It is also gratifying to lative proposition was slightly less, and with some regard to its instant treasurer and of keeper of de b' tice in their report as follows: "We beg to express our appreciation of the careful and correct manner in which your Manager discharges his \$4,383,065. The Paid up Capital various duties, the practice of calculating exactly the various items of now stands at \$3,000,000, with a accrued interest both receivable and payable which has been followed in Reserve Fund of \$3,500,000, and a this as well as in former years, although it entails a very considerable amount of work upon the office staff, is, in our opinion, a much more satamount of work upon the omce stan, is, in our opinion, a much more satisfactory method of preparing a balance sheet than merely estimating Account of \$250,000—a most favorise such that if war broke out each ed the brother as he stepped on his these accounts as is sometimes done by financial institutions similar to able showing, and one which should division would be ready for instant own feet and appeared ill at ease.

this." The foregoing is characteristic of our Manager in all his duties, commend itself to the public, and movement, and would find itself with "You has dun dis, sah: You has posits and debentures just as well as half the amount, and it should have it. I may say that our four percent debentures, interest payeble every half-year, are among the most satisfactory securities on the market and are absolutely secured by investments on improved real estate and other equally good securities. As a large portion of the public must use some organization that will accumulate their holdings and invest same to the best advantage, why not use the local Company, in a still greater degree, and thus help to build up our own institutions and re-

tain in our midst, the profits of our own money. Mr. McLaughlin in seconding the adoption of the report, spoke in substance as follows:

It is now ten years since the company was established and I notice that in that time \$52.781.84. has been paid to the shareholders in dividends and \$46,921.90 in interest on borrowed capital, making a total of about \$100,000.00 distributed in the immediate locality.

In addition to this \$22,500.00 was placed to the credit of Reserve Fund, thus giving an added security to depositors and debenture holders. & While the company earns and could pay a higher rate of nividend, it is the policy and primary idea to make safety the first consideration and to build up a Company that will be invulnerable to any depression or fi-CONTRACTOR OF THE PARTY OF THE

confidence of the schole investing public.

Would it not be eminently more satisfactory and profitable to the England; but not, as his interlocupeople of this county to invest their money with men of known ability tor suggests, for a generation, but and honesty and receive a reasonable interest thereon, than to place it only for ten years. A nation in revwith strangers going through the county with all kinds of "wildcat" and olution, as history teaches, usually questionable investments which offer a high rate of interest, but disap- ends by throwing up a great soldier
