We are Not Much at Underselling

To tell the truth, we don't like the words "cheap groceries"

We much prefer to deal in the highest qualities obtainable.

Because reduced prices ALWAYS stand for reduced values.

It is inevitable.

Business is so regulated that it cannot be any other way.

So we talk high qualities month in and month out.

And we sell accordingly.

And it is the truest sort of economy to deal here.

No waste of material—constant satisfaction—most healthful eatables.

These are reasons enough.

ARNOLD'S

OUR LINES—

Groceries
Boots and Shoes
Wall Papers

A Stitch in Time

Saves nine, and a suit in time keeps you always well dressed. It pays to be a little forehanded in ordering a new outfit of clothes, for various reasons. Call in and let us take your measure for a new suit. Up-to-date goods, style and workmanship. Our motto is "Fashionable Tailoring at Popular Prices."

TOWNLEY BROS.

Fine Tailoring Fenelon Falls

DON'T BLOW UP

The grocer if the holidays find you without a sufficient store of edibles in the house. The wiser way is to come here and order enough at least to carry you over. We are ready to show you about the finest lot of groceries you ever saw. You'll know their quality the minute you see them. You'll know also that the prices we ask are not what you have been paying for similar goods.

POULTRY TERMS

Chickens—Pullets under seven months old which have not laid and cockerels which have not developed a spur.

Broilers—Should weigh from one to two and a half pounds.

Roasters—Should weigh from two pounds and a half upwards.

Fowls—Hens which have laid, or are over seven months of age.

Cocks—Male birds having hard spurs. All mature males.

Capons—Birds caponized when six to twelve weeks old.

Ducklings—Birds marketed before they are ten weeks old. All over that age, ducks.

Goslings—Young birds, marketed from seven to twelve weeks of age, before first moult.

Geese—Older birds over ten pounds and under.

Turkeys—Divided into young and old birds, both male and female, and of all weights.

PRACTICAL COW RECORDS

They Help the Up-to-date Farmer to Build up His Herd

Almost every dairy farmer who commences to weigh and sample his cows' milk individually says at the end of a few months, "I find some in my herd were kept at a loss." Some men find only one or two cows, others find too many in the herd play a losing game.

What does this mean? Just this: that, despite all the experience gained from years of practical dairying, the farmer finds that, in order to become thoroughly "practical" he must re-quisition the aid of dairy records. Neither the cow's appearance nor the owner's knowledge of some short-period yield of milk (extraordinary as that yield may have been for a day, or one week, or a month) will testify with certainty to each individual cow's ability to pay her way for the whole year. Cow testing provides a simple and eminently practical way of discovering, not only if each cow pays, but which cows pay the most profit on the 12 months' transaction of feed consumed, and milk and fat produced. Those large-profit cows are revealed only by practical cow testing.

Cows are apt to cheat the unsuspecting dairyman unless he keeps tab on the performance of each one; many dairymen have found this out to their utter astonishment and regret. Don't take chances with your herd; be certain that each cow pays; it pays you to find out. Individual cow records help the practical farmer to build up a profitable herd.

Some people seem to get a lot of enjoyment in keeping others from enjoying themselves. Teaching a girl to flirt is about as easy as persuading an amateur singer to take an encore.

DRESSING A HORSE

How to Please the Animal, Yourself and the Observer

The harness of a horse constitutes its working dress. Its working clothes need not be elaborate and showy, but they should be sensible and good, sanitary and comfortable. A good horse always looks well either with or without good harness, but a poor horse is greatly improved in appearance with a new set of good harness. Good, clean harness not only makes the horse appear better, but the horse will be more comfortable and do more work in them and do it better. The farmer who takes pride in general farm improvements should still take more pride in driving a well dressed team. Money cannot be spent for a much better purpose, and the time in keeping the harness clean and bright is time well spent.

The most important part of the horse's harness is the collar. It should fit the shoulders and neck snugly, not too tight or too loose, and be made of a firm but elastic material, so that by use it will gradually adjust itself to the parts upon which it presses. Never let the horse wear another's collar, as no two horses have exactly the same shaped shoulders and neck. If the breaking in of a new collar to a horse is like breaking in a new pair of shoes to a man, it should have human sympathy when it is given a new collar.

The bridle is perhaps the next most important part of the harness. The bit should be strong and safe, but never so large, rough or otherwise severe as to cause the horse pain or inconvenience. The smooth bit is generally the best if the horse is gentle and easy to manage. Blinds are an injury to the horse and an unnecessary part of the bridle. The bridle, as a whole should be as light and simple in construction as possible.

Oil Wells. For Spain

Promising surface indications of petroleum deposits in Spain have led the government to investigate the discoveries.

It is quite possible for a man to sow wild oats until they become tame. The Kaiser has forbidden his officers to deal with marriage brokers.

Portugal makes ability to read and write a requirement for suffrage.

Most of the cocoa imported into the United States is produced in the West Indies and Central and South America.

Only seven weddings have taken place in Gloucester Cathedral in fifty-two years.

1836 THE BANK OF 1914 British North America

78 Years in Business. Capital and Surplus \$7,786,663.

You Can Send Money Safely
