THURSDAY, JULY 6th, 1899.

MARIPOSA STATION

Miss M. Foster is home for vacation.

Miss J. Marshall of Orillia is visiting at Mr. J. Hutchinson's.

The public school closed on Tuesday June 30th, for the midsummer holidays.

Mr. Jas. and Chas. Dick, with a couple of lady friends, visited relatives in Verulam over Sunday.

Mrs. Walter Frise is very ill with inflammation of the stomach. There is but slight hopes of her recovery.

Mr. Cecil Prouse returned to Toronto on Thursday last week, after a few weeks holidays with his parents.

One of our citizens to the south of the station, who claims to be a good American, celebrated the 4th of July by hoisting the "stars and stripes" on a tall pole in his yard from which it floated gently in the breeze all day.

SALEM-MARIPOSA

Mr. A. Varcoe is home from Toronto. Miss Louie Gilson is visiting at Sunderland.

Mr. Leslie Tremere spent Saturday at Port Perry.

Mr. and Mrs. W. Wickert are visiting friends at Columbus.

Mr. and Mrs. Arthur Tremere and family spent Sunday at Woodville.

Quite a number of the Salem people in the anniversary at Little Britain last Monday.

Miss Fee of Lindsay, who has been teaching school in this locality is home on her holidays.

Miss Evelyn Spark is home from the Toronto Orthopedic Hospital where she has been for the past two months.

Thursday evening last the Rev. R. Emmerson gave a very profitable discourse on missions.

A very quiet wedding took place Wednesday at the home of Mr. J. Williamson, when his only daughter, Miss Emma Maud, was united in marriage to Mr. Dan. McCarty of Hertmer, N.Y.

Only the intimate friends of the happy couple were present. Mr. McCarty will be greatly missed in this vicinity, where she leaves a host of friends.

KINMOUNT

Mr. Hopkin's new iron-clad building is now about completed, and is a credit to the village.

Dominion day passed off very quietly here. Several parties spent the day at Burnt river and report a pleasant time.

Miss Ida Scott, teacher at Tory Hill, is home for her summer vacation. Miss Mills and Miss Emily Munt are also at home for their holidays.

Derry flute and drum band under the leadership of Mr. E. King are practising twice a week for the celebration of the Battle of the Boyne.

What is the matter with the Haliburton Orangemen? We have been waiting patiently for some time for a definite understanding as to what train arrangements they are making for the 12th July. Come get a hustle on if you want a good crowd from Kinmount.

Mr. Lewis Bondah of Lindsay paid Kinmount a visit on Saturday last. His old friends here are always pleased to see him. Lew is working in Mr. Parkin's mill in Lindsay, and reports that as much work is being done there

under the new ten-hour schedule as was ever done in the old "eleven-hour" slavery days. By the way, Kinmount has the only mill in the county of Victoria that is running on the old slavery day plan. Why?

The local lodge of True Blues, will meet in the lodge room on Sunday, July 9th, at 3 p.m. for church parade. The Rev. Mr. Hastie of the Presbyterian church will conduct the services and preach the annual sermon. All members are requested to be on hand in good time. Regular monthly meeting of this lodge will be held in the Orange hall on Thursday, July 6th, at 8 p.m. Important business to be transacted including passage-at-arms by several members.

CROSS CREEKS

What happened to the young couple who went plump to Flum Point. Pat only knows.

From an attack of la grippe the gentle voice of Mr. Nicholas Brady is down to a whisper. Otherwise he is not much affected or physically shaken.

Ready reckoner said in a letter addressed to the free and independent people of this locality "Rogues dress well." Was it for that reason he got himself up in such faultless attire the last picnic he attended. What a useless expenditure.

Mr. P. Brady, who has been visiting his father and brother Mr. N. Brady for the past few days, returned to his home in Sault Ste. Marie last week. He was accompanied by his sister Mrs. James Shea, who purposes remaining for a short time with many friends in that city.

Mr. Jas. Byrne let several contracts in this district last week. A feeling of satisfaction passed each ratepayer from the good work performed by the commissioner. He is an intellectual and up to date official who is not at the rear end of the procession, but right up with the band wagon either at the municipal board or on the highway instructing the ratepayers in the art of road-making. In laying out and completing a piece of road near the school house he has left a sample which men will admire in years to come and justly pay a tribute to the illustrious Byrne.

