The weather has been very warm and fine for the past few days. We hope it will continue so until after our fall show which takes place on the 10th inst.

**Personal.**—Mr. Angus Fairbairn and wife were in town on Tuesday. They promise to give us a concert when they return, a previous engagement hindering them from singing this time.

**Price of Grain.**—Woodville grain buyers are paying the highest price for grain outside city markets. To-day Fall wheat is being bought at \$1.10, Spring at the same price, while for barley as high as 59cts is being paid.

**Meeting.**—A meeting of the Directors of the United Counties Ploughing Match, is to be held here to-morrow evening to arrange all the preliminaries. We are informed that upwards of \$200 will be distributed in prizes. We sincerely hope it will be a success.

**Returned.**—Mr. G. B. Fotheringham has just returned from the Dominion Exhibition, held at Ottawa, highly pleased with the trip and the "big show." He reports the exhibition as splendid, tip top, but says that the number who visited was very small in comparison with Toronto.

**Are we to have a skating rink this winter?** If so, it is about time some move was being made in the matter. If some one of our enterprising villagers was to put up a covered rink we have no doubt that it would pay for itself before the winter is over. Will some one try the experiment?

**Dedicatory.**—The new Presbyterian church, in Cannington, will be dedicated to the worship of God, next Sabbath. It is expected that the Rev. Prof. Gregg will officiate. There will be no service held in the Woodville or Beaverton churches in the morning so as to enable the members of those congregations to attend the dedication. Services will be held in the evening as usual at 6:30.

**Those Sidewalks.**—At last! There are no doubt some who will not believe it, but it is a solemn fact—those sidewalks have been put in a very decent state of repair. For the last two or three days Mr. Andrew Morison has been patching them up, and as far as his material would allow he has made a good job of it. At any rate a person can go to the post office now without running the risk of breaking their neck. We don't know who is to thank for it—whether it is the Commissioners, the Pathmaster, Mr. Morrison or THE ADVOCATE, but we thank them, and so do our sisters, our cousins and our aunts. While we are on the subject we have something to say for the ladies. One of the gentle dames told us no later than Tuesday that in walking from the station, to our office she got so many burrs on her dress that it took her half a day to pull them off. Now this is really too bad. If our young men had any spirit about them they would get up a "bee" and cut down the burdocks that line the sidewalk from here to the station. Who will be the first to start it?

**Honey's Improved Fanning Mill!**

We desire to call the attention of the farming community to the above Fanning Mill now being manufactured at our works. It is an Established fact that the farmers of Ontario have in the past purchased largely of machinery which has been represented to them as perfect in every particular, and which too often proves utterly worthless, or unequal to the wants of the purchaser, but which he is compelled to retain against every desire or protest. This manner of dealing has been practiced in no class of implements more than in FANNING MILLS which the number of inferior mills now in use too clearly indicates. This objection, we desire to state, does not exist with us, on the contrary we are prepared to give

**A WRITTEN GUARANTEE that THE ABOVE MILL is ALL THAT is CLAIMED FOR IT**

To intending purchasers we would say, that Honey's Improved Fanning Mill is a perfect cleaner and chaffer. It will take out Wild Oats perfectly. It will take out ALL Cockle, Chess and other foul seeds, making a perfect sample of Market Wheat, and adds 5c to 8c per bushel to the value over and above that cleaned by any other Fanning Mill.

**IT IS A MOST PERFECT SEPARATOR,**

And will separate all the large kernels from the small and shrunken grains, and is warranted to make a perfect sample of Seed Wheat. It is very rapid in its action, and will easily make twenty-five bushels of seed wheat per hour. It separates all kinds of grain as well as seeds, and if Oats and Peas, or Timothy and Clover seed are mixed together and put through this Mill, they will come out perfectly separated. Every farmer can save the price of a Mill every year by saving the seed that collects on the barn floor and mangers, and putting it through this Mill. It will separate small and split Peas from large Peas, taking them from the chaff in the most perfect and speedy manner. A large number of these Mills have been sold to the most practical farmers of the country, who all declare, that for speed of work, and the perfect manner in which it is done, and the perfect adaptation of the screens to all kinds of Grain and Seeds, by which it is enabled to do a greater variety of work than any other Mill, that it is altogether
