Then he pasted me in the chip fell off.

The following table shows at a glance how the affairs of the London Mutual have been going during the last few years :-

| Year. | Losses unpaid at close of each year. | Cash available for paying losses at close of each year. | Money Borrowed | Surplus reckoning premium notes at full face value. | Investments each year. |
|-------|---|---|-------------------|---|------------------------|
| 1885 | \$6,047 | \$63,963 | None | \$101,816 | None |
| 1886 | 9,878 | 50,686 | None | 115,955 | \$6,500 |
| 1887 | 12.455 | 22,701 | \$20,000 | 97,268 | 8,000 |
| 1888 | 23.014 | 20,721 | 40,000 | 75,334 | None |
| 1889 | 20,436 | 13,911 | 40,000 | 74,068 | 9,028 |
| 1890 | 26,182 | 1,403 | 60,000 | 67,176 | 11,797 |

It should be borne in mind that during the last three years the London Mutual collected in heavy assessments over \$30.000 more than usual, and yet at the close of last year, after collecting a full year's income, they had only \$1,403 with which to pay \$26,182 of unsettled losses. In regard to security no one should hesitate as to which company to select.
