### MEN'S SPRING HATS

We are making a very good showing of men's new spring hats. -hirts and neckwear, all the best and newest effects. Cambrie and zephyr shirts in all newest designs for 1.00.

## O'Loughlin & McIntyre

### Presentation to Mr. and Mrs. Robt. White

South Verulam, March 3. — Last Friday evening a party surprised Mr. and Mrs. Robt. White, and presented them before they leave for Lindsay with a nice cake and butter dish along with an address. Mr. Ross Fair managed the affair, and a first rate time was spent. A dance open to all was held, then refreshment was served, followed by the presentation and address. We are sorry to see Mr. and Mrs. White leave, for they are such good neighbors, and what will be our loss will be their gain. We all wish them good luck wherever they go and feel sorry to part. The following is the address: To Mr. and Mrs. Robt. White and family.

We regret to learn that you are about to leave our section. In losing you we have lost a kind friend and neighbor, but we also hope that our loss will be your gain. We wish in some way to show our esteem toward you and your family, and present you with this cake and butter dish as a small token of the regard in which you have been held in our community.

Signed on behalf of your friends and neighbors—Bobcaygeon Independent.

### Decision Re the Little Bob. Bridge

A joint meeting of the committee of Peterboro and Victoria counties met at Bobcaygeon last week regarding the rebuilding of Little Bob. The committee consisted of: For Victoria county—Warden E. Tiers, J. R. McNeillie, county clerk and treasurer; Charles Corneil, of Emily; and George Bying, of Bobcaygeon. For Peterboro—Warden F. Moher, of Douro, and Messrs. Coban, of Galway; Shaw, of Harvey; Young, of Ennismore; Garbutt, of Smith, and Darling, of Dummer. Besides these there were Co. Engineers Smith, of Victoria, and J. E. Belcher, of Peterboro; also superintendent of county bridges, W. M. Kennedy.

It was agreed to narrow the span, rebuild with steel superstructure and concrete piers, and to have the steel span fourteen feet in width. It is understood that Engineer Smith is to take soundings for bottom in the near future, and until this is done it will not be definitely known just how wide the span will be.

Forty bodies have been recovered from the gulch in Washington State into which a snowslide swept two Great Northern trains a few days ago.

### Didn't Know it Was Loaded

From Thursday's daily  
After an adjournment of almost four months the trial of Mr. Percy Brown, of Mariposa, charged with carrying a revolver and unlawfully wounding Simon Ferguson while returning from a party, was commenced before County Magistrate Moore. Mr. A. M. Fulton appeared for the accused and owing to the illness of Mr. A. P. Devlin, crown attorney, Mr. F. H. Hopkins acted in the capacity of crown attorney.

The charge of unlawfully wounding Ferguson was first taken up, Dr. Dale, of Oakwood, being the first witness, who testified to the nature of the injuries Ferguson sustained. He stated that the accident occurred on Nov. 19, 1909, and from the conversation between Brown and Ferguson in his office that evening, Brown admitted to shooting Ferguson and stated that it was accidental.

At this juncture Mr. Fulton stated that his client, Brown, admitted to the charge of shooting, but did not commit wilful harm.

Simon Ferguson was the next witness and told the story of how the shooting did occur. He stated that he and Brown had been chums all their life. They were the best of friends and never had a dispute of any kind, and that the shooting was purely accidental. "The shooting occurred on the night of Nov. 19, about 11 o'clock, on the 8th con. of Mariposa, about 5 miles from Oakwood, while Brown, Dan. Grant and myself were returning from a party.

At this particular spot we stopped the horse and got out of the rig, Brown produced a bottle of Scotch whiskey and we had several drinks. I was standing with my arm on Brown's shoulder when he pulled out the pistol, which we thought was empty, and shot it off, with the result that the bullet entered my right shoulder. I am confident that it was accident as we had no quarrel. Before we stopped Brown fired several shots out of the pistol and we thought that it was empty, said Ferguson in giving his evidence.

The case was thus adjourned until 2 o'clock and at the time of going to press was not concluded. The court-room was packed to the doors, a number from Mariposa being present.

### SUMMER SCHOOL.

The Bay of Quinte Methodist Conference Summer School will be held at Hotel Alexandra, Wellington, July 4 to 11. It is said to be an ideal spot for such a gathering.

### RESERVED DECISION.

The trial of Percy Brown, of Mariposa, charged with carrying a revolver and inflicting bodily harm to Simon Ferguson, was continued again Thursday afternoon and at the conclusion of the evidence Magistrate Moore, K.C., reserved his decision until Monday morning of next week.

Richard Ferguson, father of the injured young man, was the first witness, and stated that he did not know the shooting occurred, or anything about it only which his son and Brown had told him on that evening. "Brown stated that he asked my son to get into the rig and come home and at that moment the pistol went off. Brown also stated that they had no quarrel on the road."

