A Beaverton Boy Abroad.

ASHLAND, June 30th, 1887.

Forty above zero and a good fire burning is a sample of the weather we are having this couple of days. Should the wind blow from the land, in a very few hours the thermometer would be getting 90 degrees in a bad corner. To use an exceedingly mild expression, it is changeable and is not productive of a very amiable state of mind or body; when a person has got his clothing thinned down to a 90 degree notch, to find that in the meantime the mercury has found a lodging place at about 40 degrees. I heard that in Duluth a few days ago the "Fahrenheit" got down to 32 degrees, if such was the case all I can say is thank goodness I don't live in Duluth, Ashland is enough for me. During my perambulations around this romantic(?) city I made the interesting discovery that with a population of almost 7000 people there is over 80 saloons, or about one for every 87 inhabitants, which would indicate the fact that the citizens of Ashland are troubled with an inward fire that stands an uncommon amount of quenching. These 80 saloon-keepers pay annually each, \$500 licence, and grow fat, sleek and aldermanic looking, upon the income besides. The larger portion of them are Germans, and all Germans have a peculiar talent in the beer line either as consumers or sellers. My knowledge of the "Deutch" language has only as yet extended to the familiar form of German greeting "Wehe Gaehts" literally "How goes it" (I am not quite certain that I have spelt that right but think it is not far out) as you might imagine when I and a German that can't speak English have a conversation, the greater part of it is made up of stops and pauses. The ignorance of American journals regarding Canadian affairs is really most intense. During O'Brien's visit Canada was honored with a more than ordinary amount of prominence. It his visit had no other effect, it at least had the one of advertising the country as every day during his visit all journals of prominence devoted several columns to the country, but if American opinion is formed from American journals that opinion must be a peculiar one indeed; the idea they will have will be that Canadians are ready to fire brick bats, eggs and stones at every stranger of prominence that comes into the country. The annexation question is discussed from the peculiar and purely American standpoint of not when Canada is ready to be annexed but when we are ready to let her improve her condition by joining this country. The idea that Canada might, by any possibility, object to the arrangement or like to have a say in the matter whatever, never seems to enter the heads of those large brained intelligent journalists. They may be perfectly sincere in their own view of the matter but their view won't exactly tally with that of Canadians in general. When the Canadian debt is paid is the millennial time fixed when Canada can present her population and fertile country to the Government of the United States, and for this privilege will have full freedom as American citizens, full freedom to carry revolvers in your hip pockets, free to open your saloons on Sunday, free to run your trains and places of business seven days in the week, free also to run street cars, theatres, newspapers and excursions on Sunday. Surely this is a country in which the much vaunted freedom threatens to prove a source of danger. Take for instance the case of Frank James, the noted murderer and desperado now a highly respected American citizen and lady's pet, surely there is something wrong with society that citizenizes and makes a pet of a foul murderer. I see that several of the Canadian Board of Trade have passed resolutions in favor of commercial reciprocity. It always has been and is now more than ever a mystery, why the greater portion of Canadian manufac-

tures need any protection at all. In Canada you have almost every advantage. In bar iron for instance there is a difference in the wholesale cost in Canada's favor of over 25 per cent. Labor is from 20 to 40 per cent. cheaper, living is cheaper, lumber and wood materials as cheap or cheaper, in fact a great portion is in her favor, and still she has to be coddled and petted without any very encouraging results. Nails can be bought wholesale here for about 75 cents per keg less than in Canada, which would indicate that the Canadian nail manufacturer with his combination and protection is making a very good thing out of it, of course where raw material has to come from this country it would make a difference, but I have an idea that a larger portion of Canadian raw materials comes from the old country. The glorious fourth will be here shortly when "Uncle Sam" will fire off more fizz-gigs, fire crackers and windy orations than you ever heard tell of before. Yours sincerely, M. C. C.

OUR NEIGHBORS.

Interesting Jottings From Other Places

Gamebridge Our annual picnic took place here last Friday and was attended by a large gathering. It was one of the most successful ever held here. Complaints are freely made of the strength of Gamebridge "cronk." The Scott Act is apparently a dead letter in this locality.

