

## FOUL FEET IN CATTLE

Keep Animals Away From Filth and Cleanse With Coal-tar Dips

It is not at all uncommon for cattle to show a very sudden lameness which on careful examination proves to be an abscess-like formation between the hoofs. The starting point is usually a small scratch or abrasion in the skin, which offers a suitable avenue of entrance for the germ causing the trouble. These germs live in the soil, manure and other filth about the yards and feedlots. During dry weather they cause very little damage. When the yards are muddy, or the stables unclean, the growth of germs is favored. At this time also the continued action of the wet, foul material makes the skin between the claws tender and easy to injure.

An examination of the lame foot will usually reveal swelling and tenderness. If the space between the claws be cleaned out, the skin abrasion is usually plainly evident. Sometimes there is a thick, cheesy covering of grayish pus over the surface of the sore. At other times the pus may burrow beneath the skin, and even form pockets that are filled with this cheesy material.

Treatment consists in keeping the affected animals out of the mud and wet manure for several days. Thorough cleansing of the part with any of the coal-tar dips, using five teaspoonfuls per pint of water once daily, is very necessary. All loose shreds of skin should be cut away, and pus pockets well drained. In mild cases the application of pine tar proves a very effective treatment. The severer forms should receive, in addition to a thorough cleansing, a dressing of equal parts of iodoform and boric acid under a bandage for several days. Taken in time and vigorously and persistently treated, healing should not be prolonged beyond a week. If left alone, some cases soon assume the most severe type, which means delayed healing and more bandaging and dressing.—C. C. Lipp.

It is wonderful what a little money spent in paint, and a little time in applying it, will do in the way of improvement around your home.

Worn floors can be made to look bright and fresh—dingy furniture made as good as new—cupboards and shelves made clean and sanitary—dull woodwork and doors, bright and clean—and the walls instead of being covered with faded, dust-collecting wall paper or streaky and shabby kalsomine, can be made artistic and sanitary. Here are the special Sherwin-Williams products that will do all this for you at small expense.

For your floors use S-W Inside Floor Paint for a durable painted finish, or S-W Floorlac for an attractive finish imitating all the popular hardwoods such as Oak, Mahogany, etc.

Refinish your furniture with a coat of S-W Varnish Stain, a combination of a permanent pigment stain and a durable varnish, which renews the old furniture in such colors as Mahogany, Oak, Rosewood, Walnut, etc. S-W Floorlac can also be used for the same purpose.

Cupboards, shelves, painted baseboards, doors, and wainscoting can all be finished handily with S-W Family Paint, a durable oil paint made in twenty-one attractive colors, easy to keep clean.

The best finish for walls is Sherwin-Williams Flat-tone, a durable oil paint that dries with a soft, velvety flat effect. It is made in 24 colors that are the choice of expert decorators. It is very durable and will last for years and can be washed with soap and water, without injury.