Clinton Cann, also of Mariposa, who was in the buggy that passed the three young men on the road, swore that he remembered the evening and only saw Dan Grant, who said to him, "drive on," but he did not reply to him. He stated that he heard a shot from a pistol, but did not know anything more about the affair. The witness also said that Mr. Rodd's horse on that evening, and that the shooting occurred about eleven o'clock.

Percy Brown, the accused, was the only witness for the defence and swore that he carried the pistol because he had considerable money about him, and because he had been residing in a house all alone. The pistol belonged to his father and he had put it in his pocket several days previous to the shooting and had neglected to take it out. For some days before the accident he had about \$700 in his pocket and this was why he carried the pistol. The witness also swore that while on the road home he discovered the pistol in his pocket and discharged it several times until he thought it was empty. When the rig was stopped Ferguson and Grant asked me if I had any whiskey, and I replied that I had a bottle in the buggy and produced it. While on the roadside he stated that he had the pistol in his hand when it was discharged. The witness did not remember taking the pistol out of his pocket. In conclusion the accused swore that he and Ferguson were always chums and were the best of friends at the time of the shooting.

The argument for prosecution by acting crown attorney, Mr. F. H. Hopkins, and for the defence, by Mr. A. M. Fulton, took up considerable time, with the result that Magistrate Moore reserved his decision.

### Gov. Hughes Orders an Investigation At Albany

JAMES S. WHIPPLE

ROGER P. CLARK

Albany, N.Y., March 1.—A sweeping investigation of the work of the Forest, Fish and Game Department and of the sensational allegations that the State had been defrauded of thousands of dollars through land frauds, has been ordered by Governor Hughes.

Mr. Hughes announces that he has designated his legal adviser, Mr. Roger P. Clark, and Mr. Leroy Austin to carry on the inquiry, which will be started at once and prosecuted until, friends of the Governor assert, there shall not remain in the perspective of the commissioner's past or present a single question mark.

News of the Governor's determination to ascertain the truth about the charges which have been informally laid against the work of the department—not under the present regime, but under those of other Commis-

### Inspector's Report on Lindsay Collegiate Institute

Extracts from the report of Inspector J. E. Wetherell on his visit to the Lindsay Collegiate, were read at the meeting of the Board of Education held last evening. The report is very satisfactory to the board and contains many interesting items.

### GRADING OF ACCOMMODATIONS.

Water closets are graded I, water supply I, school grounds I, school buildings I, class rooms I, halls I, waiting rooms III, cap rooms I, teachers' private rooms I, desks I, blackboards I, lighting I, heating I, ventilation II, gymnasium II.

Spot and coal gas still escape from the defective furnaces into the class rooms. The board should take immediate action in this important matter.

The gymnasium will be graded "I" when a running track has been erected. This will bring an additional annual grant of \$40. The present grading of the gymnasium anticipates the equipment already offered.

After 1910 first-class grading will not be given to the classrooms unless they are suitably decorated with pictures, casts, etc.

### VALUE OF EQUIPMENT.

At the last inspection the value of the library references was placed at \$1,432.66, library supplementary reading \$180.06, scientific apparatus, \$1,206.43, maps, globes, etc., \$86.65, drawing models \$43.72, typewriters, \$435, equipment for physical education \$126.25.

Since the last inspection additions have been made to the library references to the value of \$84.21, to scientific apparatus to the value of \$331.89, and drawing models \$7.95. A deduction of \$132.37 had been made for scientific apparatus.

The present value of the equipment is as follows: Library references \$1,516.87, library supplementary reading \$180.06, scientific apparatus \$1,405.95, maps, globes, etc., \$86.65, drawing models \$51.67, typewriters, \$435, equipment for physical education \$126.25, gymnasium \$4,000.

More models are needed for the middle school art class.

Ratio of pupils to teacher: 257 to 8. Three junior classes are too large for efficient work.

Division of duties among teachers: The English Grammar should all be taught by one experienced teacher.

Provision for teaching the courses: The time table on the whole, is an excellent one.

Staff: All duly qualified. Discipline: Excellent. Attendance: All regularly admitted—boys 132, girls 125, or a total of 257.

Text books: All authorized. Registers daily and general: All properly kept.

English literature texts in lower school: All satisfactory.

Supplementary reading: Satisfactory.

Books are needed in Library for French and German.

Something will be done to additional class room decorations.

Fire drill: Satisfactory.

The grading under each head ranges as follows: I—Good, II—Fair, III—Poor, IV—Bad. English and history I, Mathematics I, Science I, Latin and Greek I, French and German I, Commercial I, Art I, reading I, drill, callisthenics, gymnastics I.

The foregoing grading does not include the work of the recently appointed teacher of Grammar and Geography. Although the pupils' records of outdoor observations in science and their collections of plants and seeds are far from satisfactory, I have, for sufficient reasons, not lowered the grading of the Science department.

### CHARACTER OF PUPILS' WORK.

Reading, Form II A: Of 34 examined, 21 are good, 13 fair, 23 last admitted pupils: 5 good, 23 fair, 12 poor. II B—4 good, 18 fair, 10 poor. Spelling: (I) 11 good, 18 fair, 11 poor. Spelling—(II B) 9 good, 14 fair, 9 poor.

