A WOMAN'S ADVICE

To Those Who Suffer from Headaches, Backaches and Ailments Peculiar to the Sex.

Every woman needs plenty of pure, rich, red blood and sound nerves to carry her safely through her times of pain and sickness. Dr. Williams' Pink Pills are good in a special way for women. They actually make new health-giving blood. They give ease strength and vigor. They stimulate all organs to perform their functions regularly and well. They banish all pains and depression, all headaches and backaches, and all the secret distress that only a woman knows.

Dr. Williams' Pink Pills bring the sparkle to dull eyes and the rosy glow of health to cheeks once pale and pinched with silent suffering. They bring health and strength when all else fails. Here is a bit of strong proof from Mrs. John McKerr, Chickney, N.W.T., who says: "For some years I was greatly afflicted with the ailments that make the lives of so many of my sex miserable. I tried many medicines, but found nothing to relieve me, until I began the use of Dr. Williams' Pink Pills. These pills have made me feel like a new person; that almost continuous suffering I endured has passed away, and life no longer seems the burden it once did. I know other women who have been similarly benefited, and I think the pills are worth their weight in gold to all who suffer from female complaints or general prostration."

All over the land are suffering women who can obtain new health and strength through the use of these pills. Only the genuine should be taken and these bear the full name, "Dr. Williams' Pink Pills for Pale People" on the wrapper around every box. Sold by all dealers at 50 cents a box or six boxes for \$2.50, or sent by mail by writing to the Dr. Williams' Medicine Co., Brockville, Ont.

CANADA'S NEW DESTINY IS NOW BEING APPROACHED

Rev. L. S. Hughson B. D. Thinks Good Men Should Enter Public Life

At the meeting of the McMaster Alumni Association recently (Rev. L. S. Hughson, B. D., pastor of the Baptist church gave an address on "The College and Citizenship," which was thus reported by the Toronto News:

"McMaster," he said, "has been called into being to fill a high and noble purpose in the culture of her students and their preparation for practical life. Therefore her alumni have devoted themselves largely to the ministry and the schools. I wish to suggest that there is a call to widen our horizon and think seriously of service outside of school or church or profession, and to devote some attention to the need of our country for men to conduct public affairs. Canada is on the eve of a larger destiny; whether it will be nobler is not revealed. In political affairs at least we are no longer in a position to stigmatize the corruption of our neighbors. Without referring to cases now sub judice, there is ample evidence of wide corruption in political contests. Leaders are enjoying the people, while party prejudice and infatuated loyalty make the people an easy prey. The need of the hour is for men of intelligence broad-mindedness, independence of judgment, knowledge of history, knowledge of law, calmness of judgment, and power of speech, to champion the cause of the people and clog the efforts of political charlatans. Such qualities are products of education. If our doctrine of separation of Church and State is with-holding good men from service of the nation, we need to revise our creed or modify its application. I suggest that young men the product of our Christian school, should dedicate themselves to the political life with a high aim, and even if our paths may lead in other professions, yet is it now the need of the hour, if Canada is going to be great, that the men of culture devote time to civic affairs in advocating good measure and putting forth and supporting good men and hindering evil."

A C. P. R. passenger train attempted to cross a weak trestle over an arm of Moose Lake near Rat Portage on Wednesday of last week. The engine and one freight car crashed through and the driver and fireman were killed.

Honey should be kept in a dry, warm spot—not, as is usually done, in the cellar. As it is naturally moist, it is likely to attract more moisture and get thin if placed in the average cellar.
