LITTLE LOCAL LINES

News of Town and Country Briefly Told

The baseball season opened up in Lindsay on Friday evening at the agricultural grounds, when the East W.A. defeated the Y. M. C. A. by 8 to 4. Both teams worked well considering the cold weather and that it was their first work out. Five innings were played, and at the end of the fourth the score was a tie but in the fifth the East Warders bagged four more and won out.

A picked team from the Lindsay Town League will play an exhibition game with the I. C. B. U. team of Toronto, in Lindsay, on the 24th of May.

Mangel, Turnip and Sowing Rape: splendid varieties at Higginbotham's drug store.—19-2.

Dan McCabe, the well known ball player of Peterboro, has accepted a position with the Machine Telephone Co., Bradford.

Mr. E. A. Hardy, B.A., who was teacher in the Collegiate Institute here for a number of years, and who was one of the prime movers in the establishment of the Carnegie library here, was on Tuesday appointed to the principalship of Moulton Ladies' college, Toronto.

At the meeting of the Water Commissioners held Monday the following tenders were accepted: McLennan & Co., for pipe, F. T. Boynton, Pittsburg, for coal.

The members of the Lindsay Golf Club play at Rosedale, Toronto, on May 24th.

Remember the Grand Concert by the McMaster Male Quartette, TO-NIGHT, in the Academy of Music. Last week Mrs. F. A. Fairbairn, of Bobcaygeon, whilst burning a lot of old papers in the stove, failed to observe a packet amongst them which contained a gunpowder. She was alone and just as she was about to put on the teapot, there was an explosion, the lid flew up and the flames burst over her, setting fire to her hair and dress. Fortunately there was a barrel of water standing nearby, and by placing her head in the water Mrs. Fairbairn succeeded in extinguishing the flames, and probably saved her life. Mrs. Fairbairn is recovering nicely, and her many friends hope no serious effects will result from her narrow escape.

Enslage and Horsetooth Corns, Turnip Seeds, Mangel Seeds, Rape Seeds, etc., all fresh and reliable, at A. L. Campbell's, Lindsay. The Toronto News of yesterday says: The little son of Mr. J. H. Carnegie, M.P.P., East Victoria, whose serious illness detains his father in Toronto, is much improved, and will be allowed to leave the Children's Hospital in a few days.

The number of maskinogons captured and put over the locks here has reached 59. Perch are very numerous at the locks and the boys are enjoying the sport of snaring them. Minnows, shiners and sunfish are swarming, and there is every indication that this is to be an exceptional season for all kinds of fish.

Sowing Rape, Mangel and Turnip: splendid varieties at Higginbotham's drug store.—19-2. Parties wishing Viavi treatment or information about the same, please call at Mrs. Bartlett's, over Laidley's grocery, Kent-st. Miss E. M. LaHeup, local manager. Cambridge St. Methodist Church introduced the individual communion cup at the quarterly service last Sunday morning.

TO CURE A COLD IN ONE DAY Take LAXATIVE BROMO Quinine Tablets. Druggists refund money if it fails to cure. E. W. GROVE'S signature is on each box. 25c.—5-52.

PERSONALS

Mrs. Allan Gillies, of Toronto, has here to attend the funeral of Mr. J. W. Bradshaw. She is aunt of the deceased. Miss Mae Jamieson, of Glenora, is visiting friends in town. Mr. Alvin Gould, of Fenelon Falls, Messrs. Fred Perrin and J. Thordmike, of Oakwood, were in town for "When Knighthood was in Flower" on Monday. Mrs. Searles and daughter and Miss Carnegie, of Port Perry, were in town Monday. Mr. Bruce Paton, of Buffalo, spent last Sunday in town with his parents. Mr. F. Balles, of Toronto, spent Sunday in town. Messrs. Fred, Bruce, and Bert Hopkins, R. Adams, K. Sylvester, T. Duck, P. Lamb, J. Ross, are home from Toronto for the summer vacation. Mr. H. Lockington, an ex-Lindsay boy, was in town on Monday. Miss Stella D. Shields, of Toronto, was in town several days this week. Mr. H. H. Clarke and W. Laking, of Haliburton, were in town on business on Monday and Tuesday. Mrs. DeGraess and Mrs. Hamilton, of Bobcaygeon, were in town on Monday. Mr. Mat. Gould, the popular cigar traveller for Breuer Bros., London, was in town over Sunday. Miss Jennie Brown, Robert E. Brown and George J. Brown, of Peterboro, were up attending the funeral yesterday. Mrs. A. F. Lane, of Peterboro, spent a few hours in Lindsay on Tuesday. Mr. Allen Gillies, business manager of the Stratford Herald, was in town to attend the funeral of his cousin, Mr. Bradshaw. Mr. William Chambers, of Elsie, left yesterday to open a large camp for Mr. John Carey at Eagle Lake. Friends of Mr. Harry Wesley, who left Lindsay recently for the North-west will be pleased to learn he has secured a remunerative position in the Attorney General's department at Regina, Sask. Mr. "Packie" Lynch, of the Home Bank, Toronto, and formerly of the Bank of Montreal local branch, was in town last Thursday calling on old friends. Mr. "Les" Williamson, of Toronto, came up with the T. O. O. F. trip on Thursday last and renewed acquaintances. Mr. E. Harvey, an old Lindsay boy, was in town Thursday night looking up old friends. Mr. Thos. Begg, who will spend the summer in England, left for Montreal on Monday and sails by the S. S. Tunisian to-day. Mr. J. R. McNeillie spent yesterday in Toronto. Mr. "Toad" Macdonald has obtained a position in the electric works at Fernie, B.C., and left for that place yesterday morning.

