Comment on Events

To Curb Statisticians.

An effort is to be made by the farmers of Alberta, Saskatchewan and Manitoba to perfect a crop report system that will be somewhat closer to accuracy and the real thing than a good many of the so-called "estimates" that find their way by one route or another into print during the season. We do not blame the farmers. As The Farmers' Advocate says: "Some steps should be taken to prevent bumptious individuals with little or no knowledge of crops from making estimates from the windows of a railway coach or even from a rapid run through the country with occasional cross-country drives. chiefly made with those whose sole mission in the district seems to be to boost that district, and in attempting to boost they make the estimate from ten to one hundred per cent. higher than it should

The Mexican Poon.

An English engineer, Mr. A. W. Warwick, who, since 1897, has spent several months of every year in Mexico and other Span-ish-speaking countries, states that while in some parts of Mexico the labor is fair-ly efficient, in other parts it is of very low grade and cannot be keyed up to do-ing economical wirk. Excessive use of intoxicants and an unbalanced and insuf-ficient dietery may have much to do with low grade and cannot be keyed up to do do ing economical wirk. Excessive use of intoxicants and an unbalanced and insufficient dietary may have much to do with this efficiency, yet Mr. Warwick is inclined to assign the real cause of this inefficiency to racial temperament. He reminds us that the well-born and educated Spaniard never soils his hands with manual labor, while the Indian is characterized by producing only that which supplies his own needs. He is not a producer for the markets. The race formed by the union of the Spaniard and the Indian, then, could hardly have any conception of the innate dignity of labor. Mr. Warwick calls attention to the fact that about 5,000 Mexicans are engaged in agriculture, or more than 75 per cent. of all males engaged in gainful occupations. Yet, in spite of the fact that Mexico is one of the most fertile countries in the world, it has for many years failed to produce sufficient food for its inhabitants. The Mexican laborer is known to suffer from maleuration, and yet 75 per cent. of the males of the country cannot maintain sten the low Mexican standard of living. Feed the Birds.

Now is the time of all others when the those who have only their own selfish interests in view, should make some provision to supply the birds with food. The grow is deep upon the ground, and the good supply for many of our winter birds to completely out off. For some of these in lump of suet or of any unsalted fat, suspended in a tree, will be sufficient. For others, the sweepings of the barn floor of there, the sweepings of the barn floor of the premises will mean the difference between life and death. Birds can endure almost fany degree of cold. Nature has provided them with a warm covering, which they cender more effective by raising the feathers lightly on a cold day or night, thus results the added protection of a covering of so-called "dead-air," one of the most lightly on a cold day or night, thus world. One may often see them on a cold day, perched in some sheltered nook, and looking like a ball of feathers. With such looking like a ball of feathers wait in measurable looking like a ball of feathers. With such looking like a ball of feathers. With such looking like a ball of feathers wait in measurable look are looked and any percent look and look are looked and look and look are looked and look and look and look and look and look are looked and look and look are looked and look and look are looked and look and look and look are looked and look and look and look are looked and look and look and look are looked and look and look are looked and look are looked and look are looked and look and look are looked and look are looked and look are looked a thoughtful and compassionate, and even day, perched in some sheltered nook, and looking like a ball of feathers. With such protection they can wait in measurable confidence for the cold spell to pass; but they must have food. The normal temperature of the bird is several degrees higher than that of man, but food is the fuel than that the fuel than that of man, but fo Every snow-storm of any considerable about the same. magnitude causes the death of thousands of birds, many of whom can be saved by little thoughtfulness. With the farmer

and the orchardist this is not merely a matter of sympathy and compassion. It is business. The birds will more than repay him in the insects they will destroy when there is once more a chance to get at them.

Dublin's Troubles.

work feeling like a new man. I have not had a day's sickness since, and nearly sing the last ten years nearly sound to form the plant of the sickly baby is cross and partial paralysis. Here is an example. Mr. Jas. A. McDonald, Bpringhill, N.S., says: "In the summer of 1912, as the result, I think, of hard work, I was completely run down and found it necessary to quit work. I slept poorly, and what sleep I did get did not seem to rest me, as I was constantly tired. My appetite was poor and fickle, and my nerves unstrung. I had treatment from a doctor for some time, but it did not seem to help me, and having heard a great deal about Dr. Williams' Pink Pills I decided to try them. In the course of a few weeks after beginning the Pills I picked up wonderfully, and was able to return to work feeling like a new man. I have not had a day's sickness since, and restricted the since the summer of the sickly baby is cross and hard to mind. If baby is cross a Five Thousand Trade Disputes.

The Teacher Thought.

In a town of such size that every the same beneficial results in any one knews every one else it is often other tired, worn-out worker if customary to speak of people by offence is meant or taken. One day a friend was helping a teacher of the industrial school to put hats and coats on 40 little members of the kindergarten class. Two little tow-headed girls attracted her attention, and as she tied their hoods she asked :- "Are you Charlie Porter's little girl?" Two serious blue eyes looked up as the elder replied : -"His name was Charlie when he was a little boy; he's Mr. Porter now."

NO GUSHER

But Tells Facts About Postum. This lady found an easy and safe

way out of the ills caused by coffee. She says:

"We quit coffee and have used Postum for the past eight years, and drink it nearly every meal. We never tire of it.

"For several years previous to quitting coffee I could scarcely eat anything on account of dyspepsia, bloating after meals, palpitation,

"After he stopped coffee and began Postum both ailments left him.

A Curious Disease.

The Jamaican negroes have many odd and interesting forms of speech, which are often due to a misunderstanding of the English words. That was the case in a story that Winnifred L. James tells in "The Mulberry Tree." A woman took her baby to a doctor, and the physician asked her what ailed the little sufferer.

"Him ill, sah," she explained, in her soft, musical voice. "Him ill, sah; him blowing bones."

Inquiry brought only repetition: "Him ill, sah; him blowing bones." For several moments the puzzled doctor contemplated the diminutive black creature and its strange disease; then the solution flashed upon him. Blowing sounds not unlike growing. What bones could a child of two be growing? He was cutting

IS YOUR BABY A GOOD BABY?

Mothers, ask yourself the question: Is your baby a good baby? If not he is not well, for it is the nature of all babies to be goodonly the sickly baby is cross and

Copper may be easily cleansed with a cut lemon, dipped in salt.

The Standard Lye of

A clergyman famous for his begging abilities was once catechising a Sunday School. When comparing himself as pastor of the church to a shepherd, and his congregation to

the sheep, he put the following question to the children: "What does the shepherd do for the sheep?" To the confusion of the minister a small boy in the front row piped out, "Shears them!"
