"I HONESTLY BELIEVE 'FRUIT-A-TIVES'"

The Greatest Cure For Rheumatism In The World

KNOWLTON, QUE., Oct. 12th, 1909.

"For many years, I suffered from severe Rheumatism, and the attacks were very distressing and prevented me from doing my ordinary work. I tried many remedies and physicians' treatments, but nothing seemed to do me much good, and I was becoming very anxious for fear I would become a permanent cripple from the disease.

I tried "Fruit-a-tives" and this medicine has entirely cured me and I honestly believe it is the greatest Rheumatism cure in the world."

R. E. MILLS.

Such a statement could not be bought from a man like Mr. Mills. He thinks too much of his good name, to sell it or sign it to a truth. Mr. Mills tried "Fruit-a-tives" after all other treatment failed—and "Fruit-a-tives" cured him of Rheumatism. In the goodness of his heart, he wrote the above letter in order that sufferers in all parts of Canada would know that there is one remedy that actually does cure Rheumatism. This testimonial was entirely unsolicited on our part. We did not know that Mr. Mills was taking "Fruit-a-tives" until we received the above letter.

It is a case like Mr. Mills' that proves the marvellous powers of "Fruit-a-tives" in arresting and curing disease. It may be stated, without fear of contradiction, that "Fruit-a-tives" will positively cure Rheumatism when properly used.

"Fruit-a-tives" is the only medicine in the world made of fruit juices and is the greatest Rheumatism cure known to modern science.

50c a box, 6 for \$2.50, or trial box, 25c. Sold by all dealers or sent, postpaid, on receipt of price by Fruit-a-tives Limited, Ottawa.

Protect Home From Invasion During the Summer Vacation

During the next six months—the period of flies and mosquitoes—the average Canadian home will be daily endangered by malaria or intestinal diseases, or by both, says a current article. Yet, in nearly every case, this peril may be reduced almost to the vanishing point by a small expenditure for wire-netting, plus a reasonable amount of determination on the part of the keeper of the home.

It cannot be too strongly impressed upon the Canadian housewife that every fly that enters her home may be heavily laden with the germs of typhoid fever or some other intestinal disease. Microscopically examined, the fly ranks as one of the most loathsome of all creatures, virtues not excepted. It feeds on filth by preference, and its feet are so formed that the germs through which it walks are carried away to be distributed wherever the fly may chance to land—in the milk picher, perhaps. Its possibilities in the spread of disease are shown by the fact that 100,000 bacteria were found adhering to one fly that was examined in New York City.

Too many people are content with the partial exclusion of flies from the house. Small openings are overlooked because a few stray flies do not cause a great deal of discomfort. The extraordinary rapid rate at which flies multiply is overlooked. Let us suppose that one fly lays her eggs in an unoccupied house that contains sufficient fly-food, and that no destructive force interferes with the successive generations. It has been estimated that the number of flies that house at the end of five weeks would be about ten million! And yet the housewife who pays no attention to half a dozen flies scattered through her house wonders why day to day "where all these flies come from!"

RIGID EXCLUSION.

If these carriers of disease be rigidly excluded from the contact with the food eaten by any family this summer, the danger of diarrhoeal diseases may be disregarded. Of course the flies will not communicate the worst of these, typhoid fever, unless one case of that disease is within the range of activity, but they are the hosts of many other parasites.

The mosquito, as well as the fly, should invariably be looked upon as a red flag of danger. It is not worth while to wait until he alights to see whether his body rests in a horizontal position or at an angle—in other words to determine whether he be an anopheles (malaria-bearing) mosquito or one of a number of other varieties. The fact that he is a mosquito should be a signal for his speedy destruction and for the closing of the inlet by which he has entered the house. It is true that malaria is decreasing both in its prevalence and in its virulence, but there are yet many thousands of

deaths from it every year. Moreover, for every case of serious illness from malaria, there are dozens of cases where the disease unfit for work without producing the symptoms of a fever. The important thing to remember is that scientific medicine knows only one way in which the malaria parasite can get into the human blood current—through the bite of the mosquito.

TRANSMISSIONS OF MALARIA.

The ease with which malaria may be acquired in a region where the mosquitoes are so scarce as to produce no discomfort is shown by the following instance:

An American and his mosquito-bar landed on the west coast of Africa, a region which has been known for a century as "The White Man's Grave." He knew that "African fever" is simply a pernicious form of malaria; and he had been taught that without the mosquito malaria is impossible. He determined to protect himself against mosquito bites, but he also began to take five grains of quinine daily as an extra precaution.

