The March of Progress.

March, we write the name of the month itself on our pennon, Forward, March. This month will witness more progressiveness than this store has yet seen. We're determined to increase our sales over all previous records, and have stocked up accordingly, so that

New Goods, New Styles and New Selling Records are the Question of the Hour.

We shall force nothing on you, but when you consider that Easter is only five weeks away, and so much to be done, you will realize that now is the time of preparation. We have been planning all winter with the result that piles upon piles, cases upon cases, and bales upon bales of bright, crisp, new goods have been rolled in daily. But we've not selected at random, though, but rather with good care the best possible value and latest style thoughts from Canadian and foreign dealers. And right here, let us say that you'll find many of the season's choicest and most exclusive styles that will not be seen in any other store hereabout. It is a comparatively easy matter to do well for a good price, but the test of a store's ability is in giving much for little. Test us on some of these new things. Instructors will again be furnished

The Ontario Department of Agriculture and the Dairyman's Association are again co-operating in furnishing instructors to visit factories and creameries periodically throughout the season from May till October inclusive, for the purpose of assisting makers in improving their methods, giving advice, as to equipment, drainage, ventilation, etc. The department requires that each factory receiving instruction pay \$15 for the season's services. This amount represents about half the actual cost to the Department. The instructors in addition to giving instruction to the makers will devote some attention to giving advice to farmers, as to the best methods of cooling and taking care of their milk. Each instructor will be supplied with leaflets giving the most approved methods of caring for milk and will have pleasure in leaving one with each producer as visited, and a few extra copies will be supplied to each maker. Those desiring instruction will please make application to G. A. Publow, chief instructor for Eastern Ontario, Kingston, at an early date in order that the work for the season may be well planned. It is particularly desired that new factories or factories which are operating under a new name inform the department of Agriculture, Toronto, of the name of the factory, together with list of officers. Hymene:1 SHIELD-FALLS The home of Mr. and Mrs. Wm. Franklin, was the scene of a pretty wedding Wednesday, Feb. 28th, when their youngest daughter Lillian A., was united in holy matrimony to Mr. Joseph Shield. Promptly at 5 o'clock, to the strains of the wedding march played by Mrs. Dr. Marvin, the bride entered the parlor leading on the arm of her father. She was becomingly attired in blue silk with white embroidered yoke, cuffs and hertha of crinkled chiffon. The ceremony was performed by the Rev. Dr. Marvin, M.A., B.D., P.H.D., of Bethany, in the presence of only the immediate relatives and friends of the bridal couple. After congratulations all repaired to the dining room where the wedding dejeuner was served, after which Mr. and Mrs. Shield left for their new home near Omeame amidst showers of rice. The bride's going-away gown was of brown cloth with hat to match. The presents were numerous and costly, showing the high esteem in which the young couple were held. Congratulations.

A MIRACLE OF NATURE.

The Wonderful Growth of the Antlers of the Wapiti. Wapiti antler growth is one of the miracles of nature that we never cease to consider a miracle. About the end of winter—that is in mid-March—the antlers of the year before break off flush with their base an inch or more above the skull. Usually they are found close together, showing that they fell nearly at the same time. At first the place of each antler is a broad raw spot. In a few days it shows a thick rounded pad or blood-gorged skin. This swells rapidly, and in a fortnight the great bulbous fuzzy horn beginning has shot up to a height of several inches. At exactly the right time, place and in just the right direction a bump comes forth to be the foundation of the brow tine. In a few more days the bez tine is projected by the invisible architect. In a month the structure is nearly a foot high and all throbbing blood vessels—the scaffolding and workmen of this surprising structure. Night and day the work is pushed with astounding speed, and in four months this skyscraper is finished, a wonderful structure indeed, for a score of nature's forces have toiled, a myriad of invisible workmen have done their part, and an edifice that, according to ordinary rules, should have taken a lifetime is here rushed through in a summer and all in absolute silence. August sees the building done, but it is still cluttered with scaffolding. The supplies of blood at the base are re-antler is no longer in vital touch with the animal. It begins to die. The sea-siveness leaves each part, the velvet and the stag assists the process of clearing off the skin by scraping his horns on the brushwood. September sees him fully armed in his spears of dead bone, strong in body, glorying in his weapons and his strength, and ready to battle with all comers.—Ernest Thompson Seton in Scribner's.

REV. G. W. DEWEY SAYS PLAIN TALK IS REQUIRED FROM THE PULPIT.

"A man can be a pretty bad sinner and raise the devil generally in the Methodist church before you'll put him out—if he pays well." This was the rather startling statement made by Rev. George W. Dewey, pastor of Davenport Methodist church, to the people of Annettsville, Methodist church, Toronto, where he preached on Sunday last. Mr. Dewey lamented the fact that Methodist preachers were inclined to keep clear of any reference to the sins of the rich members of their congregations. "There's too much spreading of the porridge—with more sugar than porridge," he continued, "for I must confess that I'm afraid I've neglected to preach men's sins to them—especially if they paid well."

ASTORIA.

"There's something of the dog about us after all," he exclaimed, "Did you ever see a dog go and get an old bone, chew at it, wrestle with it, get mad at it, and then bury it? Well, there are some people just like that. If somebody in the church ever did them a wrong in the past they blame the whole church for it, and keep it alive, just as the dog digs up the bone."