Orillia. Miss McKay teacher in one of the divisions of the Orillia Public School was at the close of the term the happy recipient of a beautiful whisk holder and whisk and the following address presented to her by her pupils:

DEAR MISS MCKAY:—Will you kindly accept this small token of affectionate regard from the pupils of your division, in remembrance of the kind interest you have always evinced in our welfare, and as a slight recognition of your painstaking and praiseworthy efforts to advance us in our studies. Hoping you may spend your well-earned vacation very enjoyably we remain your loving pupils, BESSIE WILKIE, FANNIE WILSON, MARY EDMONDSON, BLANCHIE COOPER.

Cannington.

A splendid garden party took place at the residence of Mr. Hugh Wilson, on Tuesday evening last. A large number of persons were present and everything passed off very successfully. The 34th Batt. band and the village string band contributed largely to the programme. Singing by the choir and others, recitations, &c., made up a pleasant evening.

We expect soon to have fun with our mill site owners over the lowering of the water. It is claimed that since draining off the water by opening the Leary dam, flat-lands have been exposed which are dangerous to the public health. The Board of Health now have the matter under consideration.

Our band under their new teacher are progressing rapidly and bid fair to become the first in the county at no distant day. They filled an engagement at Midland on the 1st and we learn have been engaged for an excursion from that town to Owen Sound to take place shortly.

There is no industry in this part of the country which can at all compare in enterprise and push with that of our village woollen mill under Messrs. Dobson & Sons. They are now engaged in the extensive manufacture of blankets and toboggan suitings for the French-Canadian market. Their first effort last winter proved very successful and their goods extremely popular in Montreal that they have gone very extensively into the manufacture of this line the present season. Messrs. Dobson are of the class of men whom this village should encourage if it is ever expected to become anything. We want employers of

labor as well as outlay of capital and something to bring local custom to the town. This Messrs. Dobson do, and an enormous general business is done with the surrounding country by their establishment certainly to the benefit of the village and we hope profit to themselves.

Building operations in this town continue as active as ever. The brick work of the new town hall is nearly completed and the roof is being put on the stores of Mr. McPhaden. Mr. Hoyle's cottages are also well under way.

Flashes Here And There.

The village of Sunderland has no less than 23 dress-makers—one for every other inhabitant.

Mrs. Hook, of Bowmanville, committed suicide recently by taking Paris Green.

L. S. Houck, an old resident of the township of Reach, died very suddenly last week. He ate a hearty meal shortly before his death. He has resided in Reach for over 60 years, and was much respected.

2,500 was the number of picnickers present at a recent rustication in Sutton.

A Sunderland cow committed suicide the other day by fixing her horns firmly in the ground, turning a somersault and breaking her neck.

A stranger walked off the "Pacific" on Georgian Bay last week, in his sleep, and all efforts failed to save his life.

Mr. R. Hayden of Alliston, had a curiosity in the shape of a four-legged chicken. Two legs were protruding from the region of the crop, and the other two were in the natural place. The bird and all its limbs were well formed. It only lived a short time.

Holloway's Pills and Ointment.—Soldiers and Sailors.—These well-known and easily used remedies are especially serviceable and convenient for those who, like soldiers and sailors are exposed to great changes of climate, and the hardships inseparable from their calling. Many of the diseases engendered in the system from these and other untoward causes can be checked and controlled by attention at their onset, and in Holloway's remedies will be found a ready means of relief, without hindrance from duty. Many a man is invalidated and rendered more or less a burden to himself and friends from neglect of the early symptoms of his complaint, which calamity might be averted by timely resort to the use of Holloway's Pills and Ointment.

Collingwood mill hands struck for 10 hours a day and succeeded in getting the time reduced from 11 hours to ten and a half.

A man was brought before a Lindsay Magistrate the other day on a warrant issued in 1884, charged with disorderly conduct and fined. It seems from this that a warrant never gets outlawed.

There is some talk of starting a daily paper in Lindsay. The population of the place is about 6000 and there are now two weeklies published there. These we think are enough.

In Brief, and to the Point.

Dyspepsia is dreadful. Disordered liver is misery. Indigestion is a foe to good nature. The human digestive apparatus is one of the most complicated and wonderful things in existence. It is easily put out of order. Greasy food, tough food, sloppy food, bad cookery, mental worry, late hours, irregular habits, and many other things which ought not to be, have made the American people a nation of dyspeptics. But Green's August Flower has done a wonderful work in reforming this sad business and making the American people so healthy that they can enjoy their meals and be happy. Remember:—No happiness without health. But Green's August Flower brings health and happiness to the dyspeptic. Ask your druggist for a bottle. Seventy-five cents.
