KITES PUZZLED BY KITES.

Other Big Birds, Too, Affected In the

Many amusing experiences have been the lot of the scientists who have been manipulating kites for scientific purposes. Large birds are always interested in the strange devices floating in the air and cannot quite make out what they are. Prompted by sharp curiosity, they hover around the floating kite and subject themselves to the danger of becoming entangled in the silken string and being dragged down to

No bird, however, has ever alighted on a kite or attacked one. While one scientist was flying a train of five kites a couple of years ago a large silver tipped eagle came suddenly out of the higher air and swooped round and round the first kite, looking against the sunset sky like a huge silver ball. As the train of kites was pulled in the eagle followed, visiting one kite and then another, seeming uncertain just what to do. In a few minutes, when he seemed to have decided that they were not good to eat and he knew nothing about them anyway, he indignantly flew off and was lost

Another experience was had with a stork that came from the New Jersey side of the Hudson and flew straight for the queer object in the air. He apparently had made up his mind to go straight through it, but changed and dived underneath. He went around and above it, and through a glass it could be seen that he cocked his eve at the intruder in a most comical manner. He started away a few hundred feet, changed his mind and came sweeping back. He finally reluctantly went away, mystified over this queer addition to the inhabitants of the air.

While kites were high in the air one March flocks of geese flying in the V alight on the string holding the kite and sway to and fro. - Chicago News.

Wellington and Napoleon's Horses.

The horse that the Duke of Wellington rode at Waterloo was named Copenhagen. When that fearful battle was over, the horse appeared to sympathize with and appreciate his master's success, for when the duke arrived at headquarters, and, after tossing the bridle reins to a groom, dismounted, the horse kicked up his heels in an apparent ecstasy of delight, saying as clearly as it is possible for a horse to say anything, "Tired as I am, I will make you see that I as well as the rest can show my joy in the victory which my master

The duke saw to it that Copenhagen was well provided for in his old age. He had abundant rations, the best of care and was allowed to roam at will in the park at Strathfieldsaye. "His name lives with his master's, for it is linked with his in history.'

Napoleon when at St. Helena once said of his horse: "He has memory, knowledge and judgment. He distinguishes his master from his servants, although these are more constantly about him. I had a horse which distinguished me from the rest of the world and which manifested by his bounding and haughty gait when I was upon his back that he carried a man superior to those around him. He would not suffer any one to mount him except myself and the groom that took care of him. When I had lost my way, I threw the bridle upon his neck and let him pick his way, with the inevitable result of finding the right road."-Harper's Round Ta-

Clara Louise Kellogg, the queen of American prima donnas, abdicated, so to speak, in the full splendor of her eventful professional career, apparently without a shadow of regret. In private life she is Mrs. Carl Strakosch, her husband having been formerly as prominently active an impresario as she was a singer. Mr. and Mrs. Strakosch reside during the greater part of the year in their beautiful country place at New Hartford, Conn., but invariably go to New York for a few weeks during the opera season. Mrs. Strakosch takes as lively an interest in opera now from the boxes as she did once on the stage.
