Cameo Kirby's continued existence has achieved this importance. It has become an annoyance to me-Colonel Jacques Gaspard Deschamps Moreauand I shall wipe him from the earth." "Let us hope so," agreed Aaron.

"Miche Larkin Bunce fo' to see d genaman what's jest come," announced old Croup, popping his head around the door and making a polite bow. Before the gentleman could arise Kirby's partner shouldered his way past the negro and strode into the room. "Well, Moreau, I've run you down at last?" he exclaimed cynically, eying the startled gambler. "I've hunted

the town for you, from the Salle de

Conde to Congo square. I reckon you

"Mr. Randall," he said politely and ness with this gentleman is private. Might I beg of you"-"He kin stay for all I care," inter

rupted Kirby's partner. "Not at all, not at all," apologized added, turning to his honored guest

FURNACE THAT WILL GIVE YOU AS MUCH HEAT FROM SIX TONS OF COAL, AS YOU EVER GOT FROM SEVEN, IS ONE YOU CANNOT AFFORD TO OVERLOOK.

The "Hecla" will do this: It is built to save coal at every point, but the big coal-saving feature is the Steel Ribbed Fire Pot. By adding Steel Ribs to the Fire Pot the surface which radiates heat is increased three times.

Every Furnace has flanges or projections of some sort on the fire pot to get more radiating surface, because the heating capacity of the fire pot increases as you increase the radiating surface. But the "Hecla" is the only Furnace that has attained the greatest possible radiating surface and the reason is that where other Furnaces have clumsy cast-iron Flanges, the flanges on the "Hecla" are made of steel plate and fused to the fire pot casting by our patent process.

STEEL RIBBED FIRE POT Constructed to save Fuel Flanges of steel plate-97 number-are fused into the Fire Pot casting, increasing the radiating surface three times. This gives the air better access to the conducted away from the coal as out waste.
