtained.

Which ever kind of razor you use, you should be careful always to shave with the run of the beard. Never shave against the grain; it is bad for the skin, the beard, and the razor.

A safety razor should be pressed flat against the face, and the action of a scythe should be imitated. That is to say, instead of running the razor straight down the face, use a semi-circular motion.

Perhaps the most important part of a shave is the lathering. The more the beard is lathered the softer it will become; it is false economy to scamp this part of the performance in order to save time or trouble.

An ordinary razor should always be stropped before and after use, and the soap should be thoroughly taken off it by hot water. A razor is all the better for a rest occasionally.

Learn how to use a strop properly. The razor-strop should hang from a point not higher than the waist-line. Shaving, and the care of a razor, is a science; and the man who can keep his razor in good condition is a man to be envied, especially in the winter.

How a Sick Woman Can Regain Health

Read This Very Carefully.

"For years I was thin and delicate. I lost color and was easily tired; a yellow pallor, pimples and blotches on my face were not only mortifying to my feelings, but because I thought my skin would never look nice again I grew despondent. Then my appetite failed. I grew very weak. Various remedies, pills, tonics and tablets I tried without permanent benefit. A visit to my sister put into my hands a box of Dr. Hamilton's Pills. She placed reliance upon them and now that they have made me a well woman I would not be without them whatever they might cost. I found Dr. Hamilton's Pills by their mild yet searching action very suitable to the delicate character of a woman's nature. They never once gripped me, yet they established regularity. My appetite grew keen—my blood red and pure—heavy rings under my eyes disappeared and to-day my skin is as clear and un-wrinkled as when I was a girl. Dr. Hamilton's Pills did it all."

The above straightforward letter from Mrs. J. Y. Todd, wife of a well-known miller in Rogersville, is proof sufficient that Dr. Hamilton's Pills are a wonderful woman's medicine. Use no other pill but Dr. Hamilton's, 25c. per box. All dealers or The Catarrh-ozone Co., Kingston, Ontario.

MR AND MRS. HARCOURT.

Mrs. Harcourt Loves Home.

Interest in the personality of the Colonial Secretary, Lewis Harcourt, and his family is revived by the instruction which he is reported to have sent to all British Dominions and dependencies directing that oil leases be made only to companies registered and having their chief place of business under the British flag. This is intended to ensure a world-wide oil supply for the oil fuel-burning ships of the Imperial Navy in time of war. Mrs. Harcourt is a charming woman who loves her home and children.

A WONDERFUL DISCOVERY

An eminent scientist, the other day, gave his opinion that the most wonderful discovery of recent years was the discovery of Zam-Buk. Just think! As soon as a single thin layer of Zam-Buk is applied to a wound or a sore, such injury is insured against blood poison! Not one species of microbe has been found that Zam-Buk does not kill!

Then again, as soon as Zam-Buk is applied to a sore, or a cut, or to skin disease, it stops the smarting. That is why children are such friends of Zam-Buk. They care nothing for the science of the thing. All they know is that Zam-Buk stops their pain. Mothers should never forget this.

Again, as soon as Zam-Buk is applied to a wound or to a diseased part, the cells beneath the skin's surface are so stimulated that new healthy tissue is quickly formed. This forming of fresh healthy tissue from below is Zam-Buk's secret of healing. The tissue thus formed is worked up to the surface and literally casts off the diseased tissue above it. This is why Zam-Buk cures are permanent.

Only the other day Mr. Marsh, of 101 Delorimier Ave., Montreal, called upon the Zam-Buk Co. and told them that for over twenty-five years he had been a martyr to eczema. His hands were at one time so covered with sores that he had to sleep in gloves. Four years ago Zam-Buk was introduced to him, and in a few months it cured him. To-day—over three years after his cure of a disease he had for twenty-five years—he is still cured, and has had no trace of any return of the eczema!

All druggists sell Zam-Buk at 50c. box, or we will send free trial box if you send this advertisement and a 1c. stamp (to pay return postage). Address Zam-Buk Co., Toronto.

BACTERIA IN DUST.

Heat of the Sun and Bright Light Keeps Them Down.

That there is a surprising scarcity of bacteria in dust has been shown by recent experiments. By means of the Aitken dust counter, one scientist discovered that in the open suburbs of London there are 40,000 particles in every cubic inch of air. The same investigator found in London but one microbe to every 38 cubic inches of air.