To his surprise, mosquitoes were not one of the white man's burdens on that coast. None of the European homes were screened; the familiar hum was never heard on the porch after twilight; and most of the beds were uncanopied. Presently the American forgot his mosquito-net, but kept up his quinine. Occasionally, on awaking in the morning, he would find a small red spot on the hand or forehead; but it seemed absurd to protect against mosquitoes so few as to attract no notice.

Before the first month had expired, however, the American was tossing in bed with the fever that has taken its heavy toll on that coast. And thereafter, an average of every two weeks for six months he had the African fever. He steadily lost flesh and strength, his complexion turned yellow, and there was a look about the eyes that caused more than one European to take him aside and say, "Better get away for awhile!"

Then an army surgeon happened along—a man with a reputation as an expert on tropical diseases. He was gathering data for a report on West African diseases. When he met the American he saw material for his report. He punctured an ear-lobe, collected a drop of blood on a glass slide, and went off to his microscope.

"The malaria parasite are eating up your red blood-corpuses," he said the next day, as calmly as if he had announced that the pigs were in the garden. "You have two varieties. One of them can be killed with quinine; the other can't. Better run home and build up your system."

"Very well," said the American. "But when I come again the mosquito that bites me first must first saw his way through the bars."

Pastor Real Preached His Farewell

Sunday morning Rev. J. R. Eeal, pastor of the Queen-st. Methodist church, who will shortly be leaving for Havelock, preached his farewell sermon. His text was taken from II Timothy, the first chapter and twelfth verse. Mr. Real sooke on Paul as a sinner and that he was saved. He then went on to state that the great aim of the apostle was that he might know God. As Paul said, "I know whom I have believed." With Paul there was no uncertainty, no conjecture. He was perfectly sure that he had been accepted of the Lord. Again, he was confident that God was able to keep what had been committed to Him. This may have referred to his body, to his soul, or to the gospel of Christ.

The speaker urged all present to be sure that they were saved, and then rest assured, as did the apostle, that the Lord would keep them until that day all who were committed to Him.

In the evening a large congregation was present, at which Mr. Hughes gave a very interesting and inspiring sermon.

Mr. G. A. Cornish Will be Chief Instructor

At a meeting of the Board of Governors of the University of Toronto on Thursday appointments were made of chief instructors to the staff of the University Schools.

The appointments carry with them in each case the lectureship in methods in the Faculty of Education. These men were chosen to fill these positions only on account of their eminence in their profession. Other appointments will be made later.

The Chief Instructor in Science will be Mr. George A. Cornish, B.A., at present science master in the Peterboro Normal School, and formerly science master in the Lindsay Collegiate Institute.

Leeds and Grenville County Council refused to rescind a resolution calling for an expenditure of \$200,000 for a county road system.

The congregation of St. Luke's, Kingston, will erect an altar and reredos in memory of the late Mrs. R. S. Fornerie, wife of St. Luke's rector.

Grant and Herbert Easter and Kay Prue, three young farmers, were committed for trial at Brockville on a charge of dynamiting Mrs. Nathan Euche's house, near Algonquin.

C. W. Post, of Battle Creek, Mich., offered ex-President Roosevelt \$100,000 if he would accept the presidency of the National Trades and Workers' Association for a year. The offer was sent to Mr. Roosevelt's home in Oyster Bay.

Pains or Cramps

"I carry Dr. Miles' Anti-Pain Pills with me all the time, and for aches and pains there is nothing equals them. I have used them for rheumatic pains, headache, and pains in side and back, and in every case they give perfect satisfaction."

HENRY COURLEN,
Boonton, N. J.

Pain comes from tortured nerves. It may occur in any part of the head or body where there is weakness or pressure upon the nerves.

Dr. Miles' Anti-Pain Pills

Relieve pain, whether it be neuralgic, rheumatic, sciatic, headache, stomachic, pleurisy or ovarian pains.

Price 25c at your druggist. He should supply you. If he does not, send price to us, we forward prepaid.

DR. MILES MEDICAL CO., Toronto.

HYMENEAL

SOANES-BROWNING.

The wedding took place at Havelock on June 22, of Miss Lottie Soanes, sister of Mr. G. R. Browning, to Mr. Harry Soanes of the Peterboro office of the Bell Telephone Co., son of Mr. and Mrs. A. J. Soanes, of Lindsay. The ceremony was performed in St. John's church by Rev. C. W. Holdsworth, in the presence of about thirty guests. Miss Mabel Sawyer was the bridesmaid, while the groom was supported by his brother, Mr. Randolph Soanes of Toronto. Mr. and Mrs. Soanes, after their honeymoon trip, will reside in Peterboro.

MATCHETT-BRITTON.

