His satanic majesty seldom wastes any time trying to tempt a busy man.

Mr. Thos. Rowntree, Peterboro's oldest resident died at the age of 94. Dr. John M. Stewart, a highly respected physician of Chesley, died after a long and trying illness.

The Welsh coal miners are dissatisfied with the minimum wage scales fixed by the district boards.

I suppose you couldn't get any life insurance, said the automobile tester's friend. Oh, yes, said the chauffeur, I'm a good risk. It's the people along the road who are barred.

Here is a Woman of very Few Words

TELLS WHY SHE RECOMMENDS DODD'S KIDNEY PILLS.

SHE WAS RUN DOWN, HAD DARK CIRCLES UNDER HER EYES AND HER KIDNEYS BOTHERED HER—DODD'S KIDNEY PILLS CURED HER COMPLETELY.

Upper St. Rose, Gloucester Co., N. B., May 24.—(Special)—"Dodd's Kidney Pills are a grand medicine for suffering women." In those words Laura Robichaud, a well known and highly respected resident of this place, voices her sentiments in regard to the grand old Canadian kidney remedy. And, like others who have borne similar testimony, she speaks from experience.

"I can recommend Dodd's Kidney Pills because they cured me," Miss Robichaud says. "I was in a generally run-down condition. I had dark circles under my eyes and my kidneys bothered me. Two boxes of Dodd's Kidney Pills fixed me up." This statement is made up of few words, but it describes the exact condition of thousands of women in Canada. They are run-down have dark circles under their eyes, and they may not even know it, but their kidneys are bothering them. If they follow Laura Robichaud's example and use Dodd's Kidney Pills good health will follow naturally. They will cure their kidneys, and

REAL ESTATE

At the annual meeting of the Imperial Bank, the President, Mr. D. R. Wilkie, warned his shareholders and the public at large against every indulgence in real estate speculation.

His words bear repeating in full—"The extraordinary advances in the prices of city property not confined to any one province is alarming. From Pacific to Atlantic values have advanced 200 per cent., 300 per cent., 400 per cent. and even 500 per cent. Enormous profits have been realized and enormous obligations incurred. How and when the rise in values is to end it is impossible to say, as even sober, level-headed financially responsible men are amongst the most enthusiastic speculators. Bankers find it difficult to prevent customers engaged in legitimate pursuits using their commercial credits in the purchase of and, for which they have no legitimate use. I should not be at all surprised to hear of failures and defalcations as a result of speculation in real estate, and of a waste of capital which must result from the investment of borrowed money in ventures that bring in no immediate revenue, the reinstatement of the invested capital in legitimate business being dependent upon realization at still higher figures than cost."

How to Handle Mares With Foal

(S. M. Bird, Wellington Co., Ont.) I feed my brood mares hay three times a day, clover, timothy, or mixed, but not very much, just enough to keep them eating for about an hour to an hour and a half; if they are fast eaters an hour will be plenty. A carrot is given twice a day, and oats enough to keep them covered with a fair coat of flesh. If I have no work for the brood mare I turn her in a field once or twice a day. If the field gets soft I have a yard already for the brood mare men say that brood mares should not be turned out when weather is rough, but I turn them out in the greatest storm if it is not raining. Of course I don't keep them out long; just time enough to take a good run.

WORK FOR THE MARES.

I groom my mares a little nearly every day. In winter I work them at all kind of work, heavy and light, but I take care that they do not slip too much. In spring the brood mare will help to do all kinds of work. I have hauled manure all day with a mare and the colt come all right at night. It will not hurt the in-foal mare to work right up to foaling time if they are not driven too fast. We all know that a mare with foal is not so long in wind as another horse.

Before and after foaling I see that the mare has a good box stall with no holes in the manger or walls where the mare or colt could get caught, and that there is plenty of straw on the floor. After foaling I tie the navel cord and cut it off if it has not torn off itself. I would sooner see it off when I come than to cut it.

I dress the navel with a dressing of one part of carbolic acid to 20 parts of water. I use this dressing three and four times a day for several days. Always see that the navel looks dry and black before stopping the treatment. Other points of importance are to see that the colt starts to suck and that the black manure balls come away in time.

It is now stated that Mr. Hays successor will be chosen from among the present Grand Trunk officials.

Children Cry FOR FLETCHER'S CASTORIA

Edward Sampson, a remarkable and somewhat noted character made himself the most conspicuous figure on Kent-st. on Saturday last. Sampson had the great patriotic feeling of the true Britisher worked up to fever heat in his dome of thought after the 24th May, therefore he wrapped himself in a large Union Jack, and sallied forth on Kent-st. south side, with a host of little boys after him and as many dogs barking. His hat was adorned with a row of tooth picks perpendicularly arranged in the band, that gave it the appearance of a miniature fort to repel the attack of an enemy. Chief Chilton recognized the dress as being out of the ordinary, and asked the wily Sampson to disrobe, which the latter quietly did. The officer gave him good advice and folded the garment of many colors, presented it to Sampson, who quietly decamped for the country.

Eight motor boats were swept away in the flood at London. Andrew McKinley, a farmer of Manvers, was found dead. He is a successful farmer who is able to raise a mortgage.
