George V. Will Be New Monarch Make Them

His Popularity Even Before manifested a decided inclination for He Became Heir Representative

The people of Great Britain are to be congratulated on their good fortune in pessessing at a critical moment of the dynastic succession a man who can command their entire confidence and respect. The British populace have watched with an anxiety no one not a Briton could understand the increase of the royal ramily by birth and its decimation by death until all their hopes have been centered upon the man who stood next in succession to Edward VII. and who, with a mere change of title, would become "of the United Kingdom of Great Britain and Ireland and of the British dominions beyond the sea king, defender of the faith, emperor of India," and until assumption of the kingly office latterly known as George Frederick Ernest Albert, prince of Wales, etc.

Since the death of his elder brother, the Duke of Clarence, George has been the cynosure of all eyes within the confines of Great Britain and his every movement has been watched with intense solicitude. Of the six children born to King Edward and Queen Alexandra when they were, respectively, prince and princess of Wales, one boy died at childbirth, and the eldest, the Duke of Clarence, died in January, 1892, leaving three daughters and the second son.

Prince George, after the death of his elder brother heir presumptive and after the death of Queen Victoria heir apparent to the throne, was born at Mariborough House, London, June 3, 1865, only seventeen months after the Duke of Clarence, and was christened at Windsor the month following. From his earliest years destined for the navy as well as preferring it from inclination, George was entered as a cadet on board H. M. S. Britannia at Dartmouth when eleven years of age, and in 1879 he and his brother began a cruise around the world in the Bacchante. The schooling of the young princes went on while they were voyaging, and in 1880 both were rated as midshipmen, the event being celebrated by their shipmates in a minstrel performance.

After their return the two brothers were confirmed by Archbishop Taits who in his remarks on the occasion set forth the difficult duties of a sove ereign, in the last address of the kind he ever delivered. "It would be presumptuous to prophesy," he said, "what may be the duties or the difficulties of a future king of England; From this time forward your course of life, which has hitherto been unusually alike, must in many respects diverge. You will have different occupations and different training for an expected difference of position. But brothers united by a true affection may do much to help each other in all difficulties, though their streams of hie

may flow apart. . The words of the worthy archbishop did not prove prophetic, as recent history has snown, for by the death of Clarence "Sallor Prince" George not only stepped into the succession, but was finany married, on July 6, 1893, to Princess Victoria May of Teck, to whom his brother had been affianced less than three years before. The wedding took place at the Chapel Roy-

al St. James, the Duke of York wearing the uniform of captain in the royal navy and being supported by his father, the then Prince of Wales, and his uncle, the Duke of Edinburgh.

Four children have been born to the royal couple, the heir apparent being Edward Albert Christian George Patrick David, whose birth occurred at White Lodge on June 23, 1894. The three others in sequence are: Albert Frederick Arthur George, born Dec. 14, 1895; Victoria Alexandra Alice Mary, April 25, 1897, and Henry William Frederick Albert, March 31, 1900. Little Prince Edward, the heir ap-

sueance company in the kingdom is Geo. Bagshaw. affected more or less.

ticipation of his purposed departure on the long cruise around the world in the Ophir, which terminated only a few months ago. The thousands of beautiful gifts received on that eventful and in many respects wonderful voyage were still on exhibition when King Edward was stricken with his malady and afford a sad commentary upon the fitfulness of fate.

These gifts not only evidenced the loyalty of the colonists, but were in many instances tributes to the great popularity of the prince throughout his career. Even when his brother, then heir presumptive to the throne, was alive England's "sailor prince" was more in favor than the Duke of Clarence, and indeed his disposition was altogether different. He has the reputation of having been rather gay when popularly supposed to be sowing his wild oats, but in the main, though Sailor George was at times a bit wild and boisterous, he was never dissipated to the extent related of some of his Sunday. ancestors in the male line.

Since his marriage he has won the respect of all classes by his dignified and sedate bearing on all public occa-

Mr. Beecher Downer visited friends in Lindsay over Sunday.

Express their Regret

ucation held last evening the lowing resolution of condolence was passed unanimously by those pre- violets. sent, and the same will be forwardhour of bereavement :

"We, the members of the Lindsay Board of Education desire to place on record our sincere regret occasioned by the death of His Majesty King Edward VII. We deplore demise of a Sovereign whose reign was devoted to the propogation peace at home and abroad, and under whose Imperial sway neither was the Constitution overstepped nor even a strain put upon the bulwarks of popular government.

As a citizen of a self-governing member of the Imperial family of the British nation, while sorrowing at the death of our popular and beloved King Edward VII., we also hail with fervent zeal and loyalty the accession of George V. to the throne, so nobly filled by his late lamented father. We also place on record our Mrs. (Rev.) A. J. Mann and son, deepest sympathy for Queen Alexan-

" The Brake That Makes the Wheel Run Easy"

Hercules Coaster

AMOS PARKER WILDER, Ph.D., Editor, Winconsin State

Journal, Madi on.

"I use a new wheel with coaster brake between my office and summer cottage. The distance can be covered in 17 minutes, but a as 25-minute ride the experience is rich and restful and uphuilding. Not at such times does one ask, 'Is life worth living?'

There were brakes sold in Canala last year than all others combined.

One reason for the "Hercules" popularity is that it is lighter in weight than any other. The "Hercules" is an armless brake, a great feature in any bicycle. Aso it is patheticaty simple. A child can take it apart and reassemble t.

Hercules Coaster Brake

Positive in action and easy running when released. wears well because it is solidlysimple and there are no intricate

parts to get out of place or become damaged in the wear.

THE HERCULES IS AS SMALL AS THE ORDINARY HUB OF A BICYCLE.

Listless, Backward Children Made Bright and Active by Dr. Morse's Indian Root Pilis

Many a growing boy or girl is set tionally slow, stupid or lazy when it is really a question of inactive bowels, lazy liver or sluggish kidneys. The growing child, with a hearty

appetite, certainly cannot long remain healthy and bright if the sewers of the body, the bowels and the kidneys, are choked up with impurities that should be thrown off promptly.

The muddy complexion, dragging limbs and dislike for mental or physical effort show plainly that the child needs Dr. Morse's Indian Root Pills to sti up the liver and kidneys and regulate the bowels. Dr. Morse's Indian Root Pills do this most effectively, cleansing the whole system, purifying the blood, siding the digestion and giving plenty of life and activity. As upon the education obtained may depend the success in life of your boy or girl-see, to it that the general health of the child is such that study is pleasure and not a hardship.
