THURSDAY, FEB. 25, 1892.

Editorial Notes.

A BILL was introduced into the United States House of Representatives on Friday to amend the McKinley tariff law so as to reduce the duty on barley from 30 to 10 cents a bushel.

On Tuesday last Mr. J. C. Patterson the new Secretary of State, was elected in West Huron by a majority of 22 over his opponent Mr. M. C. Cameron. This is another gain for the Govern. the water works at Parry Sound had not ment. The contest was the "hottest" which has taken place for many years.

and Hon. Mr. Dobson have been invited to move and second respectively quired. The water supply at Chatham, the address in the Senate in reply to the speech from the throne, the discussion on which will be commenced probably on Monday next.

THE elections on Saturday last resulted in the return of Mr. W. B. Northrup, the conservative candidate, supply from the Scugog river, from which in East Hastings, by a majority of 415, and in South Ontario in the return of Mr. Wm. Smith, the conservative candidate by a majority of 157. These are two gains for the Government.

THE news that Mr. John Dobson of this town has been appointed Senator for this District, was received with unusual satisfaction on Monday last, and we might say that there is no man in the County deserves the honor better, both in a party point of view and otherwise. He has been an untiring supfor over thirty years, and few men have made greater sacrifices than he to aid his party in strengthening the government which he believed to be the best congratulate the Hon. John Dobson on his appointment.

ACCORDING to the annual report of the Winnipeg Grain and Produce Exchange the estimate placed upon the miles around. Seizing a glass I found wheat yield of the province for the past year is 21,000,000 bushels. This is nearly double the crop of the preceding and the Egyptian Monarch was headed in year, which, up to that time, was the largest on record. The grain storage It was the Loodiana, and she was ablaze capacity west of Lake Superior, on or adjacent to lines of rail, is now 10,366,-800 bushels, of which more than nine astride the jibboom. The glass showed millions were provided by the C. P. R There are in the province 42 flour mills, Loodiana and his wife. "There was no with a total daily capacity of 7,455 hope of saving the vessel, even if any one barrels, and three oatmeal mills, which jointly can turn out 300 barrels daily. obtained such a hold that nothing could tial progress.

petitioned the Legislature to repeal the that it brings municipalities into compoorer. The argument that the system encourages trade is met by the petition- was afterwards learned, they stayed parties, races, and religious beliefs.

would be required, whether they were bonused or not. If any considerable no help could come, as it proved. The portion of the Legislature support the burning ship was lying with its head to proposition, an interesting debate may slowly towards the boom. Occasionally be expected.

THE following resolution was passed by the Provincial Board of Health at the intense heat. its late meeting in Toronto:-As it "is believed from information gained in European countries and various States of the Union that tuberculosis exists to a considerable extent in the herds of cattle supplying milk for consumption attention of the Minister of Agriculture through his department the beginning of a systematic enquiry into the pre-Ontario, and that such facilities as may be deemed expedient be supplied for carrying on the work."

AT a meeting of the Provincial Board of Health held last week in Toronto, the question of waterworks and sewerage was discussed, and several samples of water from different parts of the Province were analysed, among them one from Lindsay, which the Board refused to recommend. The following is the report of the committee to which the sewerage and water supplies were sub mitted :-

'At the afternoon session the Committee on Sewerage and Water Supplies submitted a report, in which they strongly urged that artesian wells be sought before river water. It was stated that the plans for been submitted for aproval to the Provincial Board until after the by-law sanctioning the work was passed. The same was said of North Bay. The committee It is understood that Dr. Landry refused to recommend the water for the town of Lindsay, the analysis showing it to be a long way from the standard rewhich is obtained from artesian wells, was considered highly satisfactory, both in quality and quantity. From one well, a supply of 500,000 gallons per day is got. Mr. Freeman, the agent of the company who have secured the franchise of the Lindsay water works, was present and addressed the board. He contended that as only a small quantity of the water would be used for drinking purposes, the source they intend taking the water, was quite good enough. In spite of Mr. Freeman's cheerful assertions, the board adopted the report of the committee, thus disapproving of the proposed supply of water for Lindsay.'

#### The Tragic Death of Capt. and Mrs. Boyd of the Loodiana.

vessel Loodiana of Nova Scotia left th port of New York with a cargo of petroleum for London two months ago. She ducts of the country are offered for sale. was owned in Windsor, Nova Scotia, and weeks ago. The Egyptian Monarch ar- country." porter of the Conservative government rived at Quarantine early yesterday morning and reached her dock at Wilson's Stores, Brooklyn, in the afternoon. Second Officer Jordan, who was on the bridge on the night of Jan. 16, tells this story of the burning of the Loodiana:

"I was on the lookout. The wind was for the interests of the country. We blowing furnously and the waves seemed mountains high above us. Suddenly away over on the port bow I saw a glare in the heavy sky. At first I thought it was only a sailing vessel showing a flare light to scare off passing vessels. Then I saw sudden flash and what seemed to be an explosion lighting up the horizon that a sailing ship was on fire. I sent for Capt Irvin, who came on deck immediately. He gave orders to take in all sail the direction of the light. "At 1.30 a.m. we rounded to near the burning vessel. almost from stem to stern. The flames had nearly reached the bows. In the bright glare I saw two figures sitting them to be a man and woman, whom we afterwards learned were the captain of had thought of doing so. The flames had run up the masts and rigging, and had Manitoba is evidently making substan- stop them until the ship was burned to the waters edge Big patches of burning oil floated around and about us. were almost afraid that some of the blaz-Some of the Western cities have ing oil would be tossed aboard our own ship, for the storm had not abated. The waves, gleaming with the golden reflecbonus clauses of the Municipal Act, and tion from the flames, drove the helpless doubtless the subject will come up for | vessel away from us. The ridges of the mountainous billows were tinged with a discussion this session. The objections lurid glow. As we cut through them we raised against the present system are seemed to be sailing in a sea of fire, which leaped up angrily around us. We got as near to the Loodiana as possible. The

ers with the statement that the factories together until death. We shouted to the couple to be of good cheer. Their answer was a piteous cry for help where the wind. The flames were creeping transacted :the ship's stern was tossed high in the air on the wave, the flames were blown along the bows until it seemed as if the clothes of the couple were scorched by

