EGGS ARE COMING DOWN

Eggs are getting down to a price at which the ordinary man can indulge in a poached egg for breakfast. The mild weather of March has no doubt had an effect in stimulating laying by hens, but does this not emphasize the teaching of some of the poultry experts that if hens are properly cared for in the winter they will lay as well or better in the winter than in the summer? To have the prices in winter and in summer brought nearer to an equality is a consummation devoutly to be wished.

YOUR OWN TOWN

Encourage every home enterprise. Take an interest in every industry, invest liberally in the stock of faith and good will, and distribute it all over your town, in every factory, every workshop, every business house, says a contemporary. It will pay you large dividends, and will cost very little. It can never depreciate in value. It will always be above par. Buy home made goods. Ask your merchants for them. Wear home made garments, eat home made articles of food, sleep on home made beds, read home made newspapers. In this way the money you spend is only loaned. It will come back to you again with interest. Praise up your town—don't run it down. Stand by your merchants and manufacturers—they are the bone and sinew of your municipal structure. Stand by your churches and your schools, they are the hopes of your future. Stand by your press, it is the tireless sentinel that guards your interest.

We owe it to the community in which we live to do everything we can in every way possible that will be to its advantage. Our neighbor's prosperity means a great deal more to us than someone's who lives elsewhere. We should bear this in mind in buying our goods. We can afford to pay our home man a firm price for his wares rather than send our money away, knowing as we do that every dollar our own citizen makes will help in sustaining our schools, churches and public institutions. It pays richly to patronize home industry.

We do not need in Lindsay to pay firm prices to local dealers for goods, because almost every article needed is sold just as cheap here as it is in Toronto. If we had to pay a little more it would be wisdom to do it and build up our own town, as The Watchman has heretofore frequently remarked.

THE ODIOUSLY DIRTY BANK NOTE

A United States Congressman has declared before the House of Representatives committee on banking and currency that he has had a U. S. \$1 bill microscopically and scientifically examined, with the alleged discovery of no less than ninety-two million germs on it, of manifold variety. He advocates legislation to provide clean currency by burning up all paper money returned to the U.S. treasury.

Among disease germs found on this bill were smallpox, scarlet fever, typhoid, tuberculosis and diphtheria—five of the worst scourges to which the people of this northern and temperate climate are exposed. Another bill which was examined disclosed

DR. A. W. CHASE'S CATARRH POWDER 25c. is sent direct to the diseased parts by the Improved Blower. Heals the ulcers, clears the air passages, stops droppings in the throat and permanently cures Catarrh and Hay Fever. 25c. blower free. Accept no substitutes. All dealers or Edmondson, Bates & Co., Toronto.

the presence of 13,318,000 living bacteria. The \$1 bills were the worst, since they were in most constant circulation; the higher the denomination of the bill, the cleaner it was. Strange to say, no germs, it is said were found on metal currency.

We have a suspicion that the U.S. Government is more particular as to the cleanliness of its paper currency than the Government of Canada. Traveling in the United States, one seems to be offered clean, crisp, new bills oftener than in Canada. Here are often seen horribly mutilated, torn, plastered up, vile bills still doing service.

At all events, whether there is any just contrast or not in the methods of the two Governments, we ought to have a measure at Ottawa on similar lines to that of Congressman Wiley, of New Jersey. Provision ought to be made for quick return by the banks to the Dominion treasury of soiled, dirty national notes, to be replaced by clean, new ones, and the banks ought to be interested also in the more frequent replacing of their own dirty bills. If necessary the stimulus of some Government regulation might help the latter besides interesting banks in getting Dominion notes renewed.

In these modern days, when matters formerly neglected are now known to possess large sanitary importance, this matter of offensively filthy, unsanitary paper currency should be vigorously attended to.
