The Watchman. THURSDAY, NOV. 17th, 1893. NEWS OF THE WEEK

The conservatives of South Ontario have decided to enter a protest against the return of Hon. John Dryden. In the official count before Sheriff Poxton at Whitby on Saturday Hon. John Dryden's majority in South Ontario was increased to 150. A five-story theatre in course of completion at Detroit collapsed last week. Some 300 men were at work on the building at the time, and of those fifteen met their death by being buried in the ruins. Jake Yarely, a gardener near Stouffville, raised from two acres of land three tons of cucumbers, two and a quarter tons of cauliflower and fifteen bushels of onions. All of the Ottoman troops have left Crete, with the exception of four officers and 40 men, who remain at Retimo, in the Russian sphere, ostensibly for the purpose of embarking ammunition. On Saturday Judge McCurry of Perry Sound fined James Clark of Elmisdale \$100 and cost and a month in prison for keeping an illicit liquor still. Collector Stratton and Officer Floody of the Toronto revenue office were on the case. Ida Tebo, 16, and Julia Bosley, 20, living near the village of Plinton, North Hastings, left their homes together recently at 4.30 Thursday afternoon to drive in the cattle from the mountain side. They did not find the cattle, but wandered on

and finally lost their way. They sought shelter from the rain under an overhanging rock. They were found next morning by a search party almost paralyzed with cold and fear. -Recent mails from Sierra Leone, West Africa, bring news of the hanging of Kwella, one of the 13 murderers of American missionaries, members of the United Brotherhood of Christ, in the Sherbro district of Sierra Leone, last May. -The complete returns of the plebiscite vote show that of the entire electorate only 7 per cent went to the polls, 22 1/2 per cent voted for prohibition and 21 1/2 per cent voted against it. The arguments for a prohibitory law look very small when reduced to those figures. -Wolves are plentiful in North Renfrew county. Four hundred sheep have been killed by them. They are beginning to attack travellers. A Wm. Heimer was set upon by four of the brutes. He was armed, and succeeded in driving them off after having shot one. -Turkeys killed with a wrenched neck, picked off all but the ornamental wing feathers, well-fattened and carefully assorted are in demand in Great Britain. The market for such fowls has been so good for the agent in the old country. He counsels the making of small shipments early in November. -The police magistrate and justice of the peace at Goderich have given joint judgment in the Cox shooting case, holding that Cox was justified in shooting Beatty. The constable who preferred the charge refused to be bound over to prosecute at the assizes, and Mr. Cox is now free. -The great Dervish army in the Sudan has been "disintegrated" by a flank movement of British troops up the Blue Nile. Ahmed Feidil had maintained a position near Col. Parsons' camp. His movement cost of his retreat, his army broke up, and 500 black riflemen deserted to Col. Parsons. The Dervish leader then fled, and his men are suing for pardon. -There is a big demand across the line for Canadian apples, which, with the boom in the market in England, is causing a boom. It is unusual for Canadian merchants to send apples to the United States in any quantities, but the apple crop there is a failure, and dealers are looking to Canada. It is a good thing for Canadian fruit growers, as well as those that handle the apples. -Following the lead of Halifax, the militia department will authorize the establishment of "Beaver" companies as a separate unit of the militia in all the leading cities. A "Beaver" company is a medical branch for service in the field. The officer is a surgeon-major to surgeon-lieutenants, quartermaster-sergeant, sergeant-composer and three sergeants. Of the \$250,000 asked for Sudan recognition, \$300,000 will be applied to the Khartoum-Atbara railway, \$200,000 to the building of government offices at Khartoum, \$12,000 to police organization, and the balance to general purposes. The fact that the government buildings will be erected at Khartoum fixes this place as the future capital of the Sudan. -Mrs Thomas Connell of St. Thomas, Ont., gave birth to triplets on Thursday last, an hour and a half afterwards died. The children were girls, and weighed three, seven and eight pounds shortly after being born. The deceased gave birth to twins on two different occasions, one when she was a child. Besides her husband, she leaves three children, several others having died. Mrs. Connell was about 36 years of age. -The law came severely on Toronto baby farmers Thursday last. In the morning, Mrs. Beatty, of Adelaide-st. west, was given two years in the Mercer Jail for starting a child in the mercer death. In the afternoon, Mrs. Malone, alias Thomas, in the same court, was given a year's term also in the Mercer. Mrs. Malone left an infant child on a pile of snow in Bloor-st. west. It was found, but died two days afterwards. -Algonquin Park, being a protected game preserve, is becoming well stocked with deer, beaver, and ducks. It is proposed to introduce cariboo and black game from Europe to this paradise of the hunted beaver, and measures are being