"The stays supporting the jibboom had been burned away. A few minutes afterwards the ship swung around. The flames leaped towards the keel of the bowsprit. An awful cry of agony went up from those poor tortured ones. Down they fell into that the by-law be amended by substithe fire-lit waves. We saw them for one tuting the name of Hugh O'Leary for cattle, but especially in those of dairy short moment. The man was holding on to the stump of a spar and the woman was clinging to him. A heavy wave lifted to the cities and towns in Ontario, and them up and dashed them against the side believing that the contagious rature of the burning vessel. We never saw them again. We steamed around the blazing ANOTHER MAN'S Bride of this disease is now generally hulk in the hope of seeing a boat containaccepted, this board would draw the ing the crew. Then we steamed to leeward the finance committee. for 12 miles, but no sign of boat or raft could be discovered. We laid around as to the desirability of instituting long as possible, but no boat could live in such a sea as was running at that time. When we reached Gravesend the scratch | tigations made by traffic managers of the crew was immediately discharged. Capt. Western roads show that about 30 per valence of the disease amongst cattle in Irvin went to the London agents of the cent. of last fall's crop has now left the owners of the Loodiana, which was then farms and elevators of the West, and has reported to be missing. The burning been carried to Eastern and foreign vessel was of American build and the des- markets. The moving of this proportion cription of our captain seemed to leave no of the crops has kept the roads interested doubt that it was the Loodiana which we in the traffic as busy as they could be for had seen. He learned that the captain five months, and the Eastern roads have had his wife on board. We saw the vessel been in a state of blockade for the greater in lat. 48, lon. 42, about 1200 miles west part of the time. The blockade has been southwest of Queenstown." The Loodiana raised recently, but a number of the roads was built in Nova Scotia and had carried say that affairs can hardly be said to have cargoes of petroleum for some years. She resumed their ordinary state, because if was insured at Windsor, N.S., for \$40,000. | the roads forced all the grain that they Captain Boyd was in command.

> What a Montreal Gentleman Has to Say on Life in Algiers.

A Montreal gentleman, writing from Algiers, February 1, says: "I have been here over three months, the most delightful I ever passed. The average temperature for the past month has been 5210, the month previous 62°. This is the cold ers say there will be no possibility of light month. I am sitting with my window open, enjoying the bright, hot sunshine. The country looks like summer. Flowers, flowering trees, shrubs and vines are all in full blossom. The lemon trees are full of fruit, while tropical palms, cacti and a great variety of beautiful plants present a pretty sight. Then there are hedges six feet high of geranium, heliotrope and other flowers in full bloom. I think this must have been the site of the original Garden of Eden, but there are no apples. Green pease and new potatoes, as well as other vegetables, are growing in the gardens, and are on the market every day. The environs of Algiers are picturesque, with fine drives and fine views of the Mediterranean. Algiers rises from the sea, an African Venice, is about one mile in front, rising gradually to six or seven hundred feet. The front of the city is built in the French style, the rear and high up the hill being the Arab quarter. one side the city spreads out into the country and is lost in the forests; on the other is the rocky coast of St. Eugene, a boulevard being cut out of the hill running father has just died and left an estate of for miles to the west, with here and there beautiful villas, and its rocky shores worn into tantastic shapes by the storms of the Balls, concerts and parties take place every week, at which the English are well represented. Grain Blockade.

CHICAGO, February 20.—Careful invescould get on the Eastern the blockade would become worse than ever. Eastern roads have considerably more cars at their command now than when this traffic began, and it is probable that they will be able to keep things moving until the opening of navigation, when a sufficient outlet will be afforded for all the grain that can be sent. With 70 per cent. of last year's crop still in the West, the traffic managbusiness by all rail or railroads and lake lines until the next crops are ready to be

#### A Mysterious Act.

Los Angeles, Cal., Feb. 19.—One of the greatest mysteries of this city has been that of the tongueless man, which has just been solved. Last November a priestly-looking man hired a room at the lodging-house at the corner of Fifth and Broadway. One morning he was found in his room, blood issuing from his mouth, and a bloody razor in his hand. On examination it was found that he had cut out his tongue with the razor. Bloody tracks to the door out in the hall and the bath-room indicated that he had been there. Search showed that he had thrown his tongue down a drain pipe. After his wound healed he disappeared. He was thought to have been a Catholic priest. It now turns out that his name is George Wilson. He goes garbed as a priest, but he is a professional gambler. His family is wealthy, and live in New York. His \$150,000, \$50,000 of which was left to him. The estate cannot be settled up until George has been found, and detectives from New York are now in the city look- DENTIST ing for him. They state that George has been the black sheep of the family. This statement suggests that the man's act of GOLD and PORCELAIN CROWNING cutting out his tongue was prompted by

### Hard Winter in Britain.

London, Feb. 20.—Snowstermsprevailed fallen to a great depth in that part of the country. All outdoor work in the shipyards at Hartlepool has been stopped. The cessation of work in the shipyards renders idle 7,000 men. The storm in the midland faction counties has brought all outdoor work to a standstill. The mail service between Great
