

Editorial Dotes.

OUR youthful cotem, the Minden Echo, evidently finds things not just as they should in Haliburton, and is now waging vigor . is war with the County Registrar. If the 1 marks of the Echo are correct, and we do not believe our cotem would dare make such statements otherwise, it is certainly time the said Registrar were deposed. Too often unscrupulous and rapacious politicians are hoisted into positions for which they are totally unfitted, to reward them for services to the party, and just so often are the people made to bear an intolerable acoundrel and nuisance. The case in Haliburton is just such an one, the Registrar, it appears, has been foisted on the people for political services and not for any qualifications for the office he possesses, he does not even attempt to justify the position on other grounds, and following the usual routine of such cases he has made the best of his position, to disoblige all who might require his offices and at the same time to well line his pockets. Such is the case as presented by the Echo, which is now demanding his removal. If the case as stated by the Echo is but half as bad as represented, he is a disgrace to the County, and the people who will tamely tolerate such an official deserve to be duped. Hoist him out and all others of his lik.

THERE is some new move in political circles 't present to put an end to the advance of the Scott Act. Its victories have been so numerous during the past few months that the government are of the opinion the movement is only a specie of craze from which the people will awake before long, to find the awful mischief they have done, and so our paternal government must step in and an end is to be put to the Scott Act for the present, already several counties have been notified that their petitions are irregular,a shrewd way of shelving the movementthat further proceedings should be post poned until some changes have been made in the Act. It is not hard to see the cause of all this -the leaders of the liquor party in this Province held a meeting the other day in foronce, when it was decided to practically abandon the hopleless fight against the Scott Act in the Counties, where they secured to be spending their energies and money to no purpose; but they resolved to use the "sinews of war" to coerce the Dominion Parliament into nullifying or repealing the Act-certainly the Scott Act 1s proving a very embarasing affair to a large number of both parties, but their way of suppressing a great and popular movement will not work. The people of Canada know, in fact they have had ample time and expericuce to learn, that Prohibition would be a blessing to the country and they will have it. The question is not as yet a political one, but it is fast approaching that stage, when it is an absolute certainty that a complete prohibitory law is the only thing that will satisty.

THE other side of the Jamaica question is now coming to hand and if the voice of the Islanders as heard through the Kingston Greaner speaks the truth there will be an namense kick before an alliance with Canaada takes place. "It speaks of our "poor" wages, high taxation, railroad Igrabs and swindies, says it is adverse to feeding "Canadian suckers," and winds up with the declaration that "our people will decline with thanks any closer alliance, at least until our Canadian brothers reduce their in lebtedness and show enterprise."-It is evident that our West Indian brothers are behind the times, or perhaps they have not men to a full appreciation of the principle which makes our debt an indication of na tomal wealth.

No one who from the hights of Simla has looked down over the vast continent that stretches southward to Ceylon, and has contrasted the profound tranquility of its present peace with the anarchy, the bloods'ed, and the rapine, which were universal before our advout, can refrain from smiling meredoously at the timorours weaklings who fear that to hold the Nile for civiliza tion would prove too great a task for the refers of India. There are difficulties in Egypt, no doubt. to China. From the Hymalayas to Cape Comorin nearly three hundred millions of men, whose normal state for centuries had been one of fierce internecine feud, varied by the plundering raids of savage invaders, are now living as peacefully as if they were in Kent. Throughout the whole of that enormous area not a gun can be fired in war without our leave and to night in the remotest village any European may pitch his tent and sleep as securely as in a Yorkshire dale. And this administrative miracle is wrought daily, without visible strain of effort, by a European garrison, all told, of less than 100,000 men. - Pall Mall Gazette.

THE Monetary Times says "there is nothing in the future outlook of wheat to affect prices this year ; and low prices must almost certainly continue as the result of a superabundant if not unprecederted crop. Faraers are naturally isuspicious of advice tendered to them by out side parties to sell; but that advice may with a good conscience and without the ingredient [of a sinister motive, now be given. We are firmly convinced that the farmers have nothing to gain by holding back [their wheat; for though the prices is unprecedently low, there are good reasons why it has fallen to the present level,

THERE are several changes is regard to teachers' certificates which the profession would do well to note. The old regulation by which a teacher who taught three years prior to 1877 was exempted from attendance to a Normal School has been repealed. Roman history is put off the programme for second and third class certificates, and that of Canada put in its place. There are to be no options hereafter. Candidates* who passed the intermediate this year will be required to take the full course for third class next year.

Woodville Village Council.

The Village Council met in the Eldon House on October 24th 1884. Members all present except G. Campbell. Minutes of last meeting read and approved. George Smith Jr. presented his account for \$53.00, for plans of the village, which was ordered to be paid. Moved by Mr. McArthur, seconded by Mr. Degeer, that the resolution passed at last meeting of Council making the appropriations be rescinded and that instead o levying \$700. that the levy be \$901.76. including the school rate which was omitted Moved by Mr. Degeer, seconded by Mr. Grant, that Mr. Hugh Cameron be appoint. ed collector at a salary of \$5,00.-Carried. Moved by Mr. McArthur, seconded by Mr. Degeer, that the Reeve leave the chair and the council go into committee to pass bylaw No. 8, for making appropriations ; bylaw No. 9, for prevention of vice and other purposes; by-law No. 10, to provent animals running at large and duties of pound. keepers, and by-law No. 11, appointing a collector. J. C. GILCHRIST, Clerk.

Woodville School Board.

