Origin of Trousers.

By the present archæological research carried on by one woman it has been provided for the gratification of all women that the bifurcated nether garment, sup posed to be specially distinctive of the mas culine toilet, rightly belongs to the femi nine dress. The women of Judah, it seems were the first wearers of the garment in the bifurcated form, and man, perceiving the convenience and comfort of this article of dress, evolved by the superior intelligence of woman, appropriated the same ior his own use and doomed his womankind to encumber their limbs with flowing robes which render it impossible for them to cope with man in the useful avocations. -Baltimore Herald.

Serenaded by 20,000 Swallows. The swallow nuisance continues with unabated vigar at the Naval academy, Annapolis. From 8,000 to 20,000 swallows gather every evening in the five or six maple trees in front of the superintendent's residence and make evening and morning hideous with their cries. All efforts to drive them away have failed, and s bell and gong are kept going at intervals to drive the pests from the two trees next the superintendent's house. Every year this disagreeable rendezvous is maintained by the swallows. -Baltimore Sun.
