A level headed newspaper man comes down as follows:—we presume that some people think that newspaper men are persistent duns; let a farmer place himself in a similar business position and see if he would not do the same: Suppose he raise a crop of one thousand bushels of wheat, and his neighbour should come to buy a bushel, and the price was only the small sum of two dollars, or less, and the neighbour says, "I will pay you the sum in a very few days." As the farmer don't want to be small in the matter he says "all right." Another comes in the same way, until the whole of the one thousand bushels are gone out to one thousand and different persons, and not one of the purchasers concerns himself about it, for it is a small amount he owes the farmer and of course that could not help him any. He does not realize that the farmer has frittered away his crop of wheat in little dribbles, and that he is seriously embarrassed in his business because his debtors treat it as a little matter. But if all would pay him promptly, which they could as well as not, it would be a very large amount to the farmer and enable him to carry on his business without difficulty. The above comparison is too true of the difficulties that a newspaper man has to contend with.

THE Ontario Pressmen this season are arranging to go to the far west and Rocky Mountains of the Northern Pacific. The idea, is if possible to take the Canadian Pacific Railway Company's steamers, to some point on Lake Superior from which the Northern Pacific Railway can be reached easily. The trip will last about two weeks if matters are arranged as intended.

MANITOBA is rejoicing in the arrival of a new class of immigrants. These are none other than caterpillars, which, instead of destroying useful plants and vegetables, confine their attention to thistles. The subject is engaging the attention of inspectors of noxious weeds.

DR. McCORMON of Kincardine has been in town during the week visiting friends in this vicinity.
