

FIFTY CENTS

In some conditions the gain from the use of Scott's Emulsion is very rapid. For this reason we put up a fifty-cent size, which is enough for an ordinary cough or cold or useful as a trial for babies and children.

SCOTT & BOWNE, Chemists, Toronto, Ont.

WHAT TO DO AND WHY

Blacksmithing

We regard the blacksmith as the prince of mechanics. He is at once an artist and a machinist. He who can mold a statue, having in his mind the image, while the clay is yet but a rude mass, and knows how to remove the excess parts, and mold the mass into the requisite forms, has the same talent which the blacksmith requires, who withdraws from the forge the flaming bar of iron and is required to mold it with his hammer into the desired shape.

Whoever can be a first-rate blacksmith could also be an artist in clay and marble. But the blacksmith, in order to reduce the firm metal to the form required, must have muscle, strength, isolation, thoroughness, power, and if I may say it, the elements of fineness joined with the elements of coarseness; the elements of taste with the elements of strength.

A first-rate blacksmith requires, to be a first-rate man and though his face be blackened and his hand hard, he will generally be found with a fine strong brain. I am speaking it will be remembered, of the first-class blacksmiths, and these are generally superior men, capable of taking and maintaining a good rank in any field of industry or education, and are a class of men who are an honor to any age or country.

The faculties which the blacksmith must have in order to excel, are, first, a good development of the faculty of Form, to give the idea of shape, and to enable him to realize the form required in the iron which is hissing on his anvil. The faculty is located between the eyes and when large pushes the eyes apart, when small, the nose is narrow at that part and the eyes must also be near together.

He needs the faculty of Ideality, to give appreciation of style and harmony, and to aid in creating the thing in the eye, before the iron begins to take form in short, a clear conception of what is to be done before it is commenced. If he is making edge tools and has to temper them, he needs the faculty of Color, to appreciate the right shade of the steel when the temper has come to the right point. The horse-shoer should have a keen sense of hearing, because in driving horse shoe nails he is chiefly guided by the sound of his blows as to whether the nail is being driven into the sensitive part of the foot, or is turning out of the hoof at the proper place.

Let no young man engage in this trade who has not a good development of the faculties I have mentioned. He also requires in addition to these talents a strong constitution. He should also have enough courage and energy to give a disposition to use the power he possesses and strike while the iron is hot, and such a degree of firmness and steadfastness will enable him to use his power persistently until the iron becomes cool.

The blacksmith should not be a tall man. He should have a broad, deep chest, large bones, brawny muscles, a head broad in the region of the ears, with a prominent brow, with strong and not coarse hair, and rather dark complexion. Such a man will be tough, efficient, enduring, and, if temperate, successful.

Hymeneal

HILL—HERRON.

A very interesting affair took place on April 4th, at the home of Mr. and Mrs. Richard Herron, Fenelon Falls, when their second daughter, Maybelle, was united in marriage to Mr. Joseph Hill, also of Fenelon Falls. The ceremony was performed by Rev. Kenny, of Fenelon Falls, in the presence of about eighty guests.

Obituary. THOMAS EDWARDS. Sunday afternoon, April 1st, 1906, the citizens of Cannington and those of Brock, Woodville and other places learned with deep regret that Mr. Thomas Edwards had died at the family residence, Beaverton, after an illness extending over the greater part of the past winter.

PORT HOPE TO CHARLOTTE

ANTICIPATION THAT TRENT VALLEY CANAL OUTLET MAY DIRECT TRAFFIC TO THESE HARBORS.

The establishment of a ferry service between Port Hope and Charlotte formed the subject of a conference held at the Grand Trunk Railway offices on Saturday between the leading officials of the railway and representatives from the town of Port Hope. Among the latter were T. B. Chalk, mayor; R. Mulholland, president; H. H. Burnham, member, and James Evans, secretary of the harbor board.

Mayor Chalk, speaking to the Toronto Star, at the close of the conference, stated that the Grand Trunk were interested in the proposed plan by which a daily service would be run between Port Hope and Charlotte. The steamer that would supply the service was being built for the Ontario Ferry Company, and it was intended that it should be run in connection with the Grand Trunk Railway at Port Hope and the Rochester and Pittsburgh Railway at Charlotte.

Mr. Mulholland, president of the harbor board remarked to the Toronto Star that the harbor at Port Hope was already in very good shape, but it was now intended to go ahead and make a number of improvements. The projected service would be established early in August.

DEATH OF THOS. KEOGH

Thos. Keogh, formerly of Belleville, for forty years a western cattle dealer, or, lately residing in Ogden, Utah, died there recently. Last summer he visited Belleville at the old boys' reunion.

ANGRY VESUVIUS

ADDITIONAL RECORD OF CATAC-TROPHE ATTACKS TO THIS VOLCANO.

Mount Vesuvius, in Italy, has been in volcanic action for some time, and the eruptions of lava have caused much loss of life and devastation in the last few days. According to information received on Monday more than 200 perished in the district of San Giuseppe, while from the ruins of a church which was swept away by the stream of lava, have been recovered forty-nine corpses.

The mountain is on the east shore of the Bay of Naples, eight miles from the city of Naples. The mountain has two peaks, Somma Vesuvius. The first eruption, on July 23, 1794, by which Pompeii and Herculaneum were destroyed. More than 200,000 people perished. The volcano continued intermittently active until 1806, when, accompanied by terrible earthquakes, the crater discharged great masses of lava. Many thousands of lives were taken by the lava, which was termed Brindisi, which were destroyed.

For complete programme or further information write your inspector, or the secretary of the P. S. department, R. Ward, 68 Brunswick Ave., Toronto.