The bookkeeping sets are satisfactory and the work in Art unusually good. The note books in Science are satisfactory, excepting an out-of-door work. Collections not at all satisfactory. Excellent arrangements in regard to drill, callisthenics and gymnastics.

### APPROVED HIGH SCHOOLS.

This school will rank as an "Approved School" for the year 1910. Another teacher will be required next autumn if the school is to be approved for 1911.

GENERAL REMARKS.

The Board of Education and the people of Lindsay are to be congratulated on the great improvements made in the accommodations of this school since last inspection. The expenditure of \$15,000 has provided all the desired improvements. The addition to the building includes a gymnasium, an art room type-writing room, and class rooms, as well as a private room for the principal. Many improvements have also been made in the accommodations of the old building; among them a new physics room will soon be ready for occupation.

The staff of the school is unusually strong, and the general tone of the school is excellent. The improved accommodations will play a part in attracting more pupils to the school. A ninth teacher should be secured in May or June for the fall term.

This is one of the few schools in the province which have organized a middle school art course. I hope to

### RHEUMATISM

But Dodd's Kidney Pills Always Cure Rheumatism

WHAT THEY DID FOR W. H. CRAINE, AND WHY THEY ALWAYS CURE RHEUMATISM—THEY REMOVE THE CAUSE.

Toronto, Ont., March 4.—(Special). —In these days of sudden changes of temperature known to so many suffering people as rheumatism weather the experience of W. H. Craine, of 103, Gladstone-ave., this city, is of widespread interest. Mr. Craine suffered from rheumatism. He is cured and he knows the cure. It was Dodd's Kidney Pills.

"Yes, I know Dodd's Kidney Pills cured my rheumatism," Mr. Craine states. "For after I started taking them I used no other medicine. I never cease recommending Dodd's Kidney Pills to my friends."

Dodd's Kidney Pills cure rheumatism by putting the kidneys in condition to strain the uric acid out of the blood. It is uric acid in the blood that causes rheumatism. Cold or damp causes it to crystallize at the muscles and joints, and then comes those tortures every rheumatic, know only too well. Dodd's Kidney Pills cure rheumatism by curing the kidneys. The cured kidneys remove the cause of the rheumatism.

### RECORD FOR HOGS.

H. P. Kennedy, of Peterboro, one of the largest live stock dealers in Ontario, sold hogs on the Montreal market this week at \$15 cwt. live weight.

Mr. Kennedy is the first man in Canada to sell hogs at this high price.

### LEAVING LINDSAY.

According to a rumor which is going the rounds to-day Mr. F. A. McDiarmid, one of Lindsay's popular barristers, is about to receive the responsible and lucrative position of city solicitor for the city of Victoria, B.C.

When Mr. McDiarmid was seen in regard to the rumor he would give nothing out for publication in regard to the matter. His friends in Lindsay—and they are numerous—although they are sorry to see Mr. McDiarmid leaving town, nevertheless will be ready to congratulate him when the appointment is announced for a certainty.

### PALLBEARERS DUMPED.

Thursday morning an accident was very narrowly averted. The funeral procession was returning from the cemetery after the burial of the late Mrs. Geo. Johnston, and had just reached the rise south of the town, when the cab containing the pallbearers turned a little to one side, and as the ditch was very steep, the rig turned over in it, breaking the window and window sash, and piling the inmates on top of each other.

Luckily no one was hurt, and the men emerged from the upper side of the cab unharmed. The rig was turned right side up, and the mourners proceeded on their homeward way none the worse for the shaking up.

### How To Tell Catarrh

AN EXPERIENCED PHYSICIAN SAYS THE FOLLOWING SYMPTOMS ARE SURE SIGNS.

You can always tell catarrh by the following well known signs:

Eyes red and watery? Difficulty in breathing? Are the nostrils stuffy? Do you sneeze frequently? Is your throat hoarse? Do your spits phlegm? Oppression in the chest? A ringing in the ears?

If you have any of these indications of catarrh cure the trouble now—stop it before it gets into the lungs or bronchial tubes—then it may be too late. The remedy is "Catarrhozone," a direct breathable cure that places antiseptic balsams and healing medication of every spot that is tainted by catarrhal germs.

There can be no failure with Catarrhozone—for years it has successfully cured cases that resisted other remedies. "No one can know better than I the enormous benefit one gets from the very first day's use of Catarrhozone," writes T. T. Hopkins, of Westvale, P.Q. "I had for years a stubborn case of bronchial catarrh, ear noises, headache, sore eyes, stopped-up nose and throat. It affected my appetite and made my breath rank. Catarrhozone cured quickly."

Get Catarrhozone, use it and you are sure of cure—beware of imitations and substitutes. Large size Catarrhozone with hard rubber inhaler lasts two months and is guaranteed. Smaller sizes 25c and 50c. By mail.

be able next June to recommend the special grant provided for the course.

I met a large deputation of the board and discussed the advisability of increasing the staff of the school immediately.