DIED

McNEELEY.—In Esqueping township, on May 8th, Margaret M. Neeley, wife of David Reid, late of Ops township, aged 78 years.

SPENCELEY.—In Lindsay, on May 9th, Mrs. Sarah Spenceley, aged 94 years.

STOTT.—In Janetville, on Sunday, May 13th, David Stott, aged 69 years.

BRADSHAW.—In Lindsay, on May 14, John Weston Bradshaw, aged 22 years.

JAMES.—At Cambay, on May 16th, Mrs. Richard James, aged 72 years.

THE AMERICAN FEELING

Loyalty to the Principles of Self Government. Every American should realize that the principle of self government is a higher principle than that of loyalty to the best sovereign, for it is fidelity to the highest good of all and to virtue, intelligence and God. He who shares in the government, gains in moral dignity. His manhood is developed by responsibility. He loves and will maintain a government in which his own and intelligent choice are involved. He will feel that upon his single arm, his single voice, his single life, hangs the preservation of the government and the national freedom. This is the American feeling. It burns in every true American breast.

SWISS EDUCATION

A Serious Matter, Guarded Jealously by the State. To a Swiss, why the Swiss fare well is that their public school system is probably the best in the world, and with them public school education is practically compulsory. You can send your child to a private school (in some cantons) if you insist upon so doing, but the face of the government and the force of public opinion are sternly against the practice. In the canton of Solothurn private schools are absolutely forbidden. In other cantons a private school pupil must secure a formal permit from the local authorities, and in some cantons he must pay a charge to the public funds. The idea is that the public schools are good enough for all; that rich and poor are to meet there on even terms; that the public school is the nursery of democracy and patriotism; above all, that democracy is the lifeblood and strength and very soul of the republic, and the republic is Switzerland, and without the republic Switzerland is nothing. Private schools for Swiss children are few in number, and such as exist are under the strict supervision of the state. Education is a serious matter in Switzerland. There is no escape from it. A parent must send his children to school or go himself to jail. They kept a Seventh Day Adventist in jail for two years because he refused to let his child attend school on Saturdays. As it then seemed likely he would spend the rest of his life in a cell he surrendered.

THE GAME OF DRAUGHTS

So Old That Its Origin Is Lost in the Mists of Antiquity. Draughts in some shape or form is doubtless a very ancient pastime. Indeed, the safest thing to say about it is that its origin is lost in the mists of antiquity. Representations of persons playing at a game resembling draughts are frequently found on ancient Egyptian monuments at least 3,000 years old. The Greeks had a similar game, from whom possibly it passed to the Romans. At least the old Roman game of latrunculi seems to have been a kind of draughts, though it is doubtful if the game as now played is very ancient. The game was popular in the seventeenth century and was probably played there and in England centuries before that.

That it was from France the game came into many of the other countries is evident from the fact that the French name—jeu de dames—passed with it.

Dam or damme was once the regular English name for one of the pieces. In Germany the game is still called damspiel, in Holland the board is dambord, and in Scotland dambrod still survives. In the United States the less usual name of checkers, spelled checkers, is employed. Polish, Spanish, Italian and Turkish draughts are varieties of the same game. The Polish game, which has several peculiarities, was introduced in Paris in 1723 and was at first played on a board of 100 squares with 40 men.—Chambers' Journal.

