San Francisco Teamster's Recovery From a Broken Neck. (From the San Francisco Chronicle.)

About five months ago the daily press published a short item regarding a teamster named John Collery, who attempted to drive his team through a barn door, and in so doing had his head forced down on his breast until his neck was broken. Police Surgeon Stambaugh made an examination and that the spinal cord had been stretched nearly two inches. So serious was the injury that the reporters, after chronicling the incident under the head of fatal accidents, paid no further attention to the matter, and failed to inquire after Collery's condition, considering him dead and buried. A Chronicle reporter was therefore exceedingly surprised yesterday afternoon to meet the supposed corpse near the city prison looking remarkably well for a man with a broken neck. In a conversation which ensued, Mr. Cellery stated that he was almost as well as before the accident, a slight stiffness in his right side constituting his entire "unhealthiness." After his removal to his home Collery states that he was laid flat on his back with a sort of -It is generally supposed that a thick | fence about his neck and head, which kept him immovable for over two months. Both the body of the vertelræ and the arching luminm were discovered to be broken, and the operation of pinching the spinal cord where it had sugged between the ragged edges is described as one of the most difficult ever performed. For a month the patient lay on his back, completely paralyzed in one-half of his body, and with but little feeling in the other. If he moved in the slightest degree during the first fortnight he could plainly feel the search, gathered up everything, searched on being questioned confessed to having jagged edges of the bone grate together and content to lie on his hard bed without attempting to move a muscle for fear that the spinal cord should be crushed and his existence ended in a twinkling. The straightest position attainable was required, and to this end Dr. Stambaugh tion, it is always best to take an undertaker was compelled to refuse him a mattress, along. No one cares to have his body forcing him to lie on a wide plank.
