DRAIN YOUR FARM OR IT WILL DRAIN YOU

I am only a hole in a humble vocation. Yet I greatly control your civilization. I am very tenacious and hard as a stone.

And am like old Horations in holding my own.

So lay me down, keeping me straight in the ditch.

And while you are sleeping, I'll be making you rich.

Every farmer of pride dearly loves to provide

For the future - the son or the daughter;

So give me a chance, and I'll greatly enhance

And here's my great beauty: I'm always on duty.

Out of reach of the "bulls" and the "bears."

And when you're in your grave, I'll continue to slave

For your children, their children and theirs!

My habits are good, I require no food.

My joints are all made without mortar.

And I always abstain when deep in the drain.

From anything stronger than water.

If your land is too wet, and you're bothered with debt

And insurances begins to accrue, obey nature's laws by removing the cause.

DRAIN YOUR FARM, or it will drain you!

'Tis so foolish to plant where the wild goose and brant.

Might paddle from March to September.

You might as well sow on a November snow.

And expect seed to grow in December.

Some farmers are falling and weeping and wailing.

And blame the good Lord without reason!

When if they would stop sewing seed in the slop,

They might raise a good crop every season.

Most farmers relent the money they have spent

For things only used to beguile, But never as yet did a farmer regret

Paying Jack Miner money for tile.

TO GUARANTEE BONDS.

The county council met Wednesday afternoon, the warden, R. A. Callan, in the chair. A delegation, composed of his worship, Mayor Beal, F. W. Sutcliffe, president of the board of trade, D. Cinnamon and T. H. Stinson, the town solicitor waited on the council and asked that the county would guarantee the debenture bonds amounting to \$230,000 needed for the purchase of the Light, Heat and Power Co.'s plant.

Mr. Stinson stated that the town was contemplating the purchase of the L. H. & P. water-power and generating plant at Fenelon Falls, which would cost \$230,000, for which debentures would be issued and the town asked the county to guarantee these bonds as by so doing they would save the town considerable as the bonds would sell at a lower rate and it would also make them easier to market.

He explained the matter in detail to the council stating that they had power under the Municipal Act to guarantee the debentures, and that it would be at no risk to the county as the town would be liable to them, and he also explained the financial condition of the town which showed that the town had a surplus over the liabilities of \$2,326,502.

The speaker also explained that they expected to have a surplus of \$10,000 a year from the plant after paying for the management, interest and all expenses. He stated that they did not ask for a by-law just then but simply a resolution of the council signifying the willingness of the county to guarantee the bonds.

Mayor Beal also explained the matter fully to the council, stating that the town in buying this property was not going to increase its liability as they were buying a paying concern and expected to run it on a paying basis and that they considered it worth more than what was being paid for it.

He stated that Hon. Mr. Beck of the Hydro-Electric Commission had assured him that within ten years if the town wanted to purchase the Fenelon Falls power it would cost \$80,000 more than at the present time as the mergers and trusts were buying up all the power. The mayor explained that in the estimates \$1,400 was to be laid aside each year for depreciation and that that alone would pay for the plant in thirty years, besides the sinking funds. He went on to explain the work of the Hydro Commission and stated that their report was to be thoroughly relied on.

His worship stated that if the town did not accept this proposition they would never get the chance again as the mergers were rapidly buying up all power available. He also stated in reply to a question that the price of power and light in Lindsay was cheaper than any town west of Toronto.

Dr. Sims, of Fenelon Falls, raised a number of questions in regard to the report furnished by the commission stating that in Fenelon Falls it was considered that only 1100 h.p. could be developed. He also stated that in low water this could not be developed and that sometimes it would be difficult to run at all.

Mayor Beal in answer to this stated that the Hydro Commission had assured him that the Fenelon Falls power was one of the best in the Dominion as the Trent Valley cannot demand a large preservation and the water of the country was behind it.

He stated in reply to this that they could not get any water if it fell below the hydro feet and that there were a large number of jacks going through in the summer, all of which took water.

Mr. D. Cinnamon in a few words stated that anything that was to the advancement of Lindsay was for the advancement of the county and by guaranteeing these bonds they would save the town thousands of dollars without risking a dollar themselves.

Mr. F. W. Sutcliffe spoke briefly on the matter explaining that he would like to see hearty co-operation between the council and the town and stated that there was no doubt of the town being able to take care of the \$23,000 as it was one of the best towns in the province.

It was then on motion passed that the matter be referred to the finance committee, the warden assuring the delegation that they would carefully consider the question.

FOUR KINDS OF MEN.

Men are four: He who knows, and knows he knows, He is wise—follow him.

He who knows, and knows not he knows, He is asleep—wake him.

He who knows not, and knows not he knows not, He is a fool—shun him.

He who knows not, and knows he knows not, He is a child—teach him.
