these days of winter creameries must un-

derstand the art of butter making also.

It was a favorite saying of the late Dr. A. J. Gordon of Boston that "God has hand figures and divide by six. The no half-providences." If an impression their number never fails to provoke my was forced in upon his consciousness he profoundest interest if not compassion. therefore always acted upon it believing ran across one last evening whose picturthat God had the other side of the probanker, broker, merchant and clerk should | vidence prepared, which, without his side post it up for reference and use. Their of it would not be complete. Thus it was being no such thing as fractions in it, that he moved so consciously and so con there is scarcely any liability to error or tinually under the guidance of God's s) decided information be obtained with spirit. A writer, very different in many so few figures. To find the interest at 7 respects from Dr. Gordon, has lately been per cent. add one-sixth, at S per cent., one teaching similar truth. Dr. John Watson, better known as Ian Maclaren, in an interesting article on "Christian Telepathy" tells among other incidents how on one reel, comes the whizzing wretch on his occasion he found an altogether unusual whiching wheel. His eyes stick out and difficulty in preparing a sermon upon his jaws drop low, and he cares not a cuss which he was working. Thoughts of a where he may go. He tears o'er the brother minister would obtrude themselves until a suggestion that in its intensity seemed a commandment forced itself upon him to write to his friend offering to ake a day's service for him. Even the date was clearly indicated. So forcible was the impression that he wrote the letter offering his services, but so sensewithout making a muss, and he gets less did it seem to him to send it, that he tore it up and threw it in the fire. That evening a letter arrived from his friend, exp aining that a very great favor would be conferred if Dr. Watson could assist and there's somebody won't do a thing to him upon a certain occasion and indicating him, when at last he reaches a place below | ever the day which had been suggested where there is no rain and much less in the letter which he had written but snow. He scorched on earth; 'twas his had been destroyed.

Dr. Watson draws three conclusions, -Loose clothes and downy cushions which, as they are alike so comforting and

GIUSEPPI'S JUBILEE CHEESE

Ship Rats Ate All but the Cask and Mighty

cried Leonardo Giuseppi, a Ewing street Italian, as he danced about a small barrel Chicago. "That's the lovely Italy cheese!" And as he spoke Appraiser Heyne, who was waiting on Leonardo and his Roman friends, walked over to the window on the aroma and prayed for a breath of air. while Dr. Harry Manning, an expert, re turned to the chemical division and playfully broke a wicker bottle full of bisul-

hide of carbon and sat down on the fumes. Leonardo Giuseppi is a prosperous Italian. He has been in Chicago a number of cars and has taken care of his money; also, as he has gained in political influthey think Leonardo is all right.

He told them he was going to give them a jubilee banquet. He promised it should be one of the strongest things on the West Side. He wrote to friends in Rome and had them send him direct a consignment of the edibles which are most affected by the rich and epicurean people in the Eternal City, and they did. The things came and Giuseppi took some of his closest 3rd; the last lot being about four friends down to welcome the reminders of home. There was a cruse of elive oil-not | the sail flapped and tugged as Captain made from peanuts, but from olives. There | Patterson held to the mainsheet with was a big tin can of yellow mushrooms such as would throw a millionaire's chef into agonies of envy. There was preserve: garlic that needed no label to disclose its character, and a whole package of spa-

But the papers called for a cask of cheese, and nothing of the kind could be of opening gives four weeks before the found in the room. Presently one of the Italians bounded to the outdoor landing because the majority of students wish to and rolled in a little barrel. Then Leoremain at least that long. The dairy nardo and his fellows shouted, "That's the

Unfortunately a lot of ship's rats had gnawed a hole in the bottom of the cask and had eaten all of the cheese but it's flavor, which clung around the shell and the cask and sent Uncle Sam's customs people after their resignations. They stood out in the wind and shouted through the onen door that Leonardo might come back the next week some time and pay the

Housekeeping In India. A writer on the Anglo-Indian kitchen in an English culinary journal, gives some details of the service that reveal the trials of housekeepers in India. Filth in every form appears to be a necessary accompaniment of the East Indian cuisine. The kitchen sink is on the floor, with an outlet through the wall. There is no underground drainage, and the sewage is as apt to flow about the well as anywhere else. The cook in toasting bread holds it between his toes before a charcoal fire. Chinamen are more cleanly, but they frequently use the soup tureen to wash their feet in. In one particular East Indians secure greater cleanliness through the use of pure wood cheesemaker who wants to succeed in ashes for washing utensils instead of soap. The former have pungent cleansing properties without a disagreeable reminder, as in the case of the latter. In all accounts of go until the crop is hauled out and soid. than where all the different kinds of ap. East Indian cookery the inevitable curry plays the leading part. It is only of late years that it has been revealed that curry powder is valueless unless freshiy made.

Why He Sold Them. There is no curio more unique than the typical Denver newsboy, and the dullest of esqueness and quaintness charmed me. He was a typical gamin and so diminutive n stature that I had to stoop over to inerrogate him, which I did in this way: "Where do you get your papers, my lit-

"Oh, I buy 'em of Johnny Green." "And who is Johnny Green?"

"He's a newsboy. He buys 'em in The Times alley.'

"What do you pay him for them?" "Ficents."

"What do you sell them for?"

"Ficents." "You don't make anything at that?" "Then what do you sell them for?"

