A NEW ENGINE.

Mr. Frank Austin, of Haliburton, recently purchased a 12 h.p. two-cylinder Fairbanks engine from the local agent, Mr. G. W. Hall.

GRAPHITE MINE.

A graphite mine, recently discovered a short distance from the Village of Haliburton, is said to contain the pure goods, and the enterprising owners, Messrs. Thaver and Johnson, will spare neither money nor pains in having the contents tested.

IS GOING WEST.

Mr. Isaac Deyell, owner of Deyell's well-known celery farm, has hired Mr. John Weldon, of town, to look after the running of the same during the summer months. Mr. Deyell, owing to his health, has decided to take a trip west and will in all probability settle in Camrose, Alberta, for the summer.

READ BIBLE IN 18 HOURS.

A novel achievement has been accomplished in a church at Pecus, Texas. The Bible, from the first chapter of Genesis to the last of Revelation, was read aloud in eighteen hours. There were sixty readers for the task. The first began at six o'clock in the morning, and the last read the concluding words at midnight. Each reader gave up as his or her voice became husky. The congregation was small when the reading began, but at midnight the church was crowded.

A NEW SOLOMON.

Whether a child needs a mother's love or not is a question that has been raised by Justice Marceau, of the State Supreme Court of New York in giving a father custody of nine-year-old son, despite the frantic pleading of the mother. In decid-

ing that the mother should not be permitted to see the child the judge said: "A mother is not necessary to her child. All children are selfish. Their minds are on their own pleasures. So long as they have their toys and enjoyments they are satisfied. Once away from the mother they quickly forget her. She affects their lives only as she can serve them. They grow just as well without her."

ABOUT SHEEP BREEDING.

Mr. James Casey, of Valentia, a breeder of high-class sheep, considers the dealer in thoroughbred stock is not fairly dealt with by farmers, who purchase for breeding purposes. Mr. Casey said drovers place inferior bred males with the farmer for their board, thus cutting out the thoroughbred dealer, who would sell an animal for \$10, the use of which would materially benefit the stock. Mr. Casey will express himself through the columns of this paper later on.

LEAVING LINDSAY.

It will be news to the majority of Lindsay people to hear that Dr. McCullough, Sussex-st., has decided to go West and to settle in Calgary as his new field of labor. The popular doctor figures on leaving about the first of May with his family and it has been that his large and lucrative business in Lindsay pass into the hands of Dr. McIntosh, of Sunderland, late Superintendent of St. Luke's hospital, Ottawa. Dr. and Mrs. McCullough will be greatly missed by their Lindsay friends, who are legion.

Agriculture in Ontario Schools

One of the best systems originating from the Ontario Department of Education is that which has to do with school gardening in the rural districts. There are several schools in Victoria county where the pupils have been educated along good practical lines in regard to proper gardening, and the pupils have left the school with a broader knowledge of the kind of soil required for the growing of various garden products, and how best to care for and grow the same products.

Ontario has no need to be ashamed of its work in agriculture nor in agricultural education. While there is still much to be done, there is no province or state in America that has done more—nor indeed so much! Everywhere attempts are being made in different ways to adjust the work of the schools to the work-day needs of the people. Nowhere can there be found a system of schools making more progress along these lines than the schools of Ontario. It should not be forgotten that our school difficulties are the same difficulties that are being felt the world over.

The good help of every one interested in the welfare of the schools is greatly desired and needed in order to have agriculture taught in our schools. Without a strong public sentiment behind trustees and teachers, satisfactory progress cannot be made along these new lines; the schools will have difficulty in getting out of old ruts and making adjustments in new grooves. It is hoped that everybody in Ontario who is

interested in any way in the work of the schools may become acquainted with the scheme and that a strong public sentiment may favor the general adoption of the work. School boards are encouraged by liberal grants to undertake the work. Where the work is carried out under a teacher holding a certificate in agriculture, an initial grant of \$50 and subsequent annual grants of \$30 can be earned; but no board will receive more than \$100 for the work. Where the work is carried out under an uncertificated teacher, the grant is \$12 when practical work in the school grounds is made part of the course, and \$8 when the practical work by the children is carried out in home gardens. The special grants to teachers range from \$8 to \$30.

The plan is to have one hour a week throughout the year given to the study, which shall be of a practical character and related closely to the local interests of the school. The school grounds will be used for simple experiments as well as vegetable and flower plots. The growing of shrubs, vines, window boxes and hanging baskets to beautify the school and its surroundings will be considered part of the work also. The special grants to teachers in Ontario during 1911 shows that school gardens for which grants were given, increased from fifteen in 1910 to thirty-three in 1911, and that \$2,320 was paid out in special grants. Besides there were over sixty other school reporting work in school gardening. A very large increase is already assured for this year.

The curler's banquet Friday night was one of the most successful of the kind. About forty members of the club sat down to a sumptuous repast in the McArthur house. A good program of song, speeches and toasts were given, after which the prizes were awarded to the winners of the local bonspiel. A game was also played between the Grits and Tories, the Tories being winners by 18 shots. 1st prize, bale of hay, Thos. Cashore; 2nd prize, Bourassa pictures, Dr. H. B. Johnstone.

Terrible Result of Blood Poison

AFTER THREE OPERATIONS ZAM-BUK WAS TRIED AND PROVED SUCCESSFUL. If people would only use Zam-Buk for chronic sores, blood-poison, etc., before permitting an operation, scores of limbs would be saved.

Mr. Robt. Patterson, of North Pelham, Welland Co., Ont., writes: "My daughter, Annie, had blood-poison in her finger. The doctor operated twice on the finger, but did not obtain the desired result, and a third operation was considered necessary."

"Three doctors were present at this operation, but after it had been performed the wound did not heal. As we would we could not get anything to close the wound."

"We at last tried Zam-Buk, and it was really wonderful to watch how this balm healed the wound. Each day there was a marked improvement. First the wound in the palm of the hand closed, and then the finger which had been bad so long began to heal. The diseased flesh seemed to rise out of the wound and then drop off, and now healthy and fresh from below, pushing off the diseased tissue. In a short time the wound was completely healed. Had we applied Zam-Buk at first we might have saved the finger."

"We had another proof of Zam-Buk's power in the case of my son. When two years old he had his hand badly mangled. One finger had to be amputated and it left a running sore for some months. This wound, also, was finally healed by Zam-Buk."

For chronic sores, blood-poison, ulcers, abscesses, scalp sores, piles, eruptions, inflamed patches, eczema, cuts, burns, bruises and all skin injuries and diseases Zam-Buk is without equal. 50c. box all druggists and stores, or post free from Zam-Buk Co., Toronto, for price. Have you tried Zam-Buk Soap? 25c. tablet.

A large home rule demonstration took place in Dublin at which Mr. John Redmond spoke.
