SUNSHINE FURNACE

UNBREAKABLE FIRE-POT

The lower portion of a fire-pot is usually nearly or partly filled with dead ashes, leaving the live, red-hot coals in the upper part. The result is that the upper portion expands much more than the lower.

This uneven expansion causes a strain too great for a one-piece fire-pot to stand. Sooner or later it will split, allowing precious heat and sickening gases to escape.

But the fire-pot of the Sunshine is constructed to meet this condition. It is in two sections. The upper half expands, as much as necessary, independently of the lower. When cool, it contracts back to its original size, fitting to the lower half perfectly.

And this strong, unbreakable, gas and heat-tight, two-piece fire-pot is just one of the many superior features of the Sunshine.

LUMBER AND THE WEATHER.
Mr. R. G. Lucas, Government lumber ranger, has just returned from an official visit to the northern part of this county and Haliburton County. He visited Norland, Cobocook, Minden and Kinmount, collecting the timber returns from the various lumber companies in those districts. The drives, Mr. Lucas stated, were in full swing in the northern country and they will soon be reaching their destinations at the various sawmills.

The weather up north is very similar to what we are experiencing here. The snow has all disappeared but little warm weather has prevailed.

WARSAW MAN TO RAISE FOXES.
Mr. Fred Calder, of Warsaw, was the lucky capturer of five young foxes on Thursday afternoon, which he intends to raise himself. While out in the woods during the afternoon he saw them playing around the mouth

of their den. He went home and secured a shovel and after a few minutes digging had the young foxes in a sack.

Mr. Calder intends digging out a few more dens and will keep a few farm this summer. He will feed them on woodchucks which are more plentiful than the foxes in that district.

A BIG 24th OF MAY EGG.
The Peterboro Examiner says: "There's one hen in this town that has got things mixed. In the hole that this was Easter time, instead of the 28th of May. The mistake probably occurred by reason of the weather—a hen belonging to J. Jinks, who is factory, yellow-haired Turner & Sons' laid an egg got busy and laid an egg weighed six ounces. About two and a half of these eggs would have weighed a pound, whereas ordinary eggs eight are required to weigh a
