Editorial Notes.

THROUGH a trick in bookkeeping, the late Mercier Government showed a deficit in their last year's transactions of only \$600,000, whereas it is found that outside of trust funds and capital account there was a deficit of \$1,108,-184. But over and above the ordinary expenditure there was spent during the year on new building, railway subsidies, etc., \$1,584,659, which allowing for receipts from trust funds and sale of lands leaves a further deficit of \$1,290,-990. This together with the deficit on ordinary accounts makes a total deficit on the years transactions of \$2,400,000.

Our citizens are to be congratulated upon the fact that the waterworks question has been at last satisfactorily solved. Messrs. Moffett, Hodgson, Clarke & Co., of Syracuse, N.Y., have entered into a contract to construct the system, and work will be begun in a few weeks. The contract we believe is in every way a good one, and has been the result of careful handling on the part of the council and leading citizens for the past year or two. The expenditure of the large amount that will be required in the construction of the works will be a great boon to the laboring class and business men during the coming summer.

THE Montreal Witness, a staunch reform journal, in referring to the Redistribution measure introduced into the House of Commons last Friday by Sir John Thompson, says: "The measure is not an outrageously bad one, latter mistake was even more fatal though not in all respects fair. Some than the choice of the candidate. small conservative constituencies whose populations are diminishing have been preserved, while some large liberal ones have been wiped out. THE cause of the defeat of the con servative candidate at the provincial bye-election in Toronto last week is neither that given by the Empire nor that given by the Globe. The one attributes the defeat to over-confidence and apathy on the part of the conservatives, whilst the other, of course, claims that thetory city of Toronto has experienced an almost miraculous conversion to Mowat principles. The fact of the matter is the conservative ward bosses are alone responsible for the result. They forced, by dexterous wirepulling, a weak candidate upon their party, and one who was not generally acceptable to the rank and file. As too frequently happens at party conventions, the candidate chosen was not the choice of the people upon whose votes success depended, and hence the overthrow of the candidate and the discomfiture of the wirepullers.
