TREACHEROUS PEAT BOGS.

A Growsome Tradition About the Battle of Solway.

There is an ancient and growsome tradition connected with the story of the battle of Solway. This battle was fought on the "debatable" borderland between England and Scotland in the year 1542. A troop of horsemen heavily mounted and heavily armed was put to rout. In the nature of their flight they trod upon a bog which was soft and spongy and they were swallowed and their horses and armor and arms and armor. To support this tradition more than 200 years later, at the end of the eighteenth century, a digger of peat came upon one of the troops—a man and his horse, both in complete armor and preserved from total decay by the antiseptic qualities of the peat. Another story of that peat bog of the Solway frith is that in November, 1771, the bog, saturated with the moisture of heavy rains, rose, swelled and burst like a torrent, sweeping along with it trees and houses and destroying thirty many villages.

Many thousands of acres of peat are found in the north German lowland. In Ireland estimates place the lowland bog area at 1,254,000 acres. Russia is said to have 5,700 square miles of peat. Several million acres are in Norway and Sweden. France and Holland. The United States and Canada also have extensive tracts. Peat has been used by artisans for ages in the manufacture of tools. By burning peat the old steel workers produced the finest grades of iron and steel on account of the intensity of the heat produced and the absence of anything detrimental to the metal. The elastic and keen Damascus swords are believed to have been made by the use of peat.

Peat itself is the product which results from the partial decay of vegetable material—mosses and other marsh plants—which grows and dies in boggy places where the water stands. It is chiefly composed of sphagnum, or bog moss. This moss has peculiarly absorptive properties owing to the cuplike arrangement of its parts, which take up and hold water like sponges. Sphagnum continues to grow after its roots have become detached from the ground. These two qualities explain why bogs occasionally slide from their old beds.

Burial Armor and Shrouds.
The custom of sewing up a corpse in flannel originated doubtless in the act of parliament, 18 and 19 Charles II., which was passed for the encouragement of the woollen trade and required all bodies to be buried in woollen shrouds. Two amending statutes were passed—1673 and 1680—requiring that the funeral an affidavit be delivered to the priest stating that the requirements of the law had been carried out; otherwise penalties were incurred. These acts were repealed by 54 George III., although long before that time the penalties for non-compliance with the law had ceased to be enforced. During the operation of the acts for burying in shrouds the law was sometimes evaded by covering the corpse with hay or flowers, notification of which is sometimes met with in the parish registers.

Burial in armor was not at all un- lauded in the middle ages and was considered a most honorable form of burial. Sir Walter Scott in "The Lay of the Last Minstrel" thus refers to it:
Somed all on fire that chapel proud,
Where Roslin's chiefs uncoffined lie,
Each baron for a sable shroud
Shrouded in his iron panoply.
—Westminster Gazette.

Barely Missed.
"I came near getting that appointment," he said.
"How near?"
"It got a disappointment."—Exchange.

"It is a miserable thing to live in suspense. It is the life of a spider."—Swift.

CANADIAN DIRECTORS

HON. GEO. A. COX AND MR. FRED NICHOLS, HAVE 28 EACH.

Mr. Goldwin Smith, who first responded to the toast of "Canada and its Lawmakers," at the Canadian Press Association banquet on Feb. 1, was given a hearty reception. He indulged in some pleasant reminiscences of his sixty years' connection with journalism, thirty of which were in Canada, and referred to the great changes in that period, in bringing which about the daily press has played an important part. "I heard it said the other day," he said, "that the stump was more powerful than the press. The stump is powerful when a great man is speaking, but it is intermittent; the press is constant."

A more serious question was, what is behind the scenes? Could the press preserve its independence? "I do not expect it to preserve its independence of party, so long as party is the ruler. All I should expect of the editor of a political paper is to be fair. He is an advocate, and so long as he is, it is fair the court has no reason to complain. It is a hard thing to preserve independence. We are no longer afraid of the frown of kings, but we have great reason to be afraid of the influence of millionaires, and we have also great reason to be afraid of the influence of popular passion. You may stand up against a gust of popular passion and lose half your circulation. You turn out to be right and they hate you all the worse after all."

"Gentlemen, you have a great task before you, if you are to change the coming change in politics, because democracy is really on its trial, and you have to say whether faction and demagoguery can rule the world."