LIPTON'S CHALLENGER.

Sir Thomas Lipton has commissioned Alfred Milne, of Glasgow, to prepare the designs for the yacht with which he expects to challenge for the America's cup.

KEEP OUT OF COBALT MINING SHARES.

The New York Financial Herald of April 1st, says: "This spring, like that of last year, undoubtedly, will witness another exodus of fortune seekers, from all over the world to this supposed Dorado—while thousands of others, instead of going there in person, will content themselves by purchasing shares in companies organized to work visionary rich claims, that will be floated in great numbers."

MAGISTRATE DENISON SPEAKS OF YORK LOAN WRECKERS

The progress of the investigation of the York County Loan and Savings company develops many surprising things, and in speaking of some of the revelations, Magistrate Denison said that in all his experience he never came across a case so complicated, where so many people were concerned, the object being to defraud the public.

NEWS OF THE WEEK.

Interesting News Items from our Exchanges.

A CHAT WITH GEO. WILLIAMS. Mr. Geo. Williams, second son of the late Thomas Williams, of Lindsay, who has of late been quite a world explorer, returned recently, after an absence of two or three years, and is in the employ of the Flavell Milling Co. Mr. Williams was for some time in Delagoa Bay, in Portuguese, East Africa. Recently he has been in the coal fields of West Virginia, with the War Eagle Fuel Co. Some information gleaned from him regarding the coal mines will be of interest.

The West Virginia coal deposits furnish some of the finest soft coals to be had, comparing favorably with Welsh coal. There is very little shaft mining, the coal being taken from the side hill. The coal is found between two layers of sandstone.

The one-price up-to-date Men's and Boys' Furnishing Store.

For Fastidious Men

Those who know "what's what" in matters sartorial, we carry a special line of high class ready-to-wear CLOTHING—

The 20th Century Brand

In buying one of these splendidly tailored suits, you not only get a garment as far ahead of the ordinary "ready-made" clothing as electricity is ahead of the candle, but you get a suit that the average tailor cannot hope to equal.

Table listing clothing items and prices: 20th Century Brand tailored Suits, from \$12.00 to \$25.00; Progress Brand Ready-to-wear Suits, from \$5.00 to \$15.00.

AFTER CHURCH AT JONESVILLE

Church was out in Jonesville, Ontario, and Mr. and Mrs. Brown and Mr. and Mrs. McCracken were walking home. When they had proceeded down Main street as far as the home of the Browns, the latter insisted on their friends entering for a chat.

"Come right in now," urged Mrs. Brown. "I haven't seen a soul to talk to today. Don't stand there freezing. It's terrible cold. We'll have a cup of tea before you go. Why, you haven't seen my new coal-range, Mrs. McCracken. It's simply great. I can fix it up at night and it's gone in the morning, and I'm out in the afternoon I haven't got to hurry home near so fast to get supper. You folks have a coal-heater in your sittin'-room. Now what you need is a range. Why, those farmers got so outrageous, charge five dollars a cord for wood and we have paid as high as six, spot cash—that's a comfort to be independent of them. Of course, no matter what you get there's some drawback to it. Steve there won't hardly carry a scuttle of coal in, and when I give it to him for being lazy he says that all I've got to do nowadays since I got the range. And that he makes the excuse that he don't know how to run it, and neither he does, but (Mr. and Mrs. McCracken were indoors by this time) come right through and see it. Mrs. McCracken. You too, Mr. McCracken. I've fixed the kitchen up a bit since we got the range, and we use it for a sittin'-room."

"That's right," agreed Mr. McCracken. "Look at the money he throws away in clothes and running down to the city, an' all kinds of nonsense. His father excused him, and says he's gettin' progressive ideas. If he'd stay home and go easy and be careful of his money it would be better for him. Miss Peters may think she's makin' a mighty fine catch, but she'll find there won't be so much style goin' after a while. Anyway, I'll bet they'll quarrel."

"That's all right," said Mrs. McCracken. "Mrs. Peters herself can do her share. I think the minister ought to look to home first. If she'd stay in more and look after her family it would be better for her and him too."

anyway. And I'll just tell you I put a flea in Mrs. Peters' ear the other day. She came up to me at the Ladies' Aid as sweet as you please, and started askin' me how we all were. I looked at her kind of digger-sided and I says, 'We're all very well, thank you,' I says, 'but I see you're remarkin' to Mr. Brown yesterday that you hadn't been in to see our quirt a while. Some day when you're passing to Dr. Smith's we'd be glad to have you drop in.' That took her back a little I guess."

"Do you think the revival meetin' that they're goin' to start will amount to much?" questioned Mrs. McCracken.

"Oh, not much lately, since Miss Peters came to the village."

"That's always your Uncle Tom's talk when he comes around. Ambitions! If a fellow gets stuck on being ambitious and goin' in for bein' a smart Alec, that ain't the place for him. A young fellow in a town like this ought to creep before he can walk, especially when he goes into business. Willie's father kept creepin' all his life, but he made more money than his son ever will."

"That's right," agreed Mr. McCracken. "Look at the money he throws away in clothes and running down to the city, an' all kinds of nonsense. His father excused him, and says he's gettin' progressive ideas. If he'd stay home and go easy and be careful of his money it would be better for him. Miss Peters may think she's makin' a mighty fine catch, but she'll find there won't be so much style goin' after a while. Anyway, I'll bet they'll quarrel."

"That's all right," said Mrs. McCracken. "Mrs. Peters herself can do her share. I think the minister ought to look to home first. If she'd stay in more and look after her family it would be better for her and him too."
