IMPORTANT ANNOUNCEMENT TO EVERY PERSON INTERESTED in WHEEL VEHICLES

I have leased my workshop and will not in future do any repairing, but will give my undivided attention to the production of the best and most up-to-date Buggies and Wheel Rigs of every description.

In future I shall purchase all my work in the white. That is, all parts finished and ready for the paint shop. By doing so I can see the material and workmanship in every rig.

My reasons for this change I shall state as briefly as possible. There are in the United States and in Canada several large Companies with unlimited capital, with the most improved machinery, with buildings put up expressly for the purpose, thoroughly ventilated and properly heated in which all cement and glues can be used to the best advantage.

These Companies are in a position to employ the best designers. They can send their men to the best carriage centres on the continent and get the best and most improved styles and can place them within reach of the dealer at reasonable prices.

Another reason for the change is that it is almost impossible to keep a first-class body builder in a small shop. He cannot improve himself; he has no designer to teach him; conditions are unfavorable; shops are badly heated and badly ventilated; he is one day building a good carriage, and the next a lumber waggon; at one time the shop is too warm and the next hour it is too cold; he knows that it is impossible to do first-class work under conditions of this kind, and he naturally goes to the first-class body shop.

These are the results of changed conditions during the last few years and they are facts that cannot be denied.

In future I shall take advantage of these changes, and will place within the reach of the people of this County the best results of the brains, capital and experience of these large companies, and give you the neatest and best vehicles ever offered for sale here.

My Show Rooms will be fitted up and goods ready for inspection about the middle of March. Just wait until then and see the latest and best rigs in Canada.

CASTORIA For Infants and Children. The Kind You Have Always Bought

Lady Jane Grey was the most learned child of which history has any record. Before she was nine years old she wrote a beautiful hand and was able to play on many different instruments. She could speak several languages, both ancient and modern, besides being well grounded in philosophy. When other children were playing she would amuse herself by reading writings of the philosopher Plate in the original Greek. Perhaps it was because she had led a very lonely life when she was a child, as her mother and father were often away at court. leaving her to the care of her governess and her schoolmasters at the gloomy family place called Bradgate. The big square house was built on the edge of a great forest surrounded by acres of uninhabited land. There were very few books and not any newspapers at the castle, and Lady Jane Grey had no playmates, as her governess would not allow her to play with the servants' children, and there were no others suitable for her companions
