Cash and One Price.

Dr Samson Shows How the Declining Years of Life May be Provided For

The attendance at the lecture on Canadian Annuities by Dr. Samson last night was small, but the lecture was an excellent and very instructive one. The subject of his discourse concerned one of the most vital questions of the present day, that is the question of providing against want and poverty and for that happiness with the removal of the haunting fear of destitution in old age.

"What We Have We Hold" Was Feeling of Citizens In Regard To Sylvester Proposition

A very enthusiastic meeting of the citizens was held in the council chamber last night to consider the Sylvester proposition and the room was crowded with people deeply interested in the re-organization and the unanimous feeling is that the factory will again be running within a very short time, on a firm financial basis.

Mr. W. F. Sutcliffe, President of the board of trade called the meeting to order, stating that they had decided to dissolve the meeting into a citizen's meeting instead of a meeting of the board of trade and he called upon Mayor Beal to take the chair.

The Mayor called upon Mr. Fielden to explain the purpose of the meeting which he stated was to consider the Sylvester matter. He stated that he had been connected with the firm for about three months and although he had seen many such concerns he stated that the Sylvester Manufacturing Co., looked far better than any he had before seen, the assets and the business giving promise of a most successful proposition if it were properly organized.

Mr. McComb, the assistant engineer in the re-organization work was the next speaker called upon and he gave a brief outline of the work he had done, stating that on April 6th he had been asked to come to Lindsay and to examine into the affairs of the Sylvester Manufacturing Co., for the purposes of determining, just what could be done for the re-organization of this company and placing it on a firm financial basis.

After going over the situation in the implement trade he had come to the conclusion that either one of the two things could be done. Let him had contemplated the sale of the plant to a firm which was buying up numerous small concerns. He stated that the plant could be sold to this concern and they would be through with it.

Mr. McComb stated the price of the machines could be cut a certain amount to allow them to be sold for cash; thus where a drill sold for \$80 on one or two years time they would sell it for cash for \$50.

French "Crippen" Strangled His Wife--Married Again

Paris, May 11. — A man named Victor Gaubert has been arrested in the village of La Penne, near Mar-seilles, for the murder of his wife under circumstances which are curiously like those of the Crippen case.

Victor Gaubert was an engineer in the French fleet. But he struck his superior officer, and was sentenced to twenty years hard labor. He served nine years and was then set at liberty for good conduct.

Some years ago Gaubert and his wife Eliza came to live in the Villa Rosita at La Penne. On October 10 last year Eliza disappeared. Her husband told the neighbors that she had gone to Mauritius to visit her family.

He expressed great grief at her desertion of him, saying that she had gone without his permission and that he believed she was in love with another man.

Soon afterward Gaubert announced his wife's death, and after some months he married a girl named Antonia Sidoles at La Penne. The two lived at the Villa Rosita until three days ago, when Gaubert's lease expired, and the landlord took possession of the house.

Some necessary repairs had to be made and in making them the workmen noticed that tiles of the flooring of the scullery had been taken up and put down again unevenly. They

Many Canoes, Motor Boats, Boat Houses Destroyed In Fire at Peterboro

In regard to the fire at Peterboro, referred to in last night's Watcher, a despatch says: As the result of a fire breaking out in the old bridge works \$30,000 damage was done.

Part of the building was operated by Messrs. Housley and Sons as a paint mill, and another part as a boiler plant.

Twenty-five boat-houses, situated along the river, close to the bridge works, were destroyed, with considerable part of their contents.

Two freight cars, one full of canoes, ready to be shipped by the Canadian Canoe Company, were consumed by the flames, and three motor cars in a nearby repair shop were burned.

The bridge works was totally destroyed. The damage is partially covered by insurance.

Why Should I Belong To W. C. T. U?

The regular meeting of the W.C.T.U. was held recently at the home of Mrs. P. Mitchell with the President, Mrs. A. M. Paton in the chair. Mrs. Wilton, of Brandon, read a very interesting paper on "Why we should belong to the W.C.T.U." which was followed by a paper by Mrs. George Ray, bearing on the same subject.

Why should I belong to the W.C.T.U.? Because every Christian woman is needed in a work having for its object the protection of the home because in union there is strength and in union there is power.

The most delicate threads when sufficiently multiplied will form the strongest cable. Salter says: "Forces when acting singly are utterly impotent, but are when acting in combination resistless in their energies; mighty in their power. This truth has been established by the forces of the W.C.T.U., the largest organization of women in existence."

The Women's Christian Temperance Union was born of prayer, and has been based upon Christianity. "Make a Chain," saith the Lord, for the land is full of bloody crimes and the city is full of violence." The W.C.T.U. is a woman's chain that is fast encircling the world.

Every woman organized is an added link, and every member gives additional strength to the chain. By co-operation many things are possible that single individuals cannot bring about, and by it women are being helped socially and intellectually.

This woman's chain is for the protection of the home, of society, and all humanity. "For God and home, and every land."

