

THERE is no reason why glasses should not be comfortable to wear, becoming and beneficial, at the same time. It all depends on the selection of the lenses and the fitting of the frames. If you come to us, we guarantee to give you the right kind of lenses for your eyes, set in the right kind of frames for your face.

Mr. R. T. Morgan has taken an advanced optical course and is prepared to give perfect satisfaction.

PEOPLE RECOVERING

From Pneumonia, Typhoid or Scarlet Fever, Diphtheria, La Grippe or any Serious Sickness

Require the Nerve Tonic, Blood Enriching, Heart Sustaining Action of Milburn's Heart and Nerve Pills.

It is well known that after any serious illness the heart and nerves are extremely weak and the blood greatly impoverished. For these conditions there is no remedy equals Milburn's Heart and Nerve Pills. It restores all the vital forces of the body which disease has impaired and weakened.

Mr. T. Barnicot, Aylmer, Ont., says:— "About a year ago I had a severe attack of La Grippe which left my system in an exhausted condition. I could not regain strength and was very nervous and sleepless at night, and got up in the morning as tired as when I went to bed. "I had no energy and was in a miserable state of health. "Milburn's Heart and Nerve Pills, which I got at Richard's Drug Store here, changed me from a condition of misery to good health. They built up my system, strengthened my nerves, restored brisk circulation of my blood, and made a new man of me. "I heartily recommend them to any one suffering from the after effects of Grippe, or any other severe illness."

SHALL WE HAVE A SUGAR BEET INDUSTRY

A Live Question That is Receiving Consideration from the Legislature.

One document considered by the Finance Committee of the county council at its last session was a circular from the Beet Sugar Association, asking council to recommend a bounty on the manufacture of beet sugar. Our readers will remember reference to it in our report. It said that sugar beets sometimes paid as high as \$120 an acre; and that there was capital ready to take hold of manufacturing as soon as a bounty is granted to tide over the loss likely in the early years of operation before the production of beets got at all general. Council refused to advise the bounty, but the sugar beet question is a live one. On Thursday of last week a strong deputation waited on the legislature, asking for at least \$100,000 in bonus. The News says of it:

A Deputation. A deputation representing the Beet Sugar Association waited on the Ontario government, accompanied by several members of the legislature. They desired the government to assist this important industry by a bonus, and to that end a number of speeches were made lasting nearly two hours. A resolution passed at a recent meeting of the association was presented to the members of the government. It showed that 300,000,000 pounds of sugar were used in Canada yearly, and all of it had to be imported. If Canada could supply its own demand it would be an important addition to the country's industries.

John Parry, president of the association, read the resolution passed by his own association and also resolutions passed by the Boards of Trade of Toronto and London favoring the giving of government aid to beet sugar growing. Both bodies recommended the establishment of a bounty to manufacturers of the refined article. The Toronto Board of Trade thought that \$100,000 a year would be sufficient. A number of other resolutions of similar import were read. Ald. Parnell of London said that sugar beets grown in Canada had been profitably sold in the United States after paying a United States customs duty of one dollar per ton. It was evident that the farmer would greatly benefit by the establishment of a sugar refinery.

E. E. Miller of Warton said that Ontario farmers could not compete with the great wheat-growing areas of the West in the growing of that cereal and they must turn to some other branch of agriculture. The most profitable one open, he thought, was the cultivation of sugar beet. The value of land adjacent to sugar factories in other countries had advanced as much as 25 per cent. in a few years.

T. A. G. Gordon of Alvinston represented the farmers of East Lambton. They had passed a resolution asking the government to grant aid to the establishment of sugar manufactories. Mr. Ross stated in reply that as the income of the province was limited there would be difficulties. However a considerable sum of money—but probably less than \$100,000—would likely be granted at the present session. At all events the interests of the farmers would be protected and if necessary advanced.

Is it Overdone Now? An editorial on the industry appeared in a recent issue of the Weekly Sun. Toronto, a good authority on agriculture. It says:

In considering the advisability of establishing a beet sugar industry in Canada the danger of over-production must always be kept in mind. This seems to be a very serious danger indeed, because not only is the beet sugar industry receiving attention on this continent, but all over the world Spain is turning in this direction. "Since the West Indian colonies were lost," says a United States Consular report from Spain, "the production of beet sugar in Spain has almost monopolized the attention of Spanish agriculturists. Large capital has been subscribed for the purpose of cultivating beets on an extensive scale and of erecting sugar mills throughout the country. The result has already been a considerable over-production, and a consequent uneasy feeling in the trade. During last year about 79,000 tons of sugar were produced in Spain, 30,000 tons of which were contributed by 22 cane-sugar mills, and 49,000 tons formed the output of 26 beet-sugar works, only 16 of which were completed in time to avail themselves of the entire crop. Twenty-two more beet-sugar mills are now either built or building; of these 16 will work this season's crop and the others will be ready by next year. The total number of beet-sugar mills in Spain will then be 48. At a meeting of the manufacturers held recently, it was stated that the beet-sugar mills at-

ready working and those in course of construction will represent a daily capacity of 16,000 tons, which, if one hundred days be taken as the average duration of the season, and the proportion of sugar extracted be calculated at over 10 per cent., would mean an output of 160,000 tons of sugar, or rather more than double the actual requirements for home consumption." Three years ago Spain imported 748,724 pounds of sugar.

