The following is the standing of the pupils of the senior department of the Oakwood public school for the month of April. Mr. Chas. Thorne V.S., also from Kirkfield, has bought the old Mill property and is going to improve it immediately.
Mr. Morris has been teaching young ideas how to shoot for the past 30 years and has now resigned his position as teacher here, and has been succeeded by Mr. Ramsay from Seabright, to whom we cordially extend the right hand of fellowship. On Friday afternoon, the last day of Mr. Morris' incumbency, a few of the prominent ratepayers visited the school and an informal presentation of a ham-mock was made to him by the children, after which a good-bye was said by

children and teacher which was very affecting, hardly a dry eye was in the house. In the evening about thirty parents and a few pupils took Mr. Morris by surprise, and after loads of good things had been despatched, a presentation of a gold watch was made to him and a handsome clock to his niece, Miss M. Clark, and it was well into the wee sma' hours before the company retired, having had a most enjoyable time.

CROSS CREEKS
Owing to a washout on Murphy's hill, Mr. Wm. MacKay was thrown bag and baggage into a large mud hole on the roadside while returning from town on Monday evening. As the earth was of an unusually soft nature at this particular place, "Bill" and the horse had extremely bad footing for a time and at each exertion to extricate their pedals they sank deeper in the mire. A series of sounds not louder than a propeller whistle emanating from Mr. MacKay's thorax brought several men from the fields, who attached a logging chain and team to the fast disappearing couple and yanked them out on the roadway while a cat would wink her eye, apparently none the worse of their experience but very muddy.

I read with no little amusement, an ineffectual effusion from the egotistical director of the Pine Grove cheese factory in reply to my correspondence of the 13th ult. in last week's issue of this valuable paper. As Mr. Clancy takes the pen name of "Ready Reckoner" we must score him one for being frank enough to sign his own name to this production, which is a full admission of how little he does know concerning the industry he strives to direct. Having no book to which he could refer in this instance, he rolls up his trousers and wades knee-deep into cheese dividends and expenses, depending solely on the fertility of his imagination, hence mistakes. Now to get down to cheese. Here are the facts which I will state briefly. The factory which was built by shareholders, some of whom never sent one pound of milk, receive for their investment this dividend which Mr. Clancy speaks of and has no bearing whatever on the charges made to A. and B. for placing their cheese on the market. It 26 cts. is the cost of disposing of 400 lbs. of cheese and A sends 300 lbs. and B 100 lbs. Then A should pay 19 1/2 cts. and B 6 1/2 cts. This should now become clear to all and I wonder at our clever director who has cut such a prominent figure not understanding this before now. You forgot to mention anything about the Babcock tester. When is the other portion going to be shipped here from Toronto? Lastly, in reference to Inspector Kerr's report. This gentleman, who comes about three times during the season, only makes one test, and as it takes a double test it is impossible for him to know whether the strippings are retained or not. As a director you should know this, but there are none so blind as those who have eyes and will not see.

—Such a crowd of boys enough is fitting out with spring suits these days, mothers pleased and boys happy. Our low prices is doing the work.