taken to provide food for the animals which are already there. Rondout Park in Kent county is becoming, too, quite a popular resort for the furred and feathered denizens of the woods, wild ducks are especially plentiful. -The British Humane Society has conferred medals on two train hands, Bernard McAllister and John Waddell. On November last year a passenger on a C.P.R. train fell from the C.P.R. bridge near Vaudreuil and the two men at once plunged into the icy water and rescued him. In the presence of the Montreal board of trade, Lord Aberdeen pinned the medals on the brave fellows' breasts and praised their courage in a neat little speech. -Dr. James Mills, principal of Guelph, Ontario agricultural college at Guelph, states that 130 students are now in attendance at the institution, taking the full course. No less than 72 new students were admitted on Oct. 1st. All the college rooms are filled, and some of the leg rooms are being boarded out. The students are of an exceptionally good class, nearly all of them being farmers' sons. Those who intend to take the special dairy course will not join until January. -Instructions have been issued by Sir Louis Davies, collector Milne at Victoria, B.C., to prepare claims against the Canadian government for the illegal capture of the sealing schooner, the Carmelite, true of the sealing schooner, the Carmelite, Maria, Vancouver Belle, and Ross Olsen, which were seized near the Commander which were first named vessels have been rotting on the beach at Petropavlovsk, Siberia, ever since. Russia has already paid damage for seizure of two Canadian vessels. -While engaged in a sawmill in the township of Dawn on Thursday, Mr. Hillier, father of Dr. Hillier, a well-known practitioner of Leamington, was instantly killed. It appears that the deceased was in the mill when, by some unknown means a board fell across the rapidly revolving circular saw. The board was hurled with terrific force across the mill, striking Mr. Hillier in the face killing him instantly. The blow fractured the jaw and skull and literally tore away the whole of one side of the face. -A number of Toronto gentlemen are said to be organizing a company to carry out a chicken farm for the raising of chickens and eggs, the latter to be shipped to the capitol country. The company is to be capitalized at \$40,000, of which \$18,000 has already been subscribed. Land has been secured on Yonge-st., three miles north of the C.P.R. track, and Mr. John Will of the Imperial bank, is spoken of as son of the new company. The farm will be stocked with 15,000 laying fowls. Among those who have taken stock are G. W. Gooderham, W. Gooderham, S. B. Brush, H. M. Pellatt, J. McDonald, W. Douglas and F. Rolph. -It is the inconsistency of human nature which makes citizens of the United States fight for "niggers" in Cuba and against them down south. For instance, the other day a meeting of 600 white citizens was held at Wilmington, North Carolina, the object being "to assert the supremacy of the white man." They passed resolutions declaring for white labour and for the expulsion of the negro newspaper publisher, Alex. Manly, and for the resignation of the meeting also asked the Mayor and Chief of Police to resign as being incompetent. Manly has fled the town, but the Mayor and Chief of Police, who are white men, swear that they will keep their feet in the sand. -Sydney O. Slocum, the private detective, was convicted at Toronto of inciting Mrs. Robert Hopkins to commit perjury in the recent prosecution of Dr. Dawson of Claremont. -Chancellor Boyd spoke of the serious nature of the crime, and then sentenced him to the Kingston penitentiary for five years. -An Ottawa despatch to the Toronto press says that the officials of the post-office department are greatly annoyed over a paragraph sent out stating that the two-cent letter rate to England went into force last week, on the Prince of Wales birthday. The new rate takes effect on birthday, and any letters mailed before that day bearing only a two-cent stamp will be treated by the dead letter office in the usual way. -Fishermen from Green Island report that the lighthouse-keeper there, named Chabins, a small schooner go down in the south passage in the course of the recent storm on Lake Erie, and that six men and a woman were drowned. He attempted to rescue them but failed, owing to the high seas. The name of the vessel is not known, but she is supposed to have been a coal or stone-caster from Detroit or Cleveland. -The French steamship company has filed a suit in Philadelphia, Pa., for \$2,500,000, the value of the lost French steamship La Bourgogne, her cargo and freight, which were sunk on the morning of July 4 off the Grand Banks of Newfoundland, by colliding with the Countyshire. The United States authorities seized the Countyshire on Saturday and took charge of her. The owners of La Bourgogne claim that the collision was due to the neglect of those in charge of the Countyshire. -The report of criminal statistics for the year ending September 30, 1892, has just been issued. It shows that there was an increase of 632 in the number of charges for indictable offences during the year from 7,335 to 8,227. The number of convictions was 5,721 against 5,204 for the previous year. The number of convictions decreased