Another United States Consular report dated from Cobourg, Germany, tells of world-wide activity in the same line. "On account of so many countries having turned their attention to the cultivation of beets for sugar, the markets of the world are," says this report, "becoming glutted. The European producing lands are Germany, Austria, Russia, France, Belgium, Holland, Sweden, Denmark, Servia, Bulgaria, Roumania, Switzerland, Italy, Greece and Spain. Persia is just entering the field; Egypt is realizing that her soil is adapted to the cultivation of the beet; the United States is pressing them all, with Argentina and Chile trying to follow in her footsteps."

A TREASURE OF CANADIAN VERSE

One of the Few Collections of Canadian Poetry Reviewed.

E. A. Hardy, B. A. Sometime ago Mr. E. A. Hardy, B. A. contributed a review of a most interesting Canadian book, to the Globe. Herewith are leading paragraphs:—

There are ways of judging a nation's growth other than the material. Tall chimneys, heaps of glittering gold, shining lines of steel interlocking provinces into a nation, the wondrous output of forest, mine and sea, vast stores of agricultural wealth, all these and more Canada has to her credit, and no man is so bold as to prophesy her place in wealth and power a generation hence. Yet these alone would not constitute a permanent claim to greatness. Side by side with this material advancement, often preceding it, has gone the political, educational and religious development of Canada. Today every Canadian is as proud of his institutions, his schools and his churches as he is of the great wealth in the farm, forest, sea and mine of his magnificent country.

All this, however, could not satisfy the true Canadian. He feels keenly the spirit of the land. Her fields, her woods, her lakes and rivers and mountains, the freedom in her very atmosphere, permeates his being with their influence, and stirring at his heart, demand appreciation and expression. And not in vain. Volumes of verse and prose constantly issue from our press, revealing the presence of a strong literary feeling, while our painters and sculptors cultivate their arts with very considerable success. The recognition of this literature is forced upon us by the recent issue of "A Treasury of Canadian Verse," a volume which no thoughtful Canadian can overlook.

In the "Treasury of Canadian Verse" alone appear over 60 names, the chief being J. W. Bengough, Jean Blewett, A. B. DeMille, Jas. A. Miller, W. H. Drummond, R. H. Kernigan, (The Khan), Stuart Livingstone, Gilbert Parker, T. H. Rand, Lyman Smith, Philips Stewart, A. J. Stringer, Miss Wetherald, Bernard McEvoy, Thos. O'Hagan, W. P. Mackenzie.

"Though we miss here and there a favorite poem, we cannot help feeling that the editor's taste has been true, that his touchstone has not proven false to him. Here is a book we may place in the hands of the American scholar and his English confrere with no misgivings. Poetry true, sweet and dignified fills this book, and if we have no Shakespeare, Milton Browning or Tennyson we certainly have a body of verse whose whose purity of thought and charm of expression give us present pleasure and promise of something greater.

A pathetic interest is attached to this book. Possibly no man in Canada was better fitted by reason of purity and breadth of taste, wideness of reading, personal acquaintance with Canadian life, and Canadian authors, and loftiness of ideal, to edit an anthology of Canadian verse than Dr. Rand. This was his magnum opus, that should bring him renown, if not fortune. He had enjoyed his labors, and was eagerly looking forward to the critical reviews in Canada, United States and the motherland. His sudden death takes added pathos from these aspirations, and deprives us of one of Canada's most gifted sons. His record in the educational field in New Brunswick and Ontario, his volume of verse, "The Basin of Minas," and this fine anthology, will preserve his memory in the land he loved and served so well.

LA GRIPPE'S RAVAGES.

A Campden Lady Cured of its After Effects.

SHE WAS LEFT WEAK AND RUN DOWN, AND UNABLE TO REGAIN HER STRENGTH UNTIL SHE USED DR. WILLIAMS' PINK PILLS.

