### Old-Fellows' Excursion.

The Odd-Fellows' excursion to Barrie on Friday last was a very enjoyable affair. The "Enterprise" of Barrie was chartered for the occasion and although the early morning was threatening rain a goodly crowd assembled for the trip. Fortunately the day turned out fine and dry a shower of only a few minutes duration occurring at Barrie. On the arrival of the boat a committee of the brethren of Barrie Lodge conducted the visitors to their beautiful lodge room, where the most careful attentions were paid them. After participating in the Old-Fellows procession, etc., the rest of the day was spent in viewing this handsome town. Leaving after the display of fireworks, the boat reached the wharf here about 2 a. m. after a pleasant run by moonlight across the lake. It is needless to add the excursionists enjoyed themselves immensely.

A long experience gives him a perfect knowledge of his profession and we have no doubt the public will accord to him a good support.

### From our Poetic Crank.

"I want to be an angel," sings the maiden in the choir; she pines for wings and thinks she'd like to twang a golden lyre. But if she'd note the costumes of maidens of to-day, she'd surely see that angels would never dress that way. For instance, take the bustles, such as you'll daily meet; now, wouldn't they look queer, if worn upon the golden street? And Saratoga waves and bangs, and false teeth and blonde; an angel, girls, with such affairs would surely ne'er be seen. So girls, if your in earnest you see you started wrong; and if you're not, why don't you quit, and sing some other song.

Mr. Neelands, Dentist, of Lindsay, will be at "Edwards' Hotel," Woodville, on Monday July 11th and at the "Hamilton House," Beaverton, on Tuesday July 12th. Don't fail to call.

### Perhaps So.

The male wasp, the naturalist tells us, never stings. But so long as he and his wife dress exactly alike this bit of knowledge availeth nothing to the careless man, who does not know it is the lady who is approaching him until it be that she smiteth him with her bustle. What humanity demands of science in the case of the wasp is the invention of some prompter method of distinguishing between Monsieur and Madamwazzio at 40 yards.