in Nova Scotia and New Brunswick and increased in all the other provinces. Of the total number of convictions in 1892, 63 per cent were females. -A terrible accident happened at St. Mary's station, Thursday afternoon, in which James Brophy, of Stratford, lost his life. The afternoon train from London had left St. Mary's station, and was approaching the junction. A number of soldiers were working on the rails. The engineer blew his whistle, and all the men got out of the road with the exception of Brophy, who was slightly deaf. He was struck by the locomotive, and the head was completely severed from the trunk, being hurled some twelve feet to one side. A high wind was blowing towards the approaching train, and it is probable that the unfortunate man did not hear the whistle. -Recently while returning to Glenora from New Lowell, Simcoe county, Mr. Samuel Gowan met with an accident that cost him his life. A new engine, being built over a five-year-old engine, and the workman had most of the old bridge torn down when the accident happened. A road was made down the embankment and through the river at one side. In the intense darkness it is supposed that Gowan could not see where he was going and drove right into open space and the horse plunged headlong into the river, a distance of about 700 feet. Gowan was heard to cry out for help, but no one was near to help him. It is supposed to have been stunned by a blow he got on the head, and was unable to move, perished in the water before help arrived. -A rather peculiar shooting accident occurred Thursday morning at the home of Mr. John Brown, farmer, who lives about a mile east of Stouffville village. Mr. Brown owns a breech-loading rifle and a shotgun. He had brought it into the bedroom and laid it on the bed. A little while after Mrs. Brown entered and started to tidy up the room, and the daughter, seeing the gun, took off the trigger and discharged the gun. The charge took effect on Mrs. Brown. Dr. Rowan of Stouffville being hastily summoned, found the bullet pierced the shoulder blade. Although the wound is serious, Mrs. Brown is in no immediate danger. -One morning recently Mr. Thomas Maxwell of Bancroft was out in the woods looking for some calves when he came to a rough wooden box about two feet long and a foot wide. Curious to know what its contents were Mr. Maxwell removed the cover, which was nailed down, and he was horrified to find inside a smaller coffin, neatly covered with black cloth, and on top of it rested a bouquet of flowers, apparently quite fresh. Naturally Mr. Maxwell was impulsive was to notify the authorities, but he decided to make a closer investigation, and when he removed the glass and looked in there lay the remains of some little girl's pet cat. Maxwell had merely replaced the cover and left poor tabby just as he found her, while the wind whistled a mournful dirge through the pine tops overhead. -Fully six thousand sportsmen are now ranging the northern hunting grounds in chase of deer. This is the estimate of Chief Game Warden Tinsley, based upon the number of licenses issued this season to hunters and settlers. This official further calculates that each of these 6,000 sportsmen kills at least one deer on an average. Northward of the game line the clearing of large timber tracts and their replacement in the course of nature by thick undergrowth is one of the primary factors in this increase, for it is not only impervious to hunters, but also gives them a better supply of food. Nobody can gauge the vast number of deer in the north, as they are scattered over such a wide district. -A terrible accident took place last Friday night on the C.P.R. one mile east of Shuswap, the second station east of Kam oops, by which two men lost their lives, and one was seriously injured. The dead were Edward Reib, a brakeman, and James Little, engineer; John George, the fireman was badly scalded. A freight train in charge of Conductor J. Powers and Engineer James Little was following the Pacific express. The train consisted of 20 cars, with engine No. 678. While crossing the level prairie between the lake and Shuswap the boiler of the engine exploded. So great was the force that the engine was turned completely around. The top of the cab was blown up on a telegraph pole, and the tender and two cars were wrecked. The brakeman was killed instantly, while the engineer was badly injured that he died the following morning. -The now famous Ponton case will come up for trial on Monday 21st Nov., before Mr. Justice Ferguson. While all connected with the prosecution claim that some startling revelations will be made regarding Ponton's part in the matter, no idea is given to the public as to their nature and for the reason many regard the statement as a case of whistling to keep up their courage. Mr. E. Fuss Porter will have entire charge of Ponton's defence. He will have 52 witnesses in all, and of these the crown has consented to sub-

