G. A. W. SPARLING. 127 BAY ST., TORONTO.

INVENTION FOR THE

THE EVANS VACUUM CAP is a practical invention constructed of scientific and hygienic principle's by the simple means of which a free and normal circulation is restored throughout the scalp. The minute blood ve sels are gently stimulated to activity, thus allowing the food supply which can only be derived from the blood, to be carried to the hair roots, the effects of which are quickly seen in a healthy, vigorous growth of hair. There is no rubbing, and as no drugs or chemicals of whatsoever kind are employed there is nothing to cause irritation. It is only necessary to wear the cap three 6 four minutes daily.

### 60 DAYS' FREE TRIAL

### Tne Company's Guarantee

An EVANS VACUUM CAP will be sent you for sixty days free trial If you do not see a gradual development of a new growth of hair, · convinced that the Cap will completely restore your hair, you are at return the Cap with no expense whatever to yourself. It is requested. evidence of good faith, that the price of the Cap be deposited with the ery Lane Safe Deposit Company of London, the largest financial and business institution of the kind in the world, who will issue a receipt guaranteeing that the money will be returned in full, on demand without questions of comment, at any time during the trial period.

cess, the problem of hair growth would be solved. Later on, when the EVANS VACUUM Car was submitted to him for inspection, he remarked that the Cap would fulfil and confirm in practice the observations he had previously made h

DR. W. MOORE, referring to the invention, says that the principle upon which the Evans Vacuum Cap is founded is absolutely correct and indisputable. An illustrated and descriptive book of the Evans Vacuum Cap will be sent

Ore From Cobalt. Though it is still early to make any estimate of the amount of ore likely to be sent from the Cobalt camp this year, an authority on such subjects said that it would not run under ten million dollars in value. Neither did he think the value would go over fifteen millions. There is some talk of having a spur line of railway to connect with the Portage Bay district. It is claimed that a good route may be obtained by having a junction point a little north of Latchford and then run the line up through a valley where there will be little or no grade. Doubtless this proposed line will be num-bered among the preliminary surveys to be made by the T. & N. O. con
