THE hat-makers of this country seem to take a fiendish delight in making the fashionable young man of the period look even more foolish than nature intended he should. The latest styles resemble an inverted saucer in size, and form more than a covering for the head, "Shoot the hatters."

Ask some men for an advertisement or som ; locals, they answer they do not believe in advertising-a paper is never read. Let a man be caught kiss ing a neighbor's wife, or trying to hold up the side of a building some dark night, and his tune changes instantly, and if the printing office is the garret of a seventeen-storey building he will climb to the top to beg the editor to keep quiet-don't publish it in your paper, you know.

A GENTLEMAN from Toronto, Mr. Ambrose White, who took up a large tract of land at Edmonton, Manitoba, last spring, returned on Monday to visit his friends. He stated that he regretted having settled at Edmonton, as living there was too costly. Coal oil cost \$2 and \$2.50 per gallon; bacon 22 cents per pound; tea, 60 to 70 cents; sugar, 30 to 33 cents; smoking and chewing tobacco, \$1; dried ap ples, 25 to 30 cents; and syrup, \$2.75 to \$3.50 per gallon.

THE London Truth says, "jewelled epaulets are the newest features of evening dress. The decoration assists the effect of square shoulder, to attain which has for some time been the principal aim of fashionable women. Epaulets, without sleeves, may appear an inconsistency to many, but fashion goes on her capricions way without troubling herself to what is consistent." Wishing to keep our lady friends posted upon all the latest fashions, the above item is published at the request of our juvenile, who will make a note of the first appearance of the "jewelled epaulets" as an inducement to wear

INGENIOUS INVENTION. -Some shrew Yankee has invented a key that will wind any watch; it is a neat attachment to a charm, and it is said to work like a charm. So does that grand Key to Health-Burdock Blood Bitters, the greatest discovery of the age. It unlocks all the secretions, and cleanses and invigorates the entire system. Sample bottles, 10 cents; large size, \$1.00 of all medicine dealers.

On the 19th of January, according to the Weather Review for that month, there was so much atmospheric electricity that the telegraph operator at Bismarck, Dakota, was able to use the wires without a battery. The current was so strong as to scorch the rnbber covering of the wire and fill the office with the fumes of burning compound. By placing the ends of the positive and negative wires together an electric light was produced which lighted the office. This phenomenon is rendered doubly interesting from the fact that the greatest auroral display of the month occurred on the 19th. At Bismarck the auroral display was observed from 6 p. m. until the following morning of the 20th.
