

THE KINGDOM OF WOMEN

MANY MATTERS INTERESTING TO THE FAIR SEX HERE TO BE FOUND.

Something About the Waists of Women - The Artist's and the Doctor's Models - An Ear of Corn - What's a Kiss - Dots About Women.

While a nineteenth or twenty inch waist is a deformity in an adult woman, it may justly be doubted whether the twenty-six inch waist of the Venus de Medici is not somewhat too large to be in proportion with the figure of the average American woman.

The Venus de Medici is 5 feet 5 inches in height, 36 inches about the waist, 34 inches about the bust and 44 about the hips.

Waist, 23 1/2 to 24 inches; bust, 34 to 35; hips, 45 to 47; base of skull to waist, 16; biceps, 11 1/2 to 12.

The doctor's "model woman" has smaller hips and a smaller bust and about the same waist as the "cloak model."

It may interest the ladies to know that Mme. Carnot's (wife of the French President) dinners cost \$10 a plate, and a ball is given by her at an expense of \$7,000.

The women journalists of England have formed themselves into an organization known as the Writers' Club and chosen John Strange Winter, President.

The Empress of Japan takes a keen interest in the advancement of woman's education in her country, and devotes considerable time and money to this object.

One of the prettiest features of Berlin is its corps of uniformed flower girls. Only pretty girls are selected for the work, and their uniform, the national costume of the Isle of Rugen, is furnished by the stock company who manage the enterprise.

This is a pretty device for the handle of a hot tea or coffee pot. It is made from a ball of corn color knitting silk as follows: - Steel needles, medium size. Cast 40 stitches, knit plain across, carry two threads, knit five stitches with one thread.

So continue until the forty stitches are knit, representing eight kernels of corn.

On return seam five stitches, then carry the thread over inside and seam five more. So continue to seam until across. Make the holder about one-eighth of a yard long. Gather one end and crochet around it a single crochet, to form a point, and frill a crochet of shell stitch on the other end.

The essence of tu-lips (two lips). The only gift a generous lover likes to get back again.

Temporary facial friction generating instantaneous rapture and bliss. The soul's ambassador.

The dew gathered from the lips of earth's fairest flowers. A lubricant, without which the machinery of love gets rusty.

The cream of courtship. That which is exchanged between two persons, is something whist in the act of exchanging, nothing after the exchange is made, and for which neither can show value received.

Matrimonial bird-line. A kiss is Love's press telegram.

Tomato Dishes. Tomato soup with stock is delicious. A quart of tomatoes, a quart of beef stock, one onion, cornstarch and a little cayenne pepper and salt are the ingredients.

Stewed tomatoes are so simply prepared that it is astonishing how many people make a nasty mess of them.

All Italy has been startled by the impulsive sacrifices recently made by the Duchess Eugenie Litta Bolognini, of Milan. Weary of fashion and satiated with the pleasures of Vanity Fair, the Duchess publicly expressed her disgust of it all and ordered the sale of her magnificent jewels, miniatures, fans and lace.

SCIENCE AND PROGRESS.

INTERESTING PARAGRAPHS CULLED FROM VARIOUS SOURCES.

Electricity in a Clear Sky - Pumping Natural Gas - Co-operative Mining in France - Krupp Guns - Science in Small Parcels.

It is said that the use of gas in libraries causes the destruction of the leather bindings of the books.

A single tannery in Cincinnati consumes daily 650 hides in the manufacture of patent leather, belting and sole leather.

The Russian Government has recently completed the work of lighting the harbor of Odessa with electric lamps, the plant consisting of 64 arc and 8 incandescence lamps.

A recent discovery has been made of a new deposit of the well-known Cleveland iron ores of England. The seam in some places is fully eleven feet thick, and covers an area of sufficient extent to pay for working.

The corporation of Manchester, England, proposes to borrow the sum of three-quarters of a million of dollars to erect an electric lighting plant, the machinery for which will also operate the hydraulic power supply of the city.