No Real Canadian Literature!
By-stander. Mr. Goldwin Smith, in the Weekly Star, Canadian literature is disparaged by comparison with the literature of the United States and England. There is in reality no such thing as Canadian literature; there is only the literature of Ontario. Hardly anything gets from this province into the Great West. The Northwest is taken up with raising wheat, and when it gets time to read it will probably go to its literature to the neighboring States, whom which the bulk of its population will probably be coming to the literature of Ontario, taken as it ought to be by itself, will fairly compare with that of any ordinary state of the Union, though not with that of Massachusetts. Besides the narrowness of its field, it is under the disadvantage of having to grow beneath the shadow of the parental tree. To have a national literature you must be in the full sense a nation.

SECOND RHODES' SCHOLAR.

Honor Goes to R. C. Reade Who Has An Excellent Record at the Provincial University.

Robert Cyrus Reade, B. A. '05, of Toronto, has been selected by the University of Toronto to hold the second Rhodes' scholarship open to a nominee of the provincial university. Mr. Reade will join Mr. E. R. Paterson, the Toronto Rhodes' scholar nominated in 1904, at Oxford next October.

There were eight candidates for the coveted scholarship, which of the value of £500 per annum, and is tenable for three years. All the candidates were men of exceptional ability and strength of character. Mr. Reade's nomination is a recognition of merit that will be acceptable to all the students of the university.

It is further noted that he was in St. John, N. B., but the last 17 years of his life have been spent in Toronto. He attended the Jarvis street and Harbord street Collegiate and Woodstock College, entering the university in 1890. He was a member of the varsity in the Mulock scholarship in classics. In his first year he won the Mulock scholarship in classics, and stood first in the department of English and history. In his second year he also won first-class honors in classics and in English and history, being awarded the Mulock Scholarship. In his third and fourth years he obtained first-class honors in classics. His record of scholarship is, therefore, a very high one.

But the Rhodes' scholarship is granted not only on the condition of excellence in scholarship. Regard is also had to literary attainments, to fondness for and success in many outdoor sports, to qualities of manhood, truth, courage, devotion to duty, kindness, unselfishness, and to ability to attain leadership among men. In all these particulars Mr. Reade was able to show a clean record. In sports he has taken a prominent part at the university. He was a member of the winning Mulock Rugby team and of the Varsity III team. He also played on the '05 hockey team. In cricket he was a member of the varsity cricket team. No other bowler in Canada can boast of as high an aggregate in first-class Canadian cricket.

He has also displayed good literary ability, having a very light touch and a fine taste. At present he is connected with the editorial department of Saturday Night.

He is a member of the Delta Upsilon Fraternity. His father is at present residing in Ottawa.

Next October the University of Toronto will have three graduates at Oxford, namely Messrs. Paterson and Reade, the Rhodes' scholars, and Mr. S. S. Cummer, the holder of the J. W. Flavell scholarships. From now on it is expected that the provincial university will always be represented by three scholarship men at the great English university.

Railways Considering Idea of Making New Arrangements Re Sleeper Berths.

Railways are seriously considering the advisability of entering an agreement by which the travelling public will either have to pay for their berths in sleepers by 5 o'clock in the afternoon of the day they purpose taking a sleeper, or forfeit reservations. It is contended that many people make reservations over the wire or at ticket offices for a certain night, and under the present arrangements such berths are held until the train starts out, but these people do not inform the companies of their change of plans, but keep the berths reserved until the train leaves. Then the berths are empty and the companies are minus the money they should bring.

It is further claimed that the sleepers are run at a great cost and that even though berths are sold to persons who happen to be on a train looking for a berth after it has started, yet the inconvenience to the roads and to the travelling public is so great that a reform ought to be introduced. If people notified agents of railroads when they decide not to use berths reserved for them, then they could be sold to others who are anxious to get them, but now persons allow berths to be held up to the last moment just as though they were paid for. This is said to cause trouble and loss which much soon be remedied. It is which much soon be remedied. It is which much soon be remedied.

It is which much soon be remedied. It is which much soon be remedied. It is which much soon be remedied.

WANTED

GOOD GENERAL HOUSE SERVANT WANTED—Apply to MRS. GEO. W. BEALL, Lindsay—7-4.

For further particulars apply to JAMES KENNEDY, Reaboro, Ont.—8-3.

Interesting Statistics As to Canadians Who Are Active in the Conduct of This Country's Commercial Affairs—One Hundred and Forty Individuals Who Occupy Seats on the Directorates of Corporations.

From Mr. W. R. Houston's "Directory of Directors in Canada," just off the press, is compiled some interesting statistics as to those Canadians most active in the conduct of this country's commercial affairs. Its pages show no less than 140 individuals who occupy seats on the directorates of five or more commercial and financial corporations. Some of them sit on 11, 12 or 13 boards, and two of our prominent financiers appear on no less than 23 directorates.

