> been reported to the Montreal health cold lead and poison-anything to get rid department during the past few months. Fortunately, none of the cases have proved fatal, though one lady has become paralyzed. The medical health officer, Dr. Laberge, explains that, so far as he has been able to ascertain, the poisonings have been caused by cheap tin and agate kettles, teapots, etc., which are being sent into the city from Germany and other foreign countries, and sold in various stores for a small price. He is of opinion that a large amount of common lead is mixed in the manufacture of these articles, hence the poisonings. In order to verify this suspicion he has sent a teapot and one or two kettles to be analyzed by experts in

-The ordinary Grand Trank engine is supposed to draw about twenty cars, which means that an engineer, fireman. conductor and two brakemen will be employed on every run. General Manager Hays, in cutting down expenses, has hit upon a novel plan, whereby the expendi-ture in wages will be decreased considerably. Instead of making one engine pull twenty cars, he has decided to place two engines on each freight train, and make John Kendrick Bangs will begin a new As well as we can tell you, them pull from 36 to 42 cars. Sequence in Dreams.

Dreams are curious things. About a week ago a west Philadelphia gir dreamed that she lost her watch, and in the morning she looked in the place where she always kept her timepiece, to discover that it was gone. This, of course, led her to believe that some one had actually stolen it, and that she was not dreaming, but was merely in a half-sleep. With this disheartening suspicion the crestfallen young woman told her brother of the affair. The brother had to visit various pawnshops and station houses, give a careful description of the costly article, Here was his own household openly and was kept hustling around about that her brother discontinued the
