Is the Earth Round?

To the Editor of the Watchman-Warder,

Dear Sir,-Since the great disaster at San Francisco I have given some thought to the question, "Is the earth round ?? I know it is taught in our schools for an established fact 25,000 miles circumference. that it is of spherical form; and I was one that believed it-till very lately. But it is only a theory; and it has been said: "Theories are you, Mr. Editor, I am yours, things of uncertain mode. They depend in a great measure upon the humor and caprice of an age which is sometimes in love with one, and sometimes with another." Copernicus admitted that his system was merely an assumption, incapable of Editor Watchman-Warder, demonstration. Here is what he laid about it: "It is not necessary that hypotheses (suppositions or thories) should be true, or even probable; it is sufficient that they lead to results tion" invented by Copernicus; the carried from no case of necessity the cimity is up as high as \$150 per foot. premises are never proved; no proof argument will carry still more weight This was also confirmed. is considered necessary., It is deemed If it could be argued that deeds of sufficient that the assumptions: ap- mercy were being performed or sufferpear to explain the selected phenom- ing alexiated, or that those in danena. Astronomical science assumes ger were being removed to a place sitions. It then applies these to the ified; but the real object seems to be the people of Lindsay and surroundexplanation of certain phenomena. for display or an advertising scheme ing district has just been completed. If the solution seems convincing it for the different societies to which Messrs. J. Sutcliffe & Sons having is considered that the propositions the church and minister give their purchased from the estate of the may be looked upon as proved. sanction. Seating space is arranged late J. Sutcliffe the Peterborough Facts are set aside as unworthy of for the brightly bedecked officers and business, consisting of about \$25,notice; since that which is already members and a specially prepared 000 worth of well selected Millinery, assumed seems to explain matters, address by the minister who comwhy trouble further. pride of learning, and canting formulate the sold separately if so demand the sold separately if sold separately if so demand the sold separately if sold separately if sold separately if sold separa their standing in the front ranks of for them to trample the laws of the M.A.; J. M. Warner, B.A.; C. S. ively, or in case such adjoining own-sired. If the earth is a globe 25,000 miles compet others to break them their serin circumference, the surface of all threats of dismissal from their serin circumierence, the surface of an vice. They oppress and enslave the standing water must have a certain vice. They oppress and enslave the who was leader of the Baptist choir, sale of the said land to any other understood that all tenders must indegree of convexity-every part must masses who earn their bread by the Lindsay, during last year. be the arc of a circle. From the sweat of their brow during seven summit of any such arc there will days instead of six. "Did not your exist a curvature of 8 inches in the fathers thus, and did not Our God first mile, 32 inches in the second, bring all this evil upon us, and and 6 feet in the third. The curva- on this city? Yet you bring more ture downwards increases as the wrath upon Israel by profaning the square of the distance multiplied by Sabbath,"

eight. This rule, however, requires to be modified after the first 1000 miles. In the following table the amount of curvature (in round numbers) in different distances up to 100 miles is given: In one mile curvature is

inches, in two miles 32 inches, in three miles 6 feet, in four miles 10 feet, in five miles 16 feet, in six miles 24 feet, in seven miles 32 feet, in eight miles 42 feet, in nine miles 54 feet, in ten miles 66 feet, in twenty miles 266 feet, in thirty miles 600 feet, in forty miles 1066 feet, in fifty miles 1666 feet, in sixty miles 2400 feet, in seventy miles 3266 feet, in eighty miles 4266 feet, in ninety miles 5496 feet, in 100 miles 6666

To find curvature in any number of where they can "dust" themselves. I miles not given in above table, have frequently heard people comsquare the number, multiply product plain that the chickens would always by 8 and divide by 12. The quotient dust themselves near to the drinking is the curvature required.

It will be seen by this table that were thrown into the water. They do after the first few miles the curvature this because they can stand the clouds would be so great that no difficulty of dust no better than the lice can could exist in detecting either its and will always choose a spot where actual existence or its proportion. | water has been spilled. Little chicks On page 9 of "Lighthouses of the suffer very much if they are in very World," published by Laurie, 53 dusty quarters and will become Fleet street, London, in 1862, this prey to a kind of mechanical pneustatement occurs: "The coal fire monia just as some young pigs do (which was once used) on the Spurn occasionally.
