Editorial Notes.

New York commercial papers are urging the dairymen of that state to make special efforts to secure excellence in their World's Fair exhibit at the October competition. New Yorkers are a good deal elated at their success in the last competition, when they captured about one-thirtieth the number of prizes the Canadians took. Their anxiety to maintain their record should be an incentive to Canadians to arrange things so that they will not do much more. By keeping up the standard of the last competition Canadians can do this.

REPRESENTATION in the United States Senate is not based upon population, but upon statehood, and so it comes in that in discussing the silver question the Denver News remarks that "the voice of Colorado is more potent in the United States Senate than that of New York, and the voice of Nevada is more powerful than that of great state of Pennsylvania." These silver states are able to balance in the Senate the votes of New York and Pennsylvania with their 11,255,867 of population, although Nevada and Colorado only have 464,959 people. There is something radically in fault in a representative system permitting this great anomaly.

This has been an exceptionally favourable season for the export trade in hay. The short crop in England, and in fact in the greater part of Europe, coupled with the abundant yield in Canada, has made the business more profitable than ever before. Great Britain has imported during the past six months 62,766 tons of hay, whereas her requirements during that period of 1892 were met by 26,066 tons. Her chief source of supply usually is Holland. The United States and Canada, however, sent this year about half the quantity she imported. The Americans have been more ready to take advantage of the favorable market than have Canadians. In June, 1862, there were 834 tons of hay sent from the United States to England, but during the same month this year the shipments reached 2,338 tons. The expansion of the Canadian was from 1,795 tons in June, 1892, to 1,881 in June, 1893. The chief difficulty in connection with hay consists in preparing it for the market. Much care is needed in harvesting, and expensive machinery is required to bale it. The Canadian Government has done well to place all the information on the subject before the farmers, but it may be doubted if so good an opportunity to sell hay will rise for many years to come. Canada is so far from the market, the hay is so bulky, that only when unusual prices are offered can this country compete in that line of product.

Diamond Dust.

Lifford and Lindsay will play ball on Saturday next.

A game between Cobourg and Lindsay should prove a drawing card at the central fair.

On Saturday nine boys from Lifford journeyed to Peterboro and had very little difficulty in defeating the league team of that town in a four innings game. As the visitors had to leave to catch their train, play had to cease. The Review gives the score as follows:—

THE RAILWAY MEN PLAY BALL.

The Mechanical and Traffic departments of the Grand Trunk as represented by their respective nines met on the diamond at the agricultural park and a good, but rather one sided contest was the result. The Mechanical men had Laidlaw and luck on their side, and consequently won by a score of 40 to 15. The following will give an idea of who made the runs:—

BASE HITS.

"Sandy" Laidlaw was the hero of the day. He got in no less than two home runs and made a dandy three bagger. It is rumored that the manager of the New York national league team has his eye on "Sandy."

"Sergeant" Topley played good ball. He is as good as a whole company of ordinary men. Eyes right!

"Shog" Adams caught one innings for the traffic department and then retired, complaining that the sun affected his eyes.

Before next game all the players are going to get shod at Harry Bell's, so that tumbles will not be so numerous.

Positions are not marked as each man played in a different place each inning. The scores 40 to 15 may appear large, but they would have been larger had not darkness intervened.

There were quite a number of spectators and the fun was fast and furious.

There were fourteen coaches on one side and sixteen on the other. Two for each inning.

The batteries on both sides did excellent work and a record of the hits and errors would fill this issue of THE WATCHMAN, therefore we have no room for it.

Frank Snyder, of the Lindsay's, umpired the game, and wonderful to say, both sides were pleased.

The traffic men are not yet satisfied, and announce that victory will yet be theirs, or the Victoria mill will have to increase its capacity.

Team work was almost eliminated and individual efforts were the principal features of the game.

"After the ball" game was over, the players fraternized in good style and the boys all joined in the synonymous refrain "Twas a great game."

It is probable that the Mechanical and Traffic teams of the G.T.R. will play another game on Saturday next. The Spratt field will probably be the scene of the conflict on this occasion.

The home for the aged is one barrel of flour ahead as a result of Saturday's game. The traffic men supplied it.

Some of the district championships in the Canadian Amateur League are settled. What about the Midland district one—according to the Examiner, Peterboro and Cobourg must be pretty nearly tied for first place!

Honors Tendred to a Former Resident of Ops.

The Cresco, Iowa, Republican:—"We had the pleasure a few days ago of reading a letter from Governor Boies to R. J. McHugh, containing the offer of a very important appointment, one of the most important, to the state of Iowa, in the Governor. Owing to Mr. McHugh's long continued illness he was compelled, of course, to decline. It is gratifying to Mr. McHugh's many friends to know, from this and other recent evidences, that he has the confidence and esteem of the leaders of his party in both state and nation." Mr. McHugh, popularly known as "Red" McHugh, in this locality, is a brother to Mr. Geo. McHugh, of this town. In politics he is a staunch Democrat, hence the above complimentary reference from one of the leading Republican papers in that state, shows his popularity. Many friends will regret to learn that he is in a very poor state of health.

The Law on Estray.

Usually about this time of year we have several farmers coming in to the office asking questions in regarding estray animals and for their benefit we publish the law once more:—

"The laws of Ontario provide that a person taking up any stray stock shall give notice three times in a weekly paper if one is published within thesection where the stray was taken up, and if the property is not called for in three weeks after first insertion of the notice the finder shall go to the justice of the peace and take oath to the finding and advertising. If the property is not claimed in one year and should not exceed \$50 in value it then belongs to the party taking the same up. If over \$50 it shall be advertised by the justice and sold and the proceeds of all expenses shall be paid over to the county treasurer. Any person taking up any stray and neglecting to cause the same to be advertised and appraised shall be liable to a fine of \$20. The estray applies to any other persons property which may be found in like manner."

ONE DOOR EAST BENSON HOUSE.

The effect of the general depression in the United States is being felt in this country. The Rathbun Co. have discharged quite a number of employees and the Parkin Co. have made a reduction in wages this week. Under the existing condition of things workmen will be wise to hold on to work even at less pay than formerly.

The roof of the Royal hotel is being renewed.
Mr. Thos. Walters, superintendent of the Ontario Government works, is in town after an extended trip over his district. Improvements are being made this summer at Hall's lake, Minden and Muskoka.

Give me a whip-lash? was the unceasing and tormenting cry of small boys to a town shoe-maker. So the knight of the awl and waxend secured a whip, invited the boys in as they came along with their usual song and presented them with a whip-lash, just where it would do the most good. The boys now shout out for the whip
