ered with sheep on the farm. The Ontario breeders of pure-bred flocks having for years been convinced of the certain profit ob tainable from grade flocks properly A Warning-Hang cared for at our annual meeting two years ago, determined to get official data as to cost of keeping ordinary flocks in a common careful manner and secure therefrom some reliable figures as definite results.

The writer having taken a promin ent part in the agitation, was with Col. McEwen, of Bryson, Ont., appointed to select flocks and oversee the details of breeding, feeding, etc., during a two-year experiment.

The minister of agriculture gave we have been able to secure the first official figures ever got in Canada, as to the actual cost of keeping a small flock for a year; the cost finishing the crops of lambs for the markets, in view of the prices wool sold and the returns from lambs as marketed.

Nine flocks of from 10 to 12 ordinary good grade ewes were selected and a ram of each of the different mutton breeds was brought and ewes and the market in which lambs were to be sold.

One flock was placed near Toronto with the aim of producing early lambs for the Easter trade, another flock was placed in Muskoka to furnish summer-finished lambs for the chosen to produce late dropped

There were no unusual conditions that a pure-bred registered ram was placed in each, none of them costing over \$20. The inspectors visited the flocks twice a year to see the printed directions as to feeding, castrating and dipping were attended to at the right time.

Over a month ago the result of the first year's work was received. Mr. Westervet, who has the office end of the oversight, hopes to have the two is characterized by nodular excres- and to-day my skin is as clear and experiments made fully known in bulletin form by mid-sum- than the tuber itself. These "can- Dr. Hamilton's Pills did it all." mer. The first year's figures are kers" affect the eyes of the potato The above straightforward letter quite gratifying even if the prices for finished lambs in early 1911 were not nearly up to those of former

The following are the figures available to date. Average value of flocks including ram\$ 100.00

Total cost of the nine flocks for year Total receipts from nine flocks for year 1167.53 Total profit from nine flocks for year 369.39

Percentage of profit compared with cost .. ercentage of profit on inby fire, and not be thrown on the brought about by the scarcity Best percentage of profit on investment of any one

Lowest percentage of profit on investment on any one

One flock which had the misfortune of losing two ewes and the ram by death; they still gave a percentage! of 172. All feeds were charged flocks at market values and the interest on investment at 6 per cent. opening of the P.E.I. Legislature reper annum was also added. It is ferred to the thriving condition more than doubtful, if anything like fox farming. The House stands : Conas good a profit could be secured servatives 27, Liberals 2. of Croup from similar experiments, with any The Brockville Times (Con.) of our other four-footed domestic poses a protest in South Renfrew.

It is pleasing to note that Mr. D. C. Ross of Woodville, Ont., farming in the north part of Mariposa, is the turn of 71 per cent. on his, investment. It has been the writer's conmetallic cough, and gasps frantically tention for many years that few farms are properly equipped, with a There is no time to send for a view to the securing of the easiest made money, which have not a flock plays in the destruction of weeds. The writer knows of no line of huson this policy-that my son carried spoonful of warm lard or by tickling profitable returns, considering cost and labor as that which can be de rived from a carefully managed flock.