"Oh, just to get to holler."-Denver

The Ways of India. Lord Roberts in his book tells a good story of a native Indian servant who had been told to prepare a bath at a certain hour. Meanwhile a fierce attack was delivered by the enemy, and in the thick of t the servant, who had made his way through the storm of bullets, suddenly appeared among the headquarters staff. "Sahib," said he, "your bath is ready." An almost better story comes from the Malakand in Chitral of a subaltern who was waked one morning by a brother subaltern's servant pulling at his foot. "Sahib," whispered the servant, anticipating wrath, "sahib, what am I to do? My mas-

SAILED THE COW TO A FAIR.

And This Cape Codder Captain Got First Prize In a Special Class.

When I was down on Cape Cod, I heard an amusing story about an old sea captain and his cow. Captain Patterson, after sailing the sea for more than 40 years, finally retired to a little farm near Barnstaple, where he settled down, with a horse, cow and two or three dozen hens. His cow, though a lank and rather stubborn creature, was said to come from very good stock, and when the Barnstaple people took it into their heads to have a fair Captain Patterson determined to exhibit his cow.

But when the day came for driving her to the grounds the cow showed that she had a mind of her own and would not budge a step beyond the farmyard gate. In vain the old captain tugged at the rope, pummeled her sides and pushed her flanks. The cow wanted to go to pasture and was bound she wouldn't go to the fair.

Captain Patterson's patience was very nearly gone, when suddenly an idea occurred to him. Though he was not strong enough himself to force the cow to go to the fair his training suggested something that was. Tying the cow to the gatepost, he went up into the loft of his barn and threw down an old sail stepped to a dory mast. Then he put a horse's blanket belt through an iron ring, strapped the belt around the cow, inserted the end of the mast in the ring and bound the mast to the side of the cow with some 50 feet of rope.

The wind blew "quartering," and when the captain untied the cow and raised the sail the canvas swelled out over the cow's back, and away she went "sidling" down the road, meoing and plunging and trying to stop herself in vain. Captain Patterson seized her tail, and using it as a rudder guided her skillfully in the right direction. With every fresh puff of wind the obstinate cow would be hurried along faster, while the dust blew up in clouds and one hand and the cow's tail with the

It was a hard voyage for both of them, but not a long one, and when they came in sight of the fair ground everybody ran out to see the remarkable sight of a cow being sailed through the streets like a ship. Cheers and laughter filled the air, and when the captain finally whirled his cow around at the gate of the fair ground and brought her neatly "up into the wind" the shout that arose might have been heard two miles away.

Unfortunately Captain Patterson's cow did not take one of the prizes for blooded stock, but the captain himself was given a special prize by the fair commissioners for "the best advice for getting balky cattle to market."-Out

Honest but Cute Yankee.

There is a funny case of international honesty down in Arizona, just on the line between that territory and Mexico. A Yankee farmer lives there, one Amasa Barrow by name, and it is his business to raise chickens. Chicken feed is cheap in Mexico and chickens bring fine prices in Arizona, but to raise fowls in Mexico and bring them across the boundary or to buy the feed and bring it across, would involve the payment of a considerable duty, which would eat the profits about as fast as the hens could eat the corn. As for smuggling, that was not to be thought of.

Amasa is a Yankee, and he is so honest that his neighbors say he wouldn't take advantage of a man in a horse trade. But he is also full of Yankee ingenuity, and after deep cogitation he built a long, slim hencoop, one-half of it in Arizona and the other in Mexico. On the line there is a gate. Over the line there are barns containing feed. At feeding time the gate is opened, and the chicken fancier shoos his flock into Mexico, where they eat their meal. Then he shoos them back to the protection of the American flag, where they digest this Mexican grain, lay their eggs and carry on their family affairs. Mr. Barrow saves about 50 per cent on his grain and makes about that much on his chickens, and if there is any smuggling done it is done by the innocent and irresponsible biddies.-Washington Times.

Meek, but Vigorous.

face, figure, air and apparel all proclaimed it. To be sure he had not heard her speak as yet, but from the lips of so pretty a little patrician only pearls and diamonds could fall. It was strange that she should be at the races unattended, but that, of course, was but the brother could not be far off and would rejoin her in a moment. Time went on, though, and still she sat alone. Presently something happened. One of the horses stumbled and fell. The jockey was pitched headlong to the ground He lay white and still. The man turned to look at her. There she sat, the color flown from her cheeks, her lips parted, her eyes wide and staring. He ventured to reassure her. "Oh, I don't believe he's badly hurt," he said. "Hurt?" she repeated quick as a flash. "I only hope he's broke his neck. I had \$20 on the little scoundrel."-New York Sun.

The Women of Guiana.

The wife of the cooly in Guiana is a woman who is very much to be envied. SARSAPARILLA Every gold or silver piece her husband receives for his services is beaten into personal trinkets to be worn by his better half. In this condition it constitutes the cash wealth of the family. It is perfectly safe, as it is as much as any man's life is worth to touch the trinkets so long as the woman wears them. These same women are also noted for their beauty. Their features are straight and perfect, their eyes beautiful in color and their Philadelphia was the first city to issue a forms perfect models of symmetry and grace. Dressed in soft, filmy materials, rich in color and eastern figures, they present strangely oriental and fantastic appearances

The Art of Living

And living well, is in judicious marketing. Where you is as much importance as what you buy and what you pay for it comes to food. You want to know the surrounding things you are going to eat. Everything is fresh, appear attractive at our store. The prices are always right