"Why should I belong to the W.C.T.U.? Because you are a woman and to you is intrusted the moulding of the men and women of the future. Christian work must begin in the home, and a woman reigns in the household. She must therefore mould society. To do this individual effort is not sufficient, so then we organize. Every white ribbon woman must realize that she is, in a measure, her brother's keeper."

Again because the Christian Temperance work is largely preventative work. Tears for the drunken son do not mould the future of a man like training him when a child. The method of the W.C.T.U. is to teach an equal standard of purity for both sexes. To instruct the boys, showing them that there is not one code of morals for them and another for their sisters. That the blessing for the pure in heart, is for both and that all sin is equally sinful in God's sight.

Mothers above every other class, should belong. The eyes that daily look into yours with such childish love and confidence, may soon be dazzled with the glitter of the saloon. Somebody's son must help to keep up the ranks of the great army of drunkards. Most it be your sweet boy? Christian Temperance Union means comradeship. Women who have previously led solitary lives, whose home duties prevent them from mingling in society, can here find the kinship of kindred souls that every woman craves. One hour each week or month, "where friends hold fellowship with friends," will help a woman to bear more patiently the daily friction of daily cares that come, more or less into the lot of every woman. This little knot of white ribbon is the token of kinship and pledge of sisterly love.

If your talents now lay hidden rolled away in the napkin of reserve and fastened with a tie of timidity in the W.C.T.U. they will expand and be free from rust, and kept bright by constant use in the service where "we wage our peaceful war." Come and help us to make a chain against the bloody crimes that are in our land, through the curse of strong drink.

"The Master is cometh and calleth for thee. I felt at last that the call was for me. And timidly answered the darkness through. "Lord, what wilt Thou that I should do?" This is the question for every woman to ask when she enquires, "Why should I belong to the W.C.T.U.?" Earl Grey will unveil the statue to Queen Victoria at Berlin on the 29th inst.

For Family Use

AN IDEAL REMEDY FOR COUGHS, SORE THROAT, CATARRH, WEAK CHEST.

After having made a special study of the treatment of the throat and lungs for twenty years, Prof. D. Jackson states that in his opinion no preparation for general family use is so efficient, so healing, so certain to cure as Catarrhoxone.

As his reasons for making this claim for Catarrhoxone, Dr. Jackson says:— "Catarrhoxone is free from opium."

"The patient can breathe its rich, balsamic fumes direct to the diseased spot."

"It is a remedy that treats and cures causes—prevents disease spreading."

"Reaches the innermost recesses of the throat, nose, bronchial tubes and lungs."

"Alleviates chest soreness. Stops coughing instantly. Prevents bronchial irritations. Relieves clogged nostrils. Cures sniffling and nasal catarrh. Prevents La Grippe."

"Has proven itself a cure for weak lungs, loss of voice, speakers sore throat, asthma, bronchitis, catarrh, coughs, colds and Winter ill."

Catarrhoxone is unquestionably the world's greatest breathable cold, cough and catarrh medicine, and being free from all drowsy drugs, entirely safe for children and old folks; it makes an ideal family remedy. Recommended by the medical profession, and sold by all reliable dealers. Beware of imitations, get "Catarrhoxone" only; large size lasts two months, and is guaranteed, price \$1, smaller sizes 25c, and 50c. By mail from the Catarrhoxone Company, Kingston, Ont.

CARRIED POWER BY-LAW. The Seymour power by-law, which was voted upon Monday in Millbrook, was passed by the large majority of 191. Only one vote was recorded against the measure. The passing of the by-law will mean a 24-hour service for the town, and all the available power required at the cost of 25c per horse power. The old plant has been taken over by the company, and work on the new station will be commenced at the natural market. They could intro-duce economies into the factory, and produce the drill at \$80 and still make enormous profits, stating that he did not think such an excellent proposition has ever been excelled. It was up to the town, he stated, as it had to be a Lindsay enterprise before they would get one dollar of outside money and that the Sylvester Co. could go on with increased pay roll.

THE INVENTOR'S SON. Mr. Charles Stevenson, son of the inventor of the Sylvester drill was next called on and gave a short but interesting account of the manner in which his father invented the drill, stating that when perfected that his father had taken it to the Monitor Drill Co., in the U.S., who at once made a contract with him to pay the largest royalty ever paid for a drill and that the sales were so great that they had to buy out the royalty paying \$125,000. The drill used by this company he stated was much the same as the Sylvester Co., and that the Lindsay drill stood with out peer, also giving proof of the great demand for it. He explained that the Sylvester Co. owned the patent for this drill for Canada, where there were even greater opportunities than in the States, stating that it was up to Lindsay to make the Sylvester Co. a monument through generations.

Mr. John McComb was next called on and stated that he represented the Steel Company in Pittsburgh, which sold the steel for the drills. As a creditor he stated that after looking over the figures he thought it would be a shame to sacrifice a business like this simply because they had not the chance. He also went on to state that he had gone through the plant and saw finished drills amounting to over \$18,000, being business for which the company had actually received orders for. He stated that the organization all the elements to make a safe prosperous business, stating that it was the purpose to have the town represented on the management and that if re-organized the company had a great future before it.