The fifth meeting of the Woodville School Board was held on Saturday 1st of Novem-Members all present except chairman Carmichael. Mr. James Morison appointed chairman. Minutes of last meeting read and confirmed. Mr. P. McIntyre, having been appointed auditor at last meeting for the section, moved by Mr Anderson, seconded by Mr. Grant, that Mr. J. C. Gilchrist be appointed auditor of school accounts, on behalf of the board for the current year. - Carried. After conferring with the present affable, painstaking and efficient staff of teachers the board found that they were willing to serve for another term, provided an addition of \$25.00 was made to salaries paid each respectively, The Boar I beliving that the section generally would like to retain their services, even if the trifling advance asked had to be conceeded, it was moved by Mr. Cameron, seconded by Mr. Anderson, that Mr. L Gilchrist and Miss Annie Pattyson be reengaged as teachers for 1885, the former at \$525.00. and the latter at \$275.00, paid quarterly. Carried. Complaint was made to the Board that the caretaker did not attend to sweeping as often as they should, Mr. Wm. Cameron was instructed to call attention of said official to direlection of duty in said matter and advise and instruct them particularly regarding the disposal of ashes. The matter of splitting and piling wood, together with fixing and cleaning of stove pipes, was intrusted to the Secretary with instructions to have the same attended to at Adjourned to meet at call of chair-A. Holloway's Ointment and Pills. - Colds, Coughs, Shortness of Breath .- These maladies require early and unremitting attention, for if neglected they often end in asthma, bronchitis, or consumption. The Cintment well rubbed upon the chest and back, penetrating the skin, is absorbed and carried directly to the lungs, whence it expels all imparities. All the blood in the body is perpetually passing through the lungs, and where all noxious particles tending to disease can be quickly, thoroughly and permanently neuteralized, rendered narmless, or ejected from the system. Holloway's Ointment and Pills persectly accomplish this parification; and through the blood thus cleansed, the influences of the wonderful medicaments reaches the remotest parts of the human pody, and thus cured all diseased action, whether internal or external.

A CONTEMPORARY speaks of advertising as a fine art, which is not improved by the commercial public as far as it might be. To say that one sells "the best and the cheapest" is one way, but it is not novel, and is often open to suspicion. Then there is almost as much art in the displaying of an advertisement when it is thought out and written correctly and effectively. Many excellent ones are rendered of but little use on account of the poor form and display given them. Advertisements are like men, those with anything in them work to the front, and the weaklings go to the wall, though it not frequently happens that a good internally as well as sartorially. Facts That Should Be Known.

An Opinion and its Basis.

Dr. Maloun, a French physician, is said to be so fond of drugging the sick, that when one of his patients had swallowed a dozen or two of his prescriptions without wincing, he seized the poor victum's hand, in an estacy of admiration, exclaming, "My dear sir, it really affords me pleasure to attent you-you deserve to be ill." The remedial system of Holloway, with whose fame all the world is ringing, is in beautiful contrast with this wholesale indiscriminating use of the materia medica. It comprehends only two preparations, but they would seem to include the autidotes for nearly all maladies. As a case in point (for we cannot discuss so vast a subject in a couple of paragraphs), we may instance the extraordinary success of Holloway's Pills in disorders of the Liver and Stomach. These complaints, we are informed by medical men, have great ly extended their ravages of late years, and assumed a most malignant form. Be that as it may, there can be now doubt that such disorders prevail in every section of the country at this sesson, and that they baffle the skill of our most eminent medical men. One of their worst features is that they paralize industry at the busiest seasons of the year, and, if not fatal of themselves, lay the foundation of many serious disorders. A remedy, therefore, that will at once break the chill and restore the energy of the patient, and correct the liver and stomach, must be of inappreciable value in our agricultural districts. Friends upon whom we can rely, and who had full opportunities to form a correct judgement, inform us that Holloway's Pills are a positive specific for such complaints. They have been tried in the rice fields and cotton plantations of the South, in the valleys of the Ohio and Mississippi, on the unhealthy banks of the Red River, on the western prairies, and among the canebreaks and swamps of Louisiana and Texas, with the same happy results and multitudes who have heretofore trusted to dangerous curatives, and found them of little or no use, now rely entirely upon this powerful yet harmless vogetable remedy. We state these facts, derived from com-

petent sources, as matters of general interest .- Atlas.

AYER'S

No other complaints are so insidious in their attack as those affecting the throat and lunge: none so trifled with by the majority of sufferers. The ordinary cough or cold, resulting perhaps from a trifling or unconscious exposure, is often but the beginning of a fatal sickness. AYER'S CHERRY PECTORAL has well proven its efficacy in a forty years' fight with throat and lung diseases, and should be taken in all cases without delay.

A Terrible Cough Cured. "In 1857 I took a severe cold, which affected my lungs. I had a terrible cough, and passed night after night without sleep. The doctors gave me up. I tried AYER'S CHERRY PECTORAL, which relieved my lungs, induced sleep, and afforded me the rest necessary for the recovery of my strength. By the continued use of the PECTORAL a permanent cure was effected. I am now 62 years old, hale and hearty, and am satisfied your CHERRY PECTORAL saved me. HORACE FAIRBROTHEB."

Croup. - A Mother's Tribute. "While in the country last winter my little boy, three years old, was taken ill with croup; it seemed as if he would die from strangulation. One of the family suggested the use of AYER'S CHERRY PECTORAL, a bettle of which was always kept in the house. This was tried in small and frequent doses, and to our delight in less than half an a our the little patient was breathing easily. The doctor said that the CHERRY PECTORAL had saved my darling's life. Can you wonder at our gratitude? Sincerely yours,

MRS. EMMA GEDNEY."
