MR. FRANK WALTERS, OF EXETER, TELLS OF SUFFERING AND HOW DR. WILLIAMS' PINK PILLS CURED HIM AFTER OTHER MEDICINES FAILED.

From the Advocate, Fxeter.

Mr. Frank Walters is a young man personally known to most of the residents of Exeter, where he has lived nearly all his life. Talking with the editor of the Advocate recently Mr. Walters said :-"In justice to Dr. Williams' Pink Pills I think it my duty, in view of what they have done for me, to add my testimonial to the thousands of others that have been printed. For some months I suffered most severely from pains coursing up and these pains were due to liver and kidney trouble, but whatever the cause they frequently left me in terrible agony. The pains were not always confined to the back, but would shift to other parts of the body. As a result I got little rest, my appetite became impaired, and I fell off greatly in weight. I tried different remedies suggested by friends, which having no effect almost disgusted me with medi-A woman sits in a cheerless home with cine. CHOOSING A GOOD BREED OF CHICKENS

Leghorns make excellent young boilers, but are not in great demand as such. As roasters they are a failure. Minorcas are larger than Leghorns, but are not in great demand because of their white skin and black legs. This is simply a prejudice of market men and buyers, but nevertheless it works against the breed.

country; hence, we must breed for this demand, if we wish to make ready sales. There are just too breeds which fill the bill as all-round money-making fowls. They are the Plymouth Rocks and Wyandottes. The former are divided into three popular varieties, Barred, White and Buff. The latter into White, Silver, Golden and Buff. As to choice of these, it is a matter of fancy. They are like, according to the breed. The Plymouth Rocks are a trifle better layers, in my opinion, but the difference is not material.

Both breeds are hardy, easily kept and good foragers. They require good average care, but do best with the hest of care. The chicks grow rapidly and evenly; the latter is a good consideration. The pullets lay almost immediately as maturity, which cannot be said of many breeds. Their eggs hatch well in incubators or under hens of the same breed. They are good mothers; the'r chicks thrive wonderfully in artificial brooders. 'These are they that have washed their They make the best of broilers, and cannot be surpassed as roasters. Either breed will stand all climates.

Their general popularity throughout the country is their greatest recommendation and once their natures are understood, they prove the best two money-making breeds .- E. O. Roessle, in the Country

The year 1899 was a great year for the old firm of Heintzman & Co.—a record breaker in their half century history of piano making.

The early months of the new year have established the fact that 1900 will out-record 1899, for, with continued good times, people are not satisfied with a cheap piano. They want the best, and now the Heintzman & Co. comes to the front and shares as a high-class instrument in the good times.

The Heintzman & Co. has grand-parents, parents and children. It Frequently Due To Sluggish is not an unusual thing to find one generation following another and being satisfied with nothing less than a Heintzman & Co. piano. To quote Shakespeare, the Heintzman & Co. piano is "rich in its friends."
