Talk It Over with Your Banker

Consult your banker about your financial affairs and investments. Your bank will not discourage you from making a profitable investment because it is the business of a bank to lend money on any acceptable security, and if what you interd to invest in is good enough for the bank, you will, of course, be recommended to take it. But if you put your money into something that is not an acceptable security, then you "tie up" your resources and deprive yourself of the credit that might otherwise be extended to you.