A Canadian electrician states that electricity causes the tides, and demonstrates it by electrifying a rubber comb by rubbing it through the hair, and then drawing it over the top of a glass filled with water, the result being that tidal wave follows the comb.

A company has been formed in Germany to erect works for the production of the new explosive dynamite, which is especially adapted for mine use, having more power than dynamite, at the same time being perfectly harmless under ordinary circumstances.

Electricity in Clear Sky.

A series of interesting experiments with atmospheric electricity have lately been made in England. They were accomplished by the primitive lightning catcher used by Benjamin Franklin - the common kite, with wire points and an insulating wire reaching the earth. Mr. Alexander McAdie, who made the experiments, demonstrated that electricity can be drawn from a kite high in the air, no matter if the sky is absolutely cloudless. The kite, under these conditions, discharged electric sparks at the lower end of the wire, where the energy of the discharge was ascertained by an electrometer. The quality of electricity in the upper air seemed to be so nearly proportionate to the height of the kite that Mr. McAdie could determine whether the kite was rising or falling by simply glancing at the needle of the electrometer.

Pumping Natural Gas.

When natural gas was plenty beyond all demands, a few years ago, the suggestion that the natural pressure might be supplemented by the use of pumps in carrying the gas long distances, was met with incredulity and even ridicule. The impossible has come to pass, however, and for more than a year gas has been pumped from the wells to Pittsburgh. Last year the People's Gas Company had two pumps in the Murfreesville region, by means of which the pressure of the gas was increased from twenty-seven to eighty pounds.

The Versailles Gas Company is now putting up an \$8,000 pumping plant at Greenville, Pa., and the Greensburg Fuel Company is building a \$19,000 pumping station at the same place.

Co-operative Mining in France.

One of the most recent co-operative ventures in France is the acquisition of the property of the Monthieux Collieries Co., by the syndicate of Miners of the Loire, an organization composed of about 10,000 work-people. The property purchased embraces two collieries with an output of about 5,000 tons per month, coke ovens, workshops and other establishments, the whole connected with the French Railway System at St. Etienne by a branch road, three-quarters of a mile long.

Some little fortunes have been made at work for us, by Anna Page, Austin, Texas, and Joe, Bonn, Toledo, Ohio. See cut. Others are doing as well. Why not you? Some earn over \$400.00 a month. You can do the work and live at home, whenever you are. Even beginners are easily earning, from \$5 to \$10 a day. All ages. We show you how and start you. Can work in spare time or all the time. Big money for workers. Failure unknown among them. NEW and wonderful. Particulars free.

M. Hallett & Co., Box 880 Portland, Maine

What's a Kiss?

The essence of tu-lips (two lips). The only gift a generous lover likes to get back again.

Temporary facial friction generating instantaneous rapture and bliss. The soul's ambassador.

The dew gathered from the lips of earth's fairest flowers. A lubricant, without which the machinery of love gets rusty.

The cream of courtship. That which is exchanged between two persons, is something whist in the act of exchanging, nothing after the exchange is made, and for which neither can show value received.

Matrimonial bird-line. A kiss is Love's press telegram.

Tomato Dishes. Tomato soup with stock is delicious. A quart of tomatoes, a quart of beef stock, one onion, cornstarch and a little cayenne pepper and salt are the ingredients.

Stewed tomatoes are so simply prepared that it is astonishing how many people make a nasty mess of them.

All Italy has been startled by the impulsive sacrifices recently made by the Duchess Eugenie Litta Bolognini, of Milan. Weary of fashion and satiated with the pleasures of Vanity Fair, the Duchess publicly expressed her disgust of it all and ordered the sale of her magnificent jewels, miniatures, fans and lace.

The Government Reports for years past show that the AETNA LIFE has paid to living policy holders in CANADA a larger sum in settlement of MATURED ENDOWMENTS than that paid by Canadian and British Companies combined. No better evidence is required of the value and popularity of the AETNA ENDOWMENT Policies.

Cash Dividends paid Every year

Township of VERULAM.

