CAMERON.

Cameron, May 1 .- The fine weather of the past week made the land quite good condition and consequent ly the farmers have succeeded getting quite a good acreage sown. The fine warm rain on Sunday also made things quite fresh green looking, and will prove great boon to those who were short fodder. Fall wheat is

badly killed in patches and this will necessitate the plowing of some it up or of sowing barley in among it for feeding purposes.

The Women's Institute of Camero of Donald, are spending a few days met at the home of Mr. Worsley on Thursday the 20th inst., and a royal good meeting it was. Quite a number of useful papers were Several visitors were from Islay and other institutes. Aland the institute is in a very flour-

ishing condition and is proving boon to the ladies of the community, enabling them to pass a social hour together and thus relieve the monctony and drudgery of every day life. The next meeting will held on Thursday, May 1, at home of Mrs. Henry Mark.

# WEATHER PROP

A regular storm period having its beginning in April will have its culmination in eastern part of the country, the first two or three days in May. A seismic period also reaches into the same days. A wave of high er barometric pressure will follow from west and north bringing cooler cury period, which came into May from April, will last until after the 10th, causing prolonged cloudiness. and intensifying regular and reactionary storms which fall under its influence.

A reactionary storm period will culminate on and touching the 4th and 5th, and the period being under the influence of the mercury equinox, will bring storms of rain, with constress of the Mercury period, solar conditions peculiar to this month very severe storms are probable at this and other May periods. High barometer with very cool weather with probable frosts northward will be the natural order from about the 5th to the 8th-first to the west and north, advancing eastward and southward.

A regular storm period covers the 9th to the 14th, with moon on the celestial equator on the 9th and full on the 13th. High temperature, fall ing barometer and electrical storms Will appear about the 9th in western extremes, and from Wednesday the 10th to Sunday, the 14th, these conditions will progress to the eastward Causing general and violent storms in many localities. From the 10th to the 16th constitutes a period of seismic strain that will very probably cause carthquake shocks and shivers in many parts of the globe. marked change to high barometer and cooler, with probable frosts at night northward should be no surprise from about the 13th to the

A reactionary storm period bring return of warm weather, falling barometer and storms on and touching the 17th and 18th. Those who have followed us for years tell that the solar eye is focused along the central parallels of the northern hemisphere during May, and hence violent electrical and tornadic storms often reach a maximum at this season. There is no special indication of such storms at this period at the sam time, approaching storms will to calmly and carefully scanned, Expoet change to much cooler after see storms for several days. A regular storm period falls from