Hon. Geo. A. Cox and Mr. Frederic Nicholls tie for first place. Each of these two gentlemen is a director of 28 companies.

Sir Henry Pellatt and Mr. Robert Jaffray come next, with 21 companies to the credit of each.

Sir Wm. Van Horne is third, sitting on 20 boards.

Col. Henshaw of Montreal is a director of 19 corporations, and Mr. E. B. Oser, M. P. of 17. Mr. Wm. Mackenzie, Sir H. Montague Allan, Mr. H. S. Holt, Hon. Robert McKay, Mr. James Ross (the last of the Bank of Montreal), hold 16 seats. Mr. W. Matthews of Toronto, boasts 15 directorships, and Hon. J. D. Rolland, of Montreal, and Mr. J. W. Flavell of Toronto, has the unlucky number 13 to his credit, but this does not seem to worry him. In an even dozen is the number of seats held by Mr. W. R. Brock, and four Montreal gentlemen are even with him. Lord Strathcona, Mr. Thos. Long, Toronto, Senator Forget, and Mr. E. S. Clouston, of the Bank of Montreal, are satisfied with 10 apiece, and Charles M. Matthews, the Grand Bank of Montreal, has 9.

Some leading Canadian politicians are to be found in the list. Sir Wilfrid Laurier is a director of one company, the Mutual Life of Canada, and Mr. R. L. Borden, leader of the Opposition, sits on the boards of five, the Bank of Nova Scotia, the Crown Life Insurance Co., the Eastern Telephone Co., the Eastern Trust Co., and the Keelewin Flour Mills Co. Hon. J. P. Whitney does not figure in the list, but Hon. G. W. Ross sits on the boards of five, Globe Printing Co., the Manufacturers' Trust Co., other local directors are: Sir Mackenzie Bowell 2 companies, Hon. Richard Harcourt 2, A. E. Kemp 4, Hon. Wm. Hart 2, James McCullin 1, Archibald Campbell 5, Sir Richard Cartwright 1, Hon. J. M. Gibson 3, Hon. Wm. Gibson 3, Thos. Crawford 1, Hon. Geo. E. Foster 2, Hon. Senator Forget, M. P., 1, F. MacLaren, M. P., 5, and Hon. Dr. Montague I. Though W. F. Maclean, M.P., is always fighting the corporations, he is a director of two, viz., The World Newspaper Co. and the Central Press Agency.

Sir Wm. Macdonald boasts only two directorships, and among the judiciary—Sir Wm. Meredith is a director of two corporations, and Chancellor Boyd of 3. Among provincial governors, Hon. W. Mortimer Clarke of Ontario sits on four boards, and Hon. Mr. McMillan of Manitoba on five.

Prof. John Fotts represents the clergy on the directorate of six companies.

J. Pierpont Morgan, Jr., is a director of one Canadian enterprise, the Canadian Coal Co.

WATER IS SHALLOW.

Only 9-12 Feet Deep Where Gjoa Went Aground in Northwest Passage.

Capt. Wm. Mogg, master of the whaler Bonanza, who recently arrived in Victoria, has been invited to send out the Capt. Amundsen, in sailing through the northwest passage, was compelled to jettison a part of his cargo, showing that the northwest passage is not deep enough for vessels of commercial tonnage. "It will probably be from twelve to fifteen feet deep," he said. "The observations taken by Capt. Amundsen at the north magnetic pole is made known to the scientific world," said Capt. Mogg. "For two years Capt. Amundsen photographed every movement of the needle, finding that it moved back and forth almost in a circle. The observations were taken with self-registering instruments, and no member of the expedition is able to give the results. This date will be submitted to the Royal Geographical Society of London, and to the scientific and geographical body of Norway and Sweden, which assisted in sending out the expedition. There are only about three men in the world who are able to read the self-registering instruments used by Capt. Amundsen in taking the observations of the movement of the north magnetic pole. It is estimated that at least 49,000 will be required to decipher the data.

"Capt. Amundsen expects to leave on the return of the S. S. Gjoa, which is within a stone's-throw of the wrecked schooner Bonanza, and plans to bring the Gjoa out by Behring Straits to San Francisco, reaching there shortly next month," said Capt. Amundsen, who has already sent out the observations as registered by the instruments in his sealed copper cans. This case has been forwarded to London and will first be examined by the Royal Geographical Society.

The measurements of water taken by Amundsen in the passage, a depth of only nine feet six inches was found at the place where the Gjoa went aground. As near as could be ascertained by Capt. Amundsen, there is no great depth of water at any place in the passage, although it is established that water may exist where the passage is blocked with ice.