A very pretty wedding was celebrated at Christ Church, Bobcaygeon, on Tuesday, on arrival of the mid-day train, with full choral service. Rev. Mr. Barber officiated and the contracting parties were Miss Elsie Britton, daughter of Mr. Robert Britton, and Mr. Frederick C. Matchett, of Toronto. Mr. Matchett, supported by Mr. Fletcher Staples, of Lindsay, took their places near the rails, and as the bride entered the church on the arm of her father the choir sang "The Voice that Breathed o'er Eden."

During the signing of the register in the vestry, Mrs. H. O. Boyd played Hill's march and as the newly wedded couple proceeded down the aisle the joyous strains of Mendelssohn's march gave them a glad welcome on the way. The bride wore a di-rectoire sheath gown, veil and orange blossoms, carried a beautiful bouquet of white roses and lilies, and wore a gold pendant star in pearls, the gift of the bridegroom. She was the prettiest bride seen for many a year. Miss Clara Britton was bridesmaid and wore blue mull trimmed with lace, and hat to match and carried pink carnations. The party drove to the residence of the bride's parents Mr. and Mrs. Britton, where a delightful repast was taken and the wedding cake cut by the bride. Rev. Mr. Barber proposed the toast of the bride, to which the bridegroom responded and Mr. Staples made a pleasing reply for the bridesmaid. Portions of the cake were sent to members of the choir for the young ladies to dream on, and to aid in bringing on many similar events. The bride's going away dress was the latest color in bronze cloth coat and hat with feathers to match. Many young people were at the station to see them off and wish them safe return from their trip down the St. Lawrence. They will reside in Toronto.

BEATTY-PETTIT.

ADAMS-BEATTY.

On Wednesday, June 22nd, a very pretty double wedding was solemnized at 528 Crawford-st., Toronto, by Rev. S. C. Moore, of Toronto, when Miss Alice Pettitt, formerly of Wellington, and Mr. Percy A. Beatty, formerly of Trenton, also Miss Annabelle Beatty, and Mr. Aaron Adams, both of Trenton, were united in the holy bonds of matrimony.

The bridesmaids were Miss O. Edwards and Miss Hazel Skitch, of Toronto, and the groomsmen were Mr. Percy H. Skitch of Toronto, and Mr. M. A. Harris, of Trenton.

The bridal parties entered the drawing room precisely at high noon each of the brides carrying a show-er bouquet of cream roses and maiden hair fern, while the bridesmaids carried bouquets of lily of the valley and pink carnations.

Miss Pettitt was gowned in a beautiful princess dress of cream silk mull with real lace trimmings. Her travelling dress was blue rajah silk with hat to match, while Miss Beatty wore white pointe d'esprit over white satin, her travelling suit being taupe with hat of taupe mohair and trimmings of lilacs and rose-buds.

Shortly after the nuptial knot was tied the bridal parties and guests repaired to the dining room to partake of a very dainty repast, after which toasts were proposed to the brides and bridesmaids, to which fitting responses were made. The bridal parties left on the 4:30 train for London, St. Thomas and Buffalo, amidst a shower of confetti.

Blackburn and Jones, the two prospectors responsible for the Caribou Lake rush, were convicted at North Bay of fraud.

R. C. Edwards, proprietor of the Eye Opener, will be tried at Winnipeg on Sept. 30 on a charge of circulating obscene literature.

Pierre Poudrier, of St. Alexis des Monts, Quebec, is being congratulated on the birth of his 31st child. Mr. Poudrier is 63 years old and has been married three times. Seven children were born from the first marriage, fifteen from the second and from the last nine. Of these 31 children, 23 are still living, and the eldest is 45 years of age.

THURSDAY, J

The Great Standard Breed

THE PATHFINDER

No. 33694, A. TR

Breed your mare where she brings you best returns. That is the intelligent breeder wants to know. When selecting a stallion to pair to get one with plenty of bone and good conformation, feet and legs and above all, a standard bred, and be sure to look at the pedigree before deciding.

The only way to locate the best is by enquiring and comparing. A colt from an inferior sire costs as much to raise as one of the best.

Mr. C. O'Neill, Lindsay, is a proud possessor of a colt by a sire that shows more speed than any colt ever bred in Victoria and surrounding counties. When only eight months old it could easily cover three minute clip while being inside its dam over the snow. Presently it has been an eighth of a mile in 20 seconds.

Mr. L. Bennett, Port Hope, is owner of the first colt got by a sire bred in Canada, which also shows remarkable speed with a great deal of going, which is quite evident to any one who will produce speed, early and extreme speed.

The Pathfinder will make the run from 1910 at my barn, 170 Kent street, Thursday afternoon, he will go to Omamec via Reabro for the night, returning home for noon Friday.

Fee—\$15 to insure, payable in 1911, with return of the horse free in case of bad luck.

For pedigree see small cards.