We do dislike awfully having to call men down after this method, but when they disregard all things in the form of reason we must apply a remedy and bring them to righteousness in a just and holy way. Would our esteemed friend who is wanting to divert the course of certain waters, please borrow a Bible and read St. Luke vi. 31. After looking it up he can come to one of two conclusions: that the water must remain in its natural course or he must renounce the doctrine of the Apostle. There would appear to be a good opening for a live missionary right here to christianize some of our native grown heathens.

GRASS HILL

The soldier boys have returned from camp, having gained considerable in experience and powers of endurance, but not in weight.

The meeting on Thursday evening decided to hold the Sabbath school picnic by the lakeside at Beaverton, on Thursday, July 6th. Judging from the efficiency of the committees appointed its success is already assured, weather permitting.

The result of the base ball game at Cambray, on Saturday last must have been highly gratifying to the Eden-Oakwood team, cheered on and encouraged as they were by the beauty and chivalry of the whole country side. But their exultation will be slightly moderated when the nature of the opposing nine becomes known to the public. When the time arrived for the game to start only four of the Grass Hill regulars reported for reasons best known to the delinquents themselves, and in order to entertain the unexpected crowd of spectators who had assembled, they recruited from a number of unexperienced players on the grounds. The surprising part of it is that our boys succeeded in scoring at all under the circumstances. A peculiar and invariable feature of all games played with the Eden team at home is the character of the grounds, honey-combed with treacherous little holes made by cattle in early spring and covered with a half grown crop of hay. People unaccustomed to such grounds are at a great disadvantage, losing the ball in

the long grass or in one of the pitfalls, or spraining an ankle in attempting to run. It is a significant fact in connection with this, that the games they win are won on such grounds. We would also like to mention for the sake of a few who were present, that it does not detract in the least from a man's manliness or courage because he refuses to engage in a brawl with a drunken man.

News of the Week

Roadmaster Cheer of the G.T.R., met with a severe accident last week. While riding near Longford on his railway electric tricycle he ran over a dog, with the result that man and machine were pitched into the ditch. Mr. Cheer was travelling at the rate of 25 miles an hour at the time, and was fortunate that he escaped with badly bruised hands, face and body. The machine was smashed.

Saturday night about ten o'clock, Mrs. Dodds, an old lady who was visiting Mrs. Ferguson of Port Hope, was retiring, and while going upstairs the lamp which she carried exploded. She had Mrs. Ferguson's youngest child in her arms at the time, but managed to save it, and then ran for the street. When found she was lying on the doorstep with every vestige of garment and also her hair, burnt off. Five doctors were called, but their efforts were of no avail, as she only lived about four hours.

The quiet and peaceful village of Avening, two miles from Creemore, was visited by four well dressed ruffians on Tuesday of last week. They remained about the Felts house all day, and about 6 o'clock deliberately took possession of the hotel, one of them occupying a position behind the bar armed with a Smith & Wesson hammerless revolver. He served his pals, and they afterwards proceeded to ransack the house from cellar to garret. Two young villagers, who attempted to interfere, were roughly handled. A telephone message was sent to Creemore, and constable Turner secured a rig and six young men volunteered to go with him. Upon arriving at the house, they were met by the four men, each armed with a revolver, which they discharged in the midst of the crowd. A fight for life followed and Dr. Bailey of Creemore, had one cheek grazed with a bullet. The quartette were getting the worst of the battle and took to their heels, Turner and his men following. Two of them were captured and brought to Creemore, but the other two escaped. One of the pair was cut about the head and face. The pair were given a trial before a magistrate and were brought to Barrie to await trial.

What You get in the Toronto Weekly Sun

Bystander's Weekly Comments on Current Affairs. Impartial Editorial Discussion on Public Questions. A Market Report Prepared Especially for Farmers. Up-to-Date Agricultural Information. Interviews with Farmers on Conditions as they are to-day in Different Parts of Ontario.

New subscribers can have The Watchman-Warder and The Sun from now until Jan. 1st, 1900, for 50 cents. The combined papers give 128 columns each week. Where can you get equal value for your money?

Keeping Up Fertility.

The fertility of the soil must be kept up by an intelligent and systematic plan of manuring and in addition the soil must be put in proper shape for receiving the seed. When this is done the farmer may rely upon nature doing the rest, and if by chance there should be an unfavorable season he will be better off by having cultivated his land properly before sowing than if he had not done so.

Docking Lambs.

