Fire Insurance That Insures

Several companies that I am agent for have been paying losses to their policy-holders for nearly 200 years and still have Assets enough to be amongst the Strongest Fire Insurance Companies in the world. Ask for my rates before renewing your policy—security considered—they are the lowest obtainable and the difference in cost between good and bad is so infinitesimal when spread over three years for furniture or dwelling policies that the wise insurer will choose the best.

CANADA'S GIFT TO THE TWELVE NATIONS

No doubt NOW that Canadian Farmers are to be Exposed to the Competition of all the Great Food Exporting Countries of the World.

When it was first made known that the Reciprocity Compact not only gave American farmers free entrance to the Canadian markets and extended the same privileges to the United Kingdom and the British colonies, but also opened the door wide to the Argentine Republic, Austria-Hungary, Russia, Spain, Norway, Sweden, Denmark, Switzerland, Japan, Bolivia, Columbia and Venezuela, Canadians in general thought there must be some mistake. They could not believe that without getting any concessions whatever from any country except the United States our Government would admit farm products from all those countries into Canada to compete freely with Canadian farm products. The wording of the Reciprocity Agreement was very plain; there seemed to be no doubt about its meaning; and yet it was such an extraordinary arrangement, so unfair to Canadian farmers, and so likely to lead to disputes with the American customs officials that many people believe that the Government would give some explanation showing that the agreement had been wrongly interpreted. However, there is no longer any such hope. Mr. Robert L. Borden questioned Hon. Mr. Fielding on this point and Mr. Fielding admitted that the Reciprocity Agreement meant exactly what it appeared to mean and that Canada would get nothing whatever in return from any of the twelve foreign nations or

the British countries that share with the United States privilege of sending their farm products freely into the Canadian market. If the Reciprocity Compact simply provided for free trade in farm products between Canada and the United States there might reasonably be difference of opinion as to whether it would be advantageous to Canadian farmers or not. We think that even such an arrangement would have been a bad bargain for Canadian farmers, because the surplus of farm products in the United States is enormously greater than the surplus of Canadian farm products, because the farming season is earlier and longer in the United States, and because our farmers would always be at the mercy of the tariff legislation of the United States Congress, while they would have no voice in the election of Congress, but still there would be room for argument as to whether our farmers would gain enough by admission of their products to United States markets to compensate them for losses in the home market; but from the farmers' point of view nothing can be said in favor of allowing twelve foreign nations and the food-exporting British colonies to send their farm products freely into Canada without giving our farmers anything to compensate them for this unexpected competition in the Canadian home market.

LECTURES FOR LADIES. It must not be imagined that it is the farmers alone who get some thing from the visit of the special. Their wives and daughters were out in force, and one car was given up to lectures for their special benefit. At Dutton, J. W. Clark, of Calneville, gave a talk on poultry keeping, and C. A. Putnam, the superintendent of Farmers' Institutes, gave an address on the work of the Women's Institutes. At Ridgetown the ladies heard dairy lectures. At Charing Cross the school teacher brought her whole class to see the