Ability to See Everything

A New York surgeon, says the International Journal of Surgery, occasionally takes an applicant for a position on the house staff of the hospital with which he is connected and bids him look out of a window and describe what he sees. Some men practically see nothing at all; others notice but a few things, not always the most important, while the balance appear to observe everything. It is from among the latter that the successful candidate is commonly chosen. It is to the men who see everything that every art and science is indebted for whatever progress they have made, and the surgeon's method of gauging the probable value of a young man's service has nothing in it that is trivial and unimportant.

The Ideal Camera

The ideal camera for naturalist purposes is one of the reflex type, in which the photographer can see his object—the size of it will be reproduced on his plate, the right way up—and can see it until the moment of exposure. Such a camera with a long bellows and a lens which is intended for a plate at least one size larger than the plate he is using in his camera and also provided with a curtain shutter which works just in front of the plate, with speeds varying from a time exposure up to one two-thousandth part of a second, in the kind of instrument used by most of the naturalist photographers whose work appears in print—Outdoors.

THE PECTORAL FINS

Without Them the Fish Would Stand on Its Head. The pectoral fins of a fish are the two fins, one on each side, just back of the head. These fins aid the fish to some extent in swimming. They are somewhat like the fish feathers very carefully and are of value chiefly to preserve its equilibrium. It is with these fins that the fish maintains its horizontal position in the water when not swimming. Without them the fish would stand on its head. Sometimes a fish loses one or both of its pectoral fins by disease or by accident. A fish without pectoral fins is in a bad way.

While most fishes keep a horizontal position in the water when not swimming, there are fishes that do not. One of these fishes is the filefish, which when motionless suspends itself in the water, head downward, at an angle of forty-five degrees or even nearer the perpendicular. A filefish that is in an aquarium which had lost both its pectoral fins inclined over backward to the perpendicular when motionless to the same angle that it would have kept in the other direction if its pectoral fins had been intact, so that when not in motion it seemed to be lying at an angle on its back.

In the same aquarium there was a striped bass weighing about a pound and a half, one of whose pectoral fins was attacked at the tip by fungus, which gradually encroached upon it. Finally the diseased portions of the fin were cut off with a pair of sharp shears, the cut being made within the sound part of the fin. At first the fish was like a man in a boat pulling one long oar and one short one—it couldn't hold a course. But it soon accustomed itself to its new condition, and thereafter it got along very comfortably.

SWISS EDUCATION

A Serious Matter, Guarded Jealously by the State. To a Swiss, why the Swiss fare well is that their public school system is probably the best in the world, and with them public school education is practically compulsory. You can send your child to a private school (in some cantons) if you insist upon so doing, but the face of the government and the force of public opinion are sternly against the practice. The Canadian Order of Oddfellows

will run their annual excursion to Niagara Falls and Toronto on Wednesday, June 6,

by special C. P. R. train to Toronto; thence by steamer to Fort Hamilton and electric railway to St. Catharines and Niagara Falls. The best trip of the season. See posters.

Success is like a generous wine which begins by exciting the intellectual faculties and ends by plunging us into a stupid intoxication.—Bouvard.

Gunpowder

The explosive nature of gunpowder, which is made of charcoal, sulphur and saltpeter, is due to the fact that when fired the charcoal and sulphur are burned at the expense of the oxygen in the saltpeter, much heat is developed and large quantities of gas are produced. This gas exerts great pressure on the sides of the gun; hence its disruptive or propulsive effects. When gunpowder is fired in a gun the explosion is not instantaneous. The expansive force of the gas produced acts on the shot all the time it is moving along the barrel and gradually increases its velocity. If the explosion were so sudden as to be practically instantaneous the greater part of the forces would be exerted mainly on the sides of the chamber containing the powder and not, as is actually the case, on the shot.

Hasheeb

Hasheeb, or the Indian hemp, is a resinous substance produced from the tops of the plant in India. Some authorities state that it is gathered by men who dress themselves in leather clothing and run to and fro in the hemp fields, afterward scraping off the resin from their garments, while other authorities say that it is gathered by rubbing the tops in the hands and afterward scraping the hands. Its narcotic properties are well known.

Old Ships in Norway

Norwegians have a primitive way of breaking up old, worn-out wooden ships. They take them to exposed rocky parts of the coast and, after anchoring them, leave the brakers of the next storm to smash them to pieces. After the storm the floating fragments are picked up and sold for firewood.

Anxious to Repeat It

Beck (despondently)—I said something my wife didn't like, and she hasn't spoken to me for two days. Fock (eagerly)—Can you remember what it was you said?

Success is like a generous wine

which begins by exciting the intellectual faculties and ends by plunging us into a stupid intoxication.—Bouvard.