When air is constantly floating about and man is constantly moving about, he comes in contact with a great deal of air space, and so in the course of a day runs a chance of breathing many microbes into his lungs. If, however, every dark and damp place could suddenly be dried up and stirred up, the micro-organisms would be found in terrifyingly large numbers. It is the heat of the sun and the bright light that keep down these micro-organisms, and so, even on a dusty day, there is a poverty of microbes in the air, and if the sun be bright and hot.

She Was Helpless For Two Years

Why Mrs. Baldwin Recommends Dodd's Kidney Pills.

She Could Find Nothing to Cure Her Rheumatism Till On a Neighbor's Advice She Tried Dodd's Kidney Pills.

St. Walburg, Sask., Feb. 16.—(Special).—"I can truly recommend Dodd's Kidney Pills for any one suffering from Rheumatism." These are the words of Mrs. W. A. Baldwin, a highly respected resident of this place. And Mrs. Baldwin gives her reasons.

"I was nearly helpless with rheumatism for two years," she states. "I got medicine from the doctor, and tried several other remedies, but nothing helped me. Then one of my neighbors advised me to try Dodd's Kidney Pills. I bought four boxes, and they helped almost from the first. I have used nearly two dozen boxes and am nearly cured."

That rheumatism is one of the results of diseased kidneys is again shown in Mrs. Baldwin's case. She had headaches, stiffness of the joints and backache, her sleep was broken and unrefreshing, and she was always tired and nervous. Her limbs swelled and she was always thirsty. These are all symptoms of diseased kidneys. When she cured her kidneys with Dodd's Kidney Pills the symptoms vanished—and so did the rheumatism.

A certain minister was greatly disturbed by a number of women in his congregation who persistently gossiped in a loud tone during service. One Sunday morning he executed a plan which he had devised to stop this annoyance. At a given signal the choir stopped on a certain word in the middle of a hymn. Then one of the gossippers, unable to check herself, was heard all over the church to say: "I always fry mine in lard." "As we know," announced the minister, "that she always fries hers in lard, we will proceed with the singing."

"I have an opportunity to prove an old theory here," he said, after obtaining all the details. "They say that when a man falls from a great height he thinks of all his sins before he hits the ground. Now, is that true? Did you do that?" "Well, I didn't have time to think of quite all of them. You see, I only fell five stories."

Regularity

of the bowels is an absolute necessity for good health. Unless the waste matter from the food which collects there is got rid of at least once a day, it decays and poisons the whole body, causing biliousness, indigestion and sick headaches. Salts and other harsh mineral purgatives irritate the delicate lining of the bowels. Dr. Morse's Indian Root Pills—entirely vegetable—regulate the bowels effectively without weakening, sickening or griping. Use

ETHERIZING PLANTS.

A French Horticulturist Has Obtained Excellent Results.

Forcing plants by the vapor of ether seems to have proven one of the most successful methods yet tried. A French horticulturist, G. Bultel, has experimented with other as a means of obtaining early strawberries, and reports berries much in advance of those obtained by any other method.

In the winter of 1911-12, Mr. Bultel compared a lot of 300 plants treated with ether with an equal number submitted to hot baths. Of the first lot, 107 were in bloom on Jan. 8, and blooming ended on Jan. 16, while the first berries were matured on Feb. 21, and the last on March 15. In the second lot, with only thirty-three in bloom on Jan. 8, blooming ended on Jan. 29, maturity being reached from March 6 to April 15.

The best time of exposure to the ether fumes seemed to be about forty-eight hours. Of the treated plants, 150 were exposed for this length of time, and 150 for sixty hours, and the earliness of the latter was only slightly greater than that produced with the shorter exposure.

A banker was in the habit of wearing his hat a good deal during business hours, as in summer the flies used his bald pate for a parade ground, and in winter the cold breezes swept over its polished surface. A negro workman on the railroad each week presented a cheque and drew his wages, and one day, as he put his money in a greasy wallet, the banker said: "Look here, Mose, why don't you let some of that money stay in the bank and keep an account with us?" The negro looked toward him, and with a quizzical look at the derby the banker wore, answered confidentially: "Boss, I's afraid. You look like you was always ready to start somewheres."