Table with columns: Part of Lot, or Street, Lot, Con., Acres, Arrears, Cost of Advertising and Commission, Total, Patented or not Patented. Rows include West part, East half, West half, West half of West hf.

I, THOMAS MATCHETT, Treasurer of the County of Victoria, as directed by the warrant of the Warden of the said County of Victoria, dated the 17th day of November, A.D. 1891, will proceed to sell each and every of the above parcels of land, for the arrears of taxes now due upon them respectively, as above set forth, together with the costs (unless said arrears of taxes and costs are sooner paid) at the Court House, in the Town of Lindsay, in the said County of Victoria, at 11 o'clock in the forenoon, on Wednesday, the Seventeenth day of February, 1892.

COUNTY TREASURER'S OFFICE, LINDSAY, 10th November, 1891. THOMAS MATCHETT, County Treasurer. First published in the Lindsay WATCHMAN, 12th November, 1891.

Treasurer's Sale of Lands

FOR TAXES IN THE TOWN OF LINDSAY

TOWN OF LINDSAY, Whereas by virtue of a warrant issued by the Mayor of the said Town bearing date the 9th day of November, 1891, and to me commanding me to levy upon the following lots or parcels of land for the arrears of taxes due thereon and costs, I hereby give notice that unless the said taxes and costs are sooner paid, I shall on Wednesday, the Seventeenth day of February, 1892, at 11 o'clock in the forenoon, at the Court House in the Town of Lindsay, proceed to sell by Public Auction the said lands or as much thereof as may be sufficient to pay such arrears of taxes and all lawful charges incurred. All the under mentioned lots are Patented.

Table with columns: Street, Lot, Part, Acres, Arrears, Cost of Advertising and Commission. Rows include Park A, W R.R. Track, S King & W St Davis, E Lindsay N, Block Q. Q., N Durham W, N Durham E, N Glenelg E, S Glenelg E, E Georgian, Park E, E James, Park G, W Souix, Block T.

FRED. KNOX, Town Treasurer.

TO FARMERS. McDONELL & COWDRY. Are now prepared to buy at the new G. T. R. Storehouse, Lindsay. Wheat, Peas, Barley, Oats, Red and Alsike Clover and Potatoes. CASH paid at the Storehouse. Lindsay, Sept. 18th, 1890 - 36. ff.

1891. LINDSAY Woollen Mills. 100,000 POUNDS OF WOOL WANTED. Highest Cash Price, and 2 Cents per lb. extra when traded.

MANUFACTURING AS USUAL. We charge for Manufacturing when wool is found: Reeled Yarn Single 15c per pound. All Wool Check Flannel 30c per lb. Stocking Yarn, 2 or 3 ply 20c " Full Cloth, from 30c to 35c. Twill Flannel, yard wide 25c " Yard. Tweeds 30c to 35c. Blankets from \$1 to \$2.00 per pair.

CUSTOM WEAVING. 10 cts. per yard for yard wide, and 5 cts. per yard for certain widths 2 yards wide, 20 cts for weaving and 10 cts for cotton.

CUSTOM CARDING. We have put on a new Burr Cylinder on custom machine and guarantee best roll carding we have ever done. Price 5 cts per pound, 2 cents for greasing.

DYEING AND CLOTH DRESSING ON SHORTEST NOTICE. We keep in stock for sale all kinds of Woollen Goods, also COTTONS, SHIRTINGS, COTTONADES, KNITTED GOODS, ETC. and will sell as cheap as the cheapest.

Wool may be shipped to us by boat or rail, and on all lots of 100 pounds or over (if to be manufactured) we will pay freight to mill (does not apply to roll carding.) Parties sending wool should always put their name on the ticket, as we often get several parcels by sea train and find it hard to keep them straight unless owners name be there.

Also please bear in mind that we are determined to give satisfaction, and will use the best of the wool for our own trade, and will guarantee the best yarn this year that we have ever turned out.

Address WALLACE & Co., Woollen Mills, Lindsay. J. W. WALLACE, Manager.