Always dock your lambs when young regardless of weather. Better under 10 days old than later. Wing's lamb dockers are the best device for the purpose yet used in this country. Where there are many lambs, to dock two pairs of them should be used, so as to always have one at white heat while the other is in use. Apply pine tar to the stub of the tail.—Live Stock.

Cornstalk Disease.

Cornstalk disease is the name given to an affection occurring in cattle as a result of eating cornstalks and corn fodder that seem to have been rendered poisonous by moldiness and fermentation. The disorder is usually confined to animals under 4 years of age, and it runs a rapid course, causing death in from 4 to 36 hours.

Sheep and Disease.

Sheep are naturally healthy, but quickly succumb to disease in unfavorable conditions. Damp locations are conducive to foot rot, and damp quarters at night produce sickness. There must be ventilation, but shade from heat and cold and good water. It cannot be repeated too often that sheep need good care.

Healthy Lambs.

Corn and confinement of the ewes will make large lambs perhaps, but they will have but little strength or vitality. Separate the pregnant sheep and give them bonemaking food and proper exercise. The larger the proportion of oats, wheat, bran and clover hay which can be got into the rations the better.—Live Stock.

MAPLES AND ELMS.

Joseph Meenan Tells How to Grow Them From Seed.

A correspondent wrote me recently, asking if it was advisable for him to sow sugar maple seeds in the spring, as he had 15 acres of land he would like to cover with sugar maple trees. I wrote him that it would be useless to sow the seed in spring if it had been kept in a dry condition, but if it had been in damp soil all winter, if only slightly damp, it might get the growing. But as stated before in these columns, it is not wise on the part of amateurs to attempt the raising of tree seedlings unless it be of sorts which grow readily from seed, as it is not at all the same thing as raising vegetable or flower plants. It is much more satisfactory to obtain a lot of seedlings and set them out where wanted. A 15-acre lot planted with seedlings two or three feet in height, and kept cultivated for a few years, would make a surprising growth. Cultivation is necessary, that no weeds take the food the trees should have. In this way a young forest of almost any kind of tree could be had in a short space of time. In this way nurserymen bring on acres of shade trees in a few years, and it is just as easy for farmers to do the same thing. There are but very few cases where it would not be very much more satisfactory to set out bought seedlings than to attempt the raising of the plants at home.

There are a few trees which ripen their seeds in early summer, and among them some that farmers might like to sow. The white maple, red birch, red maple and all elms ripen very soon after flowering, and if sown at once make fair plants the same season. The white maple treated in this way will make plants of two or three feet high the same season in favorable times. But neither this nor the red maple is of much value in the way of timber, not as much as elms are. The way to sow these seeds is to secure them as soon as they fall from the trees and sow them in convenient beds, from which they may be transplanted in a year or two, when of proper height. Beds four feet wide are of convenient size, permitting of the pulling out of weeds and the watching of seedlings as they grow. The seeds are to be covered to about their own depth; and if all goes well they appear above ground almost at once. A somewhat singular fact is that if these seeds are kept till fall and sowed then, with other seeds at the usual time, rarely do any of them grow. Fresh white maple seeds grow so readily that it is quite feasible to sow a few seeds in squares, much as corn is often sown. If two or three seeds be sown together there would certainly be one plant to a hill, and if more come, the strongest one only should be left. There is some danger of missing altogether here and there under this plan, but on the other hand the young trees that do start do not receive the slight check which those do that have to be transplanted. There is much interest in watching the growth of seedlings, and this should lead many to collect and sow these seeds, aside from what there may be attached to it in the way of profit.—Practical Farmer.

A WAGON HAY RACK.

How One Can Be Made at Home That Will Prove Satisfactory.

In constructing a hay rack for an ordinary high-wheel farm wagon take four sides or bedpieces (a) 2x8x14 feet long; red elm timber makes the best material, as it is light and durable. To these bolt four crosspieces (b) to the under side 1 1/2x6 inches wide. In the center place a good strong staple through which the lower ends of wing arms pass. Arms (c) are made of 2x4-inch

HOMEMADE HAY RACK.

stuff. Three strips (d) 1x4 are bolted to these arms in such manner that they will pass at center without interfering. This will form wings extending over wagon wheels. If desired, bottom crosspiece (b, large or small illustration) can be made eight inches wide and mortised to receive arms, doing away with staple mentioned above. For the front guard two pieces 1x5 at base tapering to three inches at top, slightly curving in toward center and three crosspieces mortised into this will make it complete. This can be bolted inside to bedpieces by short bolts or full length rod in such a manner as to permit folding down when not in use. Folding stakes can be placed at back and left off, according to choice. This is termed a three-piece rack and can be removed or replaced conveniently by one person.