In the village of Campden, Ont., and throughout the surrounding country, there are few people better known or more highly esteemed than Mr. and Mrs. Daniel Albright. Mr. Albright has for many years filled the position of village postmaster, in addition to conducting a boot and shoe business. But it is with the postmaster's estimable wife that this article has chiefly to do, as it gives, practically in her own words, the particulars of her recovery from a severe illness through the use of Dr. Williams' Pink Pills. To a reporter who asked Mrs. Albright if she would consent to give the particulars of her illness and cure for publication, she said: "If you think my experience will help some other sufferer I am quite willing to give it, for I may tell you that I am a very enthusiastic admirer of Dr. Williams' Pink Pills. For some years prior to the winter of 1898 I suffered with a lame back, which frequently prevented me from doing my household work. Later exposure to cold developed sciatica, and every movement of the body caused intense pain. In this way passed gloomy days and restless nights, until the winter of 1898, when my trouble was aggravated by an attack of la grippe. The first and most severe symptoms of this trouble passed away, but it left me in a weak and depressed condition. I did not appear to be able to recover my strength; my appetite was very fickle; I was extremely nervous, and my heart would palpitate painfully at the least exertion. I had been under a doctor's care, but did not recover my strength, and as a consequence I was much depressed in spirits. At this juncture a friend who called upon me advised me to try Dr. Williams' Pink Pills, and I decided to follow the advice and procure a supply. To my gratification I felt an improvement in my condition almost from the outset, and after using the pills for a little over a month I was once more enjoying the best of health, every trace of the trouble that had afflicted me having disappeared. It is nearly three years since I used the pills and I have been well and strong ever since, and I have the best of reasons for ascribing my present good health to the use of Dr. Williams' Pink Pills.

Dr. Williams' Pink Pills are a tonic and not a purgative medicine. They enrich the blood from the first dose to the last and thus bring health and strength to every organ in the body. The genuine pills are sold only in boxes with the full name, "Dr. Williams' Pink Pills for Pale People," printed on the wrapper. If your dealer cannot supply you send direct to the Dr. Williams' Medicine Co., Brockville, Ont., and the pills will be mailed post paid at 50 cents a box, or six boxes for \$2.50.

Fairview Shropshires

Last week ten very fine imported ewes were sent to Mr. F. W. Morgan of Chicago for his farm in Wisconsin. Since the International Exposition Mr. Morgan ordered a few ewes from several breeders, including four from John Campbell.

Repeating his order for a larger number in so short a time, and asking to have a carload of choice Canadian bred ewes looked up for summer delivery indicates the estimation Mr. Morgan has of the Fairview Shropshires, compared with his purchases out of other flocks.

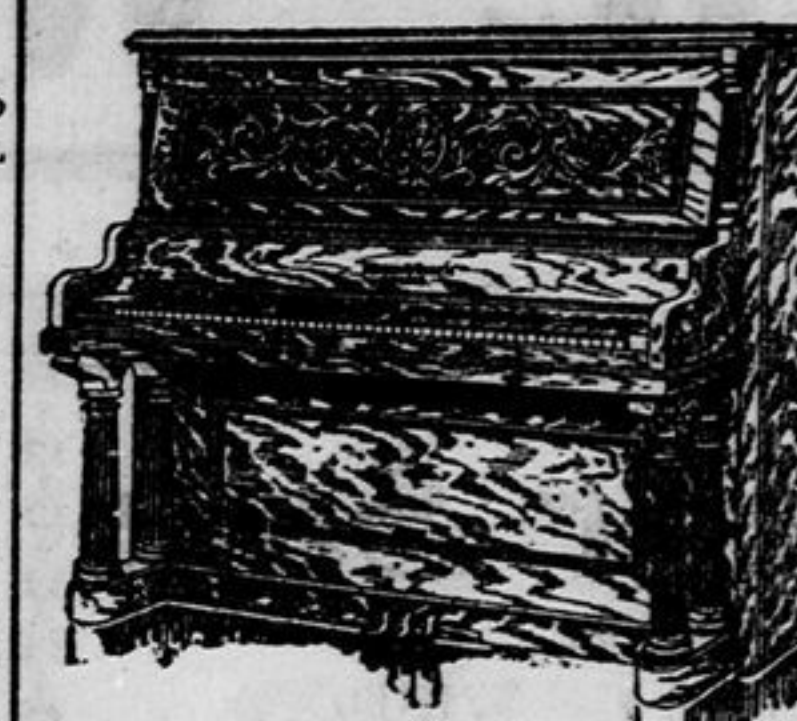

Six grade lambs were sent to the Minnesota Experimental Station, where they will be fitted for State Agricultural Station competitions. Those shipments clear out all surplus sheep on the farm for some months to come.

Recently several orders for home-fitted show flocks for exhibiting at State fairs had to be refused, as the only order which can be properly attended to was booked at Chicago last December.

Well-bred Shropshires of good quality are in excellent demand, but the inferior ones have to go begging a market. The owner of the Fairview flock may be well satisfied with the past year's record. Winning at the International, Chicago, five championships and at the Winter Fair, Guelph, Ont., sweepstakes for best mutton carcasses in the show, with a large majority of all the best prizes offered at the fall fairs, all totalling to over \$1300, tells the tale.