People whose reputation depend upon their clothes have to keep dressed up all the time.

Nothing More to Do.
Hubby—I don't see why you shouldn't exert yourself to make me happy. Wife—Why, of all things! You know you objected to me when I accepted you that I had made you the happiest man on earth. What is the use of my trying to improve that?

The New Zealand Exposition.

The Department of Agriculture announces that it is prepared to receive applications for space for Canadian exhibits at the New Zealand International Exposition, to be held at Christchurch, New Zealand, November, 1906, to April, 1907. The Canadian Government will devote exclusively to the accommodation of exhibits illustrating the natural and manufactured products of Canada. The Department of Agriculture offers to pay transportation charges one way only on all exhibits which are accepted for exhibition, installation and maintenance will also be provided free of charge. Owners of exhibits will have the option of having their goods returned to Canada at their own expense or they will be sold in New Zealand after the close of the exposition, and the net proceeds after deducting customs, shipping and packing charges, etc., remitted to them.

The foregoing will apply only to such exhibits as are accepted by the department for display on the Government space. Applications are accepted by correspondence relative to the exhibition should be addressed to Mr. William A. Burns, Exhibition Branch, Department of Agriculture, Ottawa. The exhibition branch of the Department of Agriculture will have full charge of all arrangements relative to the exhibit for the Canadian Government is concerned.

Barney's Manure.

Barney's manure is the most important manure resource of the farm and should be carefully saved and used. It represents fertility which is drawn from the soil and must be returned to it in some form, or the soil will become barren. It not only enriches the soil with the nitrogen, phosphoric acid and potash, but it also renders the stored up materials of the soil more available, improves the mechanical condition of the soil, makes it warmer and enables it to retain moisture.

Foreign Settlers Come to Ontario.

A return of the immigrants to Ontario by nationalities, made by the Colonization Bureau to the Minister of Agriculture, has been made public. The total is 34,953 for the year 1905. Of these 23,216 were from England, being a very large proportion of the 49,000 who came to the whole Dominion. The countries represented are as follows:—South Africa, 10; Austrian, n. e. s. 87; Buckowinlon, 97; Galician, 312; Slovak, 23; Belgian, 30; Dutch, 15; German, n. e. s., 190; Bavarian, Prussian, Saxon, 5; Welsh, 233; Irish, 1,755; Australian, 29; Bohemian, 10; Italian, 10; Hungarian, n. e. s., 61; Styrian, 4; Brazilian, 1; French, 73; Alsace-Lorraine, 1; English, 23,316; Scotch, 4,496; West Indian, 16; Jamaican, 4; Greek, 23; Hebrews, n. e. s., 106; Hebrews, Russian, 1,155; Hebrews, Polish, 16; Hebrews, Austrian, 15; Hebrews, German, 1; Hebrews, Italian, 2; Hebrews, Newfoundland, 6; New Zealand, 2; Portuguese, 2; Polish, 32; Persian, 2; Roumanian, 23; Russian (including 333 Finns), 1,130; Swiss, 31; Danish, 4; Icelandic, 2; Swedish, 220; Norwegian, 35; Turk, 10; Armenian, 23; Arabians, 7; Negro, Mutato, 24; 8; Syrians, 23; U. S. citizens, 21; India, 5.

Summary.

"Tag" Sweethearts.

The crusade against Sunday liquor selling, now in full swing in Trenton, has greatly worried a prosperous saloon-keeper who has five marriageable daughters. It is because he has these daughters that he is worried, and the cause of his anxiety is explained in a communication sent anonymously to a newspaper by one of the young women.

She writes that she and her sister have five young men calling on them Sunday evenings, and her father has told her that he is worried, and the cause of his anxiety is explained in a communication sent anonymously to a newspaper by one of the young women.

Saving Trout in Nepigon River.

The Provincial Department of Fisheries has been waging war on the coarse fish which haunt the waters of the Nepigon River and are the trout enemies of the province. It has been made that stream famous all over the world. A man from the department in six weeks was able to kill 7,632 pike, 2,232 suckers, and 373 other kinds. The overseer for the district strongly recommends that the work of extermination be continued in the region, it is becoming more widespread and more popular than ever among anglers. This is shown by the fact that this year the receipts from anglers' licenses were \$1,425.

THE SOUL OF THE KITCHEN
A SOUVENIR RANGE
A happy kitchen means often a happy home. All kitchens are happy when the SOUVENIR RANGE is used. Of simple construction and handsome appearance. SAVES TIME, TROUBLE AND COAL BILLS.