Wall Paper chosen from our stock will last on the wall from five to ten years. There's wisdom in choosing the best.

Spring Window Shades, 20c. up

W. A. GOODWIN,

Next Door to Simpson House,

Are You Going Picnicking?

If so, Pin this to your hat, and go to BRADY for your CANNED GOODS. Only the newest and freshest lines kept in stock.

- Corned Beef -Ox Tongue -Sardines
-Porked Ham -Corned Beef -Bottled Catsup
-Canned Oatsup -Little Neck Clams -Salmon
-Canned Peaches -Bottled Pickles -Lobsters
-Canned Strawberries -Canned Pine Apple

Our Grocery Department is always complete with choice lines of Teas, Coffees, Sugars, Currants and Raisins. Fruits in season.

THOS. BRADY

A CARD...

The birds will soon begin to build. Perhaps are thinking of doing the same thing. It may be will put up a barn or house this summer. If so I anxious to let you know that I have the Building material you require, from Rough Lumber and Planed make a list, up to the finest Turned and Carved for the interior of an elegant house. Think over you need in Doors, Sash, Mouldings, Shutters, and Turned Goods, then drop in and get figures.

J. P. RYLEY, THE VICTORIA PLANING MILL

Mr. G. O. ARCHIBALD'S CASE

Didn't Walk for 5 Months. Doctors said Locomotor Ataxia

Milburn's Heart and Nerve Pills Cure a Disease hitherto regarded as incurable.

The case of Mr. G. O. Archibald, of Hopewell Cape, N.B., (a cut of whom appears below), is one of the severest and most intractable that has ever been

reported from the eastern provinces, and his cure by Milburn's Heart and Nerve Pills the more remarkable from the fact that he was given up as incurable by worthy and respected physicians. The disease, Locomotor Ataxia, with which Mr. Archibald was afflicted is considered the most obstinate and incurable disease of the nervous system known. When once it starts it gradually but surely progresses, paralyzing the lower extremities and rendering its victim helpless and hopeless, enduring the indescribable agony of seeing himself die by inches. That Milburn's Heart and Nerve Pills can cure thoroughly and completely a disease of such severity ought to encourage those whose disorders are not so serious to try this remedy. The following is Mr. Archibald's letter:

Messrs. T. MILBURN & Co.—I can assure you that my case was a very severe one, and had it not been for the use of Milburn's Heart and Nerve Pills I do not believe I would be alive to-day. I do not know, exactly, what was the cause of the disease, but it gradually affected my legs, until I was unable to walk hardly any for five months. I was under the care of Dr. Messer of Melrose, who said I had Locomotor Ataxia, and gave me up as incurable. Dr. Solomon, a well-known physician of Boston, told me that nothing could be done for me. Every one who came to visit me thought I never could get better. I saw Milburn's Heart and Nerve Pills advertised and thought I would try them anyway, as they gave more promise of helping me than anything I had ever taken. I had seen when I started taking those wonderful pills—not able to get out of my room, and saw me now working hard every day, you would know me. I am agent for P. O. Vickery, of Hopewell Cape, N.B., and have sold 3000 copies in 30 days and won a fifty dollar prize. Nothing else in the world saved me but those pills, and I do not think they have an equal anywhere. The seven boxes I took have restored me the full use of my legs and given me strength and energy and better health than I have enjoyed in a long time. G. O. ARCHIBALD, Hopewell Cape, N.B.

In addition to the statement by Mr. Archibald, we have the endorsement of two well-known merchants of Hopewell Cape, N.B., viz.: Messrs. J. E. Dickson and F. J. Brewster, who certify to the genuineness and accuracy of the facts given above.

Milburn's Heart and Nerve Pills are 50c. a box, or 3 for \$1.25, at all drug stores, or sent by mail. T. Milburn & Co., Toronto, Ont.

Worth While to Watch our Windows

for just now they're dressed with men's and women's Spring shoe styles—as usual, best and most select line in town.

When you buy your Shoes at this store you know that you have not paid too much for them; that they are the correct style; and that they will wear well.

These are some of the points on which we have built up our present large business. The best dressed people in town wear our Shoes. No trouble to show goods.