poena 18 who reside outside of the Bay of Quinte district. Among them are persons living in Vancouver, B.C., St. Paul, Min., and other points. Durand, the ledger-keeper of the Dominion bank during Conton's incumbency of office, is in British Columbia, and he is one of the witnesses needed by the defence. It is not the intention of Mr. Osler, who will appear for the crown, to ask for any postponement of the case. He will have 20 or more witnesses, and it is reckoned that the case will be disposed of in four or five days. -Almost every man in America has some digestive trouble. When men meet, the greeting usually is, "Well, how are you?" That develops health talk. The man who has no bowel or stomach trouble is almost a curiosity. Trouble is in a take no care of themselves. They eat and though they had copper stomachs and bowls of brass. By and by over-worked nature rebels. Then come headaches, nervousness, bad blood, liver and kidney troubles. Dr. Pierce's Pleasant Pellets furnish help for constipation and torpid liver, sick and bilious headache, dizziness, sour stomach, loss of appetite, indigestion, or dyspepsia, windy belchings, "heartburn," pain and distress after eating, and kindred derangement of the liver, stomach and bowels. Accept no substitute. -The North-West Territories general elections Friday, November 4, 1893, resulted in a sweeping victory for the Haultain government. The opposition and independents seem to have alike fared badly, both being all but wiped out. The premier, Mr. Haultain, has almost continuously been in power since 1891, when he was elected chairman of the first executive committee. The committee was defeated in August, 1892, and Mr. Haultain resigned, but only to return to power in December of the same year, since then he has continued in office. Mr. Ross, his chief colleague, was in the North West council from 1883 until its abolition, and he has been a member of the assembly since 1888. He was elected speaker in 1891, and in 1894 became a member of the Haultain government. Mr. Ross, from London, and Mr. Haultain, from Peterboro, Ontario, Mr. Wm. Years, son of the late Viceroy of Canada, supported Mr. Bulyea a member of the North West council and came within 36 votes of defeating him. -Monday evening was Halloween and a rather serious joke was played upon the Rev. Mr. McLeod of Newstead. A crowd of 7000 in the evening Mrs. McLeod was seated near the door of her home, she heard what she thought to be the cry of a baby but paid no particular attention to it until the cry had been repeated, when she found an old peach basket which to her surprise contained a little baby three weeks or a month old. Mr. McLeod immediately took the child in out of the house and notified the authorities. The basket also contained a bottle of milk in which had been mixed whisky, with the evident intention of keeping the child from crying. The baby was very little and appeared to take his change of circumstances most complacently. It was temporarily placed in charge of Mr. Eldridge by the council, who will hold it for a short time in the hope of discovering a criminal offence of a very serious nature and it is probable that the guilty parties will be brought to justice. The case is being followed up by the authorities, which it is believed will lead to their discovery. -While the British army is pushing its way up the Nile valley, it is aching a most wonderful naval exploit. This is the method of getting a boat along with the help of rafts. To take warships ashore and overland seems like a comic opera campaign at first glance. But it is really a very serious and scientific method of warfare. These gunboats which are cut into sections and loaded upon freight cars, will be put together after the fashion of a portable canoe and lashed down to the upper Nile. This is done to overcome the world-old obstacle, the cataracts of the Nile. But these gunboats are no steel like affairs. They are up-to-date steel vessels. To carry one of them requires the whole train of a dozen flat cars. When put together they are 140 feet long, with a beam of 21 feet. Each one will carry an armament of at least two, three or six-pound guns, and several smaller machine guns. Yet with this smaller machine gun. Yet with this formidable enough to turn loose on the Arabs along the river banks, these boats will draw but one foot ten inches of water. They can glide into shallow pools and fit at nearly any where that a canoe can go. They are flat-bottomed, with curved sterns and turbine propellers, thus employing every known device for operating in shallow waters.

Knew Too Much. "Do you know what conservatories are for, Willie?" asked his uncle. "You bet I do!" replied the boy promptly, and then, turning to his sister, he asked, "Shall I tell them, Mamie?" That being the first intimation she had had that he had been in or near the conservatory the evening before, naturally she blushed. -Chicago Post.

The Health of the Hair is indicated by its condition. When the natural secretions decrease; when the hair becomes dry, splits at the ends and comes out in combing; when the gloss disappears and the hair becomes gray or faded, the ill health of the hair is indicated. The success of AYER'S HAIR DIGOR is due to the fact that it restores the hair-producing organs to their natural vigor. It encourages and promotes the secretions of the hair follicles, and thus gray or faded hair regains its original color, new growth begins, and lost lustre is restored. "I have used Ayer's Hair Vigor for fifteen years. It causes the hair to keep its natural color and is a positive cure for baldness." -T. B. WEYANT, Weyant, Pa.
