Spiration to every civic virtue. The methods of most elective bodies, when compared with those of a voluntary or corporate character compels the conviction that prospective ballots dictate the spirit of their deliberation to a much larger extent than the interests they are appointed to serve. Of course it can hardly be expected that an executive body should at all times get along with as little friction as one whose functions are merely advisory, but it is surely not necessary that differences of opinion, even in a legislative body, shall be expressed in any other than a wholly orderly and business-like way.
