TRAINING CANARIES TO SING.

Six Months of Incessant Care Is Required for the Work.

whose style is left on the pupils as distinctly as that of the vocal expert infuences the students of the conservatory. Every breeder makes it his business to constantly be on the lookout for old cock birds of repute as songsters. These are never used for breeding, but are usually kept in small, darkened cages. They are the masters on which the musical education of the young birds depends.

When the nestlings are about six weeks old the cocks are taken away, says the Detroit Free Press, and put in a large into smaller cages, and placed in a room sen. He is of the opinion that many of molten, if not a gaseous mass. Money to LOAN on prime Farm Prop- with the master bird, yet so that they she other expeditions failed because they land the received by the older erty in the southern portion of the cannot see each other. Now comes the were planned in opposition to nature. lengths of time required by the older breeder listens carefully to judge their quality and progress the birds are making. The best singers are picked out and

put into what are called "single boxes," small wire, darkened cages, placed inside a tin box. At one side is a curtain, which is withdrawn when the bird is to sing. The greatest care is taken that the canaries never hear an inferior bird, or, in fact, any other sort of bird, as they are apt quickly to learn wrong notes and so spoil their song.

The birds, too, are kept very quiet, GPR CPR CPR CPR CPR CPR CPR and allowed to sing only under pleasant conditions, as it is considered that any kind of disturbance or fright is likely to create a broken, jerky kind of melody. The excellence of the song consists not so much in its loudness, or even in its tone, as in varied repetitions of certain strains. Each melody has its special name and the birds are classed according to the tunes they sing.

There are 22 different strains, and Fassengers travelling WITHOUT CPR some birds have a compass of four octaves. The education of the canary involves six months of incessant watchfulness and activity on the part of the breeder. When the bird has reached seven months he is supposed to have acquired his musical education, although a talented pupil is often left with the master somewhat longer, in order to gain spectal finish.

Three Famous Statues.

The three most famous statues in history are the Colossus of Rhodes, the Sphinx and the vocal statue of Memnon at Thebes, and of these the last is the D. CHRISTIE & CO most remarkable, in consequence of its property of emitting sounds when its lips were touched by the rays of the rising sun so that it seemed to greet the coming day. It was originally a portrait model of King Amenophis III., and was one of a pair of statues between 60 and 70 feet high, carved out of single blocks of sandstone and transported from the quarries to Thebes, whereas the Sphinx

was carved from the living rock in situ. Of statues other than stone the most remarkable is that of Buddha at Nara, near Kioto, in Japan, which was erected A. D. 1100. It is made of bronze and is 50 feet 6 inches high and more than 28 feet brond across the shoulders. On its head are 966 curls, and the image is surrounded by a glory of halo 78 feet in diameter, on which 16 images, each eight feet long, are cast. Two smaller images, each 25 feet high, stand in front of the larger one. The total weight of metal in the main figure is about 450 tons of which 500 pounds consists of gold.

BERNIER OF QUEBEC

AUDITORS' REPORT.

To the Reeve and Municipal Council of the Township of Mariposa : GENTLEMEN. - We have completed the audit of the accounts of your Treasurer for tween 130 degrees and 140 degrees east Perhaps the strongest argument against the year ending the 31st December, 1898, and beg to submit the following statements: 1st,-Detailed statement of Receipts and Expenditures.

2nd,-Abstract statement of Receipts and Expenditures. 3rd,-Statement of the Assets and Liabilities of the corporation. 4th, -Statement of Drainage and School Debentures.

We find that the books of your Treasurer as well as those of your Clerk have been xceedingly well kept during the year, all payments by your Treasurer having been properly authorized before payment, and proper vouchers produced for same.

We find the cash balances at the credit of the Municipality to be as follows: Cash at the credit of the Municipality in the Bank of Montreal, Lindsay. \$8,766 24

We have examined the Bond furnished by your Treasurer, which is filed in the office of the County Treasurer, and find that it is in proper form and for the amount authorized by the Council.

We desire to express our appreciation of the very courteous manner in which both your Clerk and Treasurer rendered us all necessary assistance in the discharge of our

Respectfully submitted